RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. The rented portions of rights 17-2052 and 17-7063 when combined shall not exceed the irrigation of 118.1 acres.
10. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.

WATER SUPPLY BANK RENTAL AGREEMENT No. 430

11. The period of use for the irrigation under water right 17-7063 may be extended to a beginning date of 4/1 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 5/1 and after 9/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than December 7, 2012.
12. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

17-2063	Irrigatioin	0.64	175.4	67.6		0.64	175.4	67.6
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.83	257.7	125.0
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$487.00 for rental 430 and \$2,170.00 for rental 452** was calculated based on the current rental rate of \$20.00 per acre-foot times a diversion volume of 244.0 acre-feet for rental 430 and 1,085.0 acre-feet for rental 452. Since you have a private agreement with the lessor **you are only obligated to pay the 10% administrative fee or \$487.00 for rental 430 and \$2,170.00 for rental 452.** An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$2,657.00 made payable to the Idaho Department of Water Resources, together with the signed rental agreements, within 14 days so I can complete processing.

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Re: Water Supply Bank Rental Application 1679 for Agreement 430

Purpose/Narrative: Application to rent water from the Water Supply Bank (Bank) was submitted by Greg Sullivan of Brockway Engineering on behalf of CSS Potato Farms and was received by the Department on March 10, 2020. This rental application was part of a package that included lease application 1663. The original lease offered a total of 125 acres between water rights (WR) 17-2052 and 17-7063 to lease into the Bank. The rental application originally proposed to rent the entire 125 acres, along with the associate rate and volume. Review of the lease rights revealed they only authorized 118.1 acres of irrigation in the quarter quarters described in the application. The lease was subsequently adjusted to meet this acreage. Review of the rental POU revealed it was also only 118.1 acres, and therefore the rental has been adjusted to rent the entire acreage available from lease of WRs 17-2052 and 17-7063.

Authority to File: The application was signed by Trent Munden, and supporting documents included a declaration signed by Reagan Grabner, managing partner for CSS Potato Farms, which provided signing authority to Trent Munden for all documents relating to water right applications. A review of CSS Farms annual report with the Idaho Secretary of State shows Reagan Grabner listed as a manager.

Parcel data available to the Department shows the land at the place of use (POU) and point of diversion (POD) as owned by Holbrook Farms, LLC. The rental application included a farm lease agreement between Holbrook Farms and CSS Potato Farms, granting CSS potato permissions to operate on these lands and utilize the irrigation system. There are no concerns over the authority to file.

Water Right Validity/Forfeiture Evaluation: Right 17-2052 was licensed in 1973 and 17-7063 in 1983. These rights were consolidated in 2012 through transfer 78181 in order to increase the overall diversion rate and volume. This transfer limited the two rights combined to the irrigation of 316 acres, and authorized a diversion rate equal to 0.007 cfs per acre and volume of 2.1 acre feet per acre when combined. A portion of these rights have been leased to the Bank since 2017, and review of Climate Engine MAX NDVI data for 2015 and 2016 show clear signs of irrigation across the 316 acre POU in those years. No further concerns of water right validity.

Injury Evaluation/Rentability: This rental essentially proposes to move the 118.1 acre leased portion of these two rights to an adjacent field directly southeast of the leased acres. The same POD for the leased rights will be used for the rental. There are no concerns of injury to other water rights.

Enlargement of Use/Rentability: The application initially requested a total of 125 acres of irrigation, 57.4 acres from WR 17-2052 and 67.6 acres from WR 17-7063, however these water rights only authorize the irrigation of 118.1 acres in the QQs offered to the Bank. Additionally, the rental requested a diversion rate of 0.64 cfs for the 67.6 acres of 17-7063, which equaled 0.009 cfs per acres, however this right only authorizes 0.005 cfs per acre. The lease was adjusted to match the appropriate rate and acres and this rental was adjusted to the same. A total of 118.1 acres and rate of 0.605 cfs of 17-7063 was leased to the Bank, and a total of 54.2 acres and 0.183 cfs of 17-2052 was leased to the Bank. The rental will be adjusted

to include the entirety of the leased portions of these rights, and the agreement will be conditioned so that the rental only authorizes the irrigation of 118.1 acres when both rights are combined.

