James,

That sounds good. Thank you.

Dan,

I don't think we prepared an official field exam. Because the powerhouse space is conceptually on the bottom of Palisades Reservoir, it would be impossible to do a field exam. I think we should rely on information provided by the Bureau of Reclamation (with their proof of beneficial use) and information from the safety of dams program. We searched our office and can't even find the draft license prepared by Dave Carlson. It may have been sent to Gary for review. Sorry I can't be of more help.

James

Hello James,

I have put the three files 01-7540, 01-10401, and 01-10566 on our list to work on. Mat Weaver has actually already been working on 01-7540, so it was actually already being worked on here. It wasn't on our list, so it wasn't on yours either. Sorry about that, I didn't know what was going on for that water right until today.

You stated in your email that a field exam was done on 01-10401, but it isn't in our files. Could you send us a the field exam. If you could have it scanned, that would allow us to work on it while the field exam is in transit. I will have our staff look it over and get the license issued.

Thank you

Dan Nelson