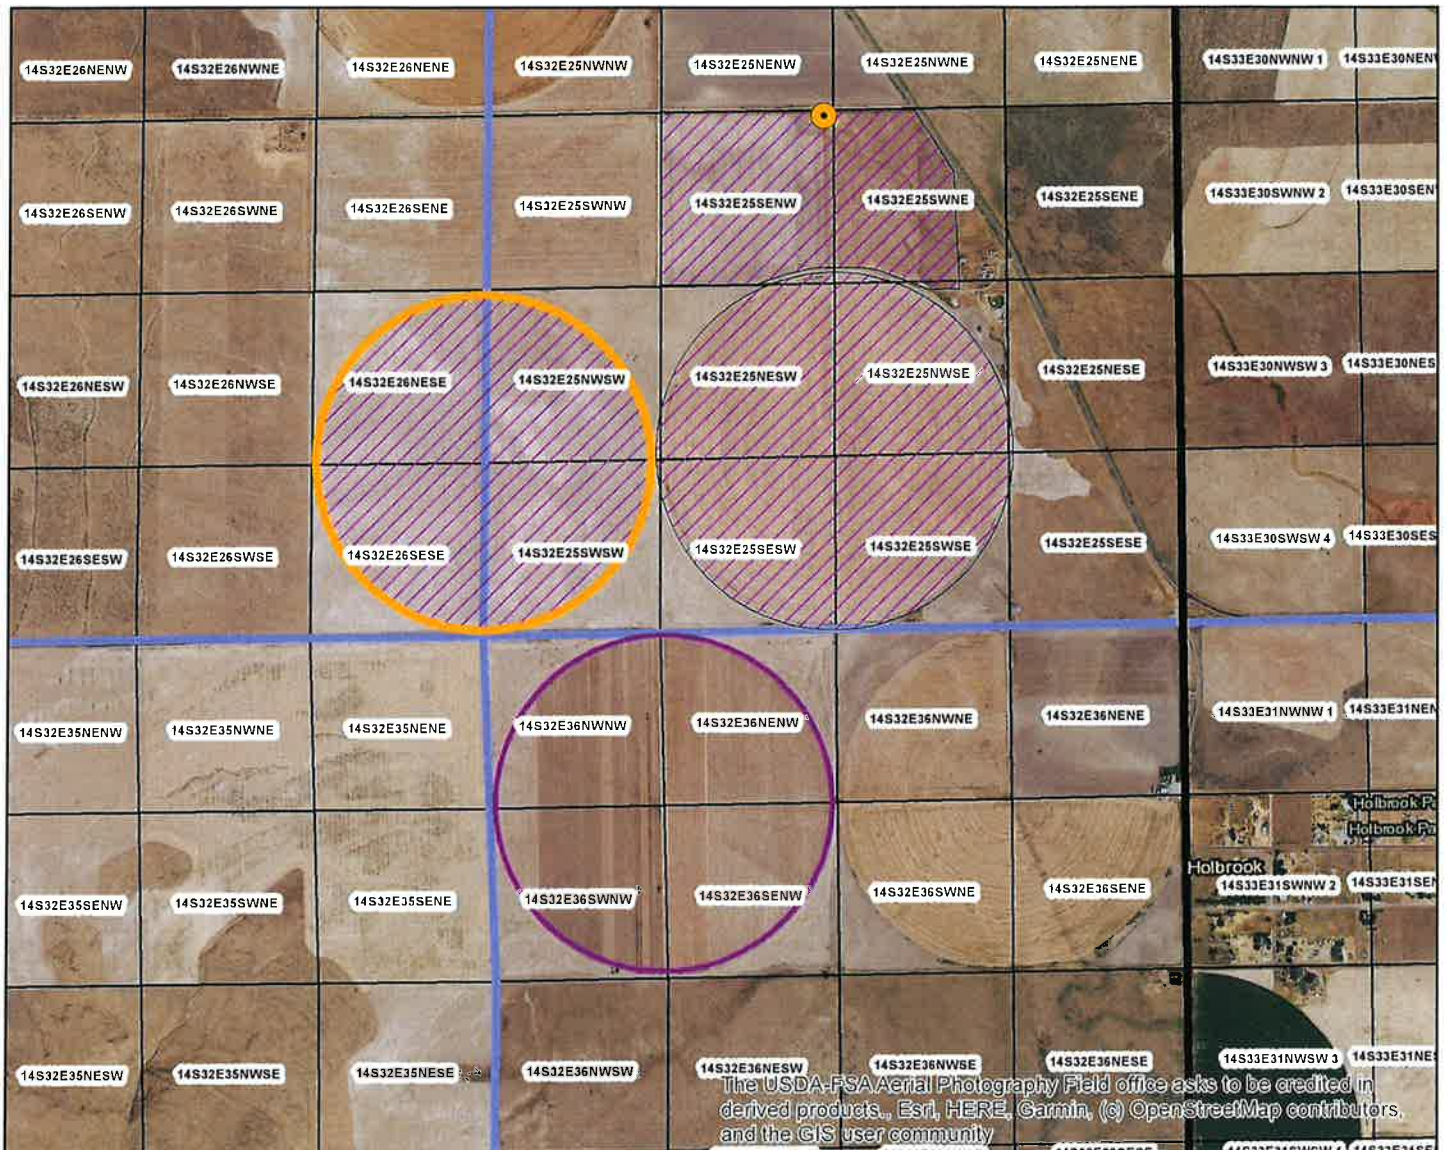

During prior lease/rental reviews, the farm manager provided information explaining that the pivot from the idled field had been moved to the rental POU, essentially creating a field of the exact same size. There are no further concerns of enlargement.

Local Public Interest: There are no local public interest concerns

Beneficial Use/Conservation of Water Resources: This rental appears consistent with the conservation of water resources within the state of Idaho.
