RE: APPLICATIONS FOR PERMIT 47-8038, 47-8039, 47-8040 AND 47-8041
IN THE NAME OF DAVID R. MILLARD

Dear Mr. Millard:

Enclosed is a copy of your letter dated January 7, 1989 to the department and a copy of my letter dated January 28, 1992, to Roger Ling in connection with the above referenced applications. Please provide the requested information promptly or complete and return the enclosed relinquishment forms so the applications can be removed from department files.

If you have questions, please feel free to contact the department.

Sincerely,

L. Glen Saxton

RE: Applications for Permit Nos. 47-8038/8039/8040/8041

David R. Millard
dba Crystal Springs Ranch
22627 152nd SE
Kent, WA 98042

Dear Mr. Millard:

This Department has recently completed the preliminary processing of the above referenced Applications for Permit to appropriate the public waters of the State of Idaho.

Although there were no protests received by the Department against the approval of the applications, the Department is presently delaying further action (approval of the applications) because the groundwater sources identified on two of the applications are located in the Twin Falls Ground Water Management Area. (Enclosed for your information is a copy of the Order creating the Management Area.)

The primary reason for creating the ground water management area was due to the competition for the hot water resource in the area. There presently is an on-going lawsuit filed by the College of Southern Idaho relative to competing uses of the hot water.

For the above reasons, the Department will hold your applications without approval pending the results of the lawsuit or evidence that there is water available for your proposed use.

Enclosed you will also find a copy of the memo written by Leah Street as per your request. If you have questions, please feel free to contact this office or our office in Twin Falls.

Sincerely,

L. GLEN SAXTON
Chief, Operations Bureau

RE: APPLICATIONS FOR PERMIT 47-8038, 47-8039, 47-8040 AND
47-8041 IN THE NAME OF DAVID R. MILLARD

Dear Mr. Ling:

The above referenced applications have been held without action for some time by the department at the request of the applicant in order that the four applications could be considered together. In late August 1988, you advised that the applicant wanted to have the two applications which proposed the appropriation of "cold" water (47-8038 and 47-8041) considered for approval separate from the other two applications.

Based on your request, the department has reviewed the two cold water applications and has concluded from the information on the applications that the intended use of the water is to commingle the cold water with the low temperature geothermal water proposed on the other two applications. Based on the intent of section 42-233, Idaho Code, as described below, it does not appear logical to consider the applications other than together.

While the wells proposed on applications 47-8039 and 47-8040 are not within the boundaries of the moratorium area created by order of the department in connection with the College of Southern Idaho law suit, the applications are immediately adjacent to the boundary of the moratorium area and are within the boundaries of the Twin Falls Ground Water Management area. Due to the proposed location of the wells, the applicant needs to provide evidence to show that there will be minimum effect or no effect upon other existing rights which utilize the low temperature geothermal resource. This showing perhaps can be accomplished through the method of well construction, reinjection of the water or other means.

Section 42-233, Idaho Code, requires that low temperature geothermal water be used primarily for its heat value and that use of the water primarily for reasons other than heat is not a beneficial use of the resource. I recognize that the applications each show heating as a use. The information that needs to be provided, however, for further

47-8039

consideration of the applications is a general description of the planned operation. Such a description should include analysis of the relative volumes and temperatures as related to the sequence of uses proposed and intermingling of water.

As you know, Section 42-233, Idaho Code, requires the submittal of a bond in an amount determined by the director prior to construction, modification or deepening of any low temperature geothermal well. Section 42-235, Idaho Code, also requires the submittal of a drilling permit for each well.

Please provide the above requested information in order that the department can further consider the applications.

Sincerely,

L. GLEN SAXTON
Chief, Operations Bureau

David Millard

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

1. Name of applicant David R. Millard dba Crystal Springs Ranch Phone 206-631-1407
Post office address 22627 152nd SE Kent, WA 98042

2. Source of water supply Groundwater which is a tributary of _____

3. Location of point of diversion is SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of SE $\frac{1}{4}$, Govt. Lot _____
Sec. 12 Township 9S Range 15E B.M. Twin Falls County; additional
points of diversion if any: _____

4. Water will be used for the following purposes:

Amount 3.0cfs for Commercial purposes from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum) (Greenhouse)

Amount 3.0cfs for Fish purposes from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount 3.0 for Heating purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated is (a) 3.0 cfs and/or (b) _____
cubic feet per second acre feet per annum

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. Well, ditch and pipeline

b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total
reservoir capacity _____ acre-feet; period of year when water will be diverted to storage:
_____ to _____ inclusive.

c. Proposed well diameter is 12 inches; proposed depth of well is 1500 feet.

d. Is ground water with a temperature of greater than 90°F being sought? Yes

7. Time required for the completion of the works and application of the water to the proposed beneficial use is
5 years (minimum 1 year).

47-8039

8. Description of proposed uses (if irrigation only, go to item 9):

- Hydropower; show total feet of head and proposed capacity in KW. _____
- Stockwatering; list number and kind of livestock. _____
- Municipal; show name of municipality. _____
- Domestic; show number of households. _____
- Other; describe fully. Commercial greenhouse heating, and then mix with cold water for catfish production

9. Description of place of use:

- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- If water is used for other purposes, place a symbol of the use (example: *D* for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
9S	15E	12															C		
																	H		
																	G		

Total number of acres to be irrigated _____

10. Describe any other water rights used for the same purposes as described above. _____

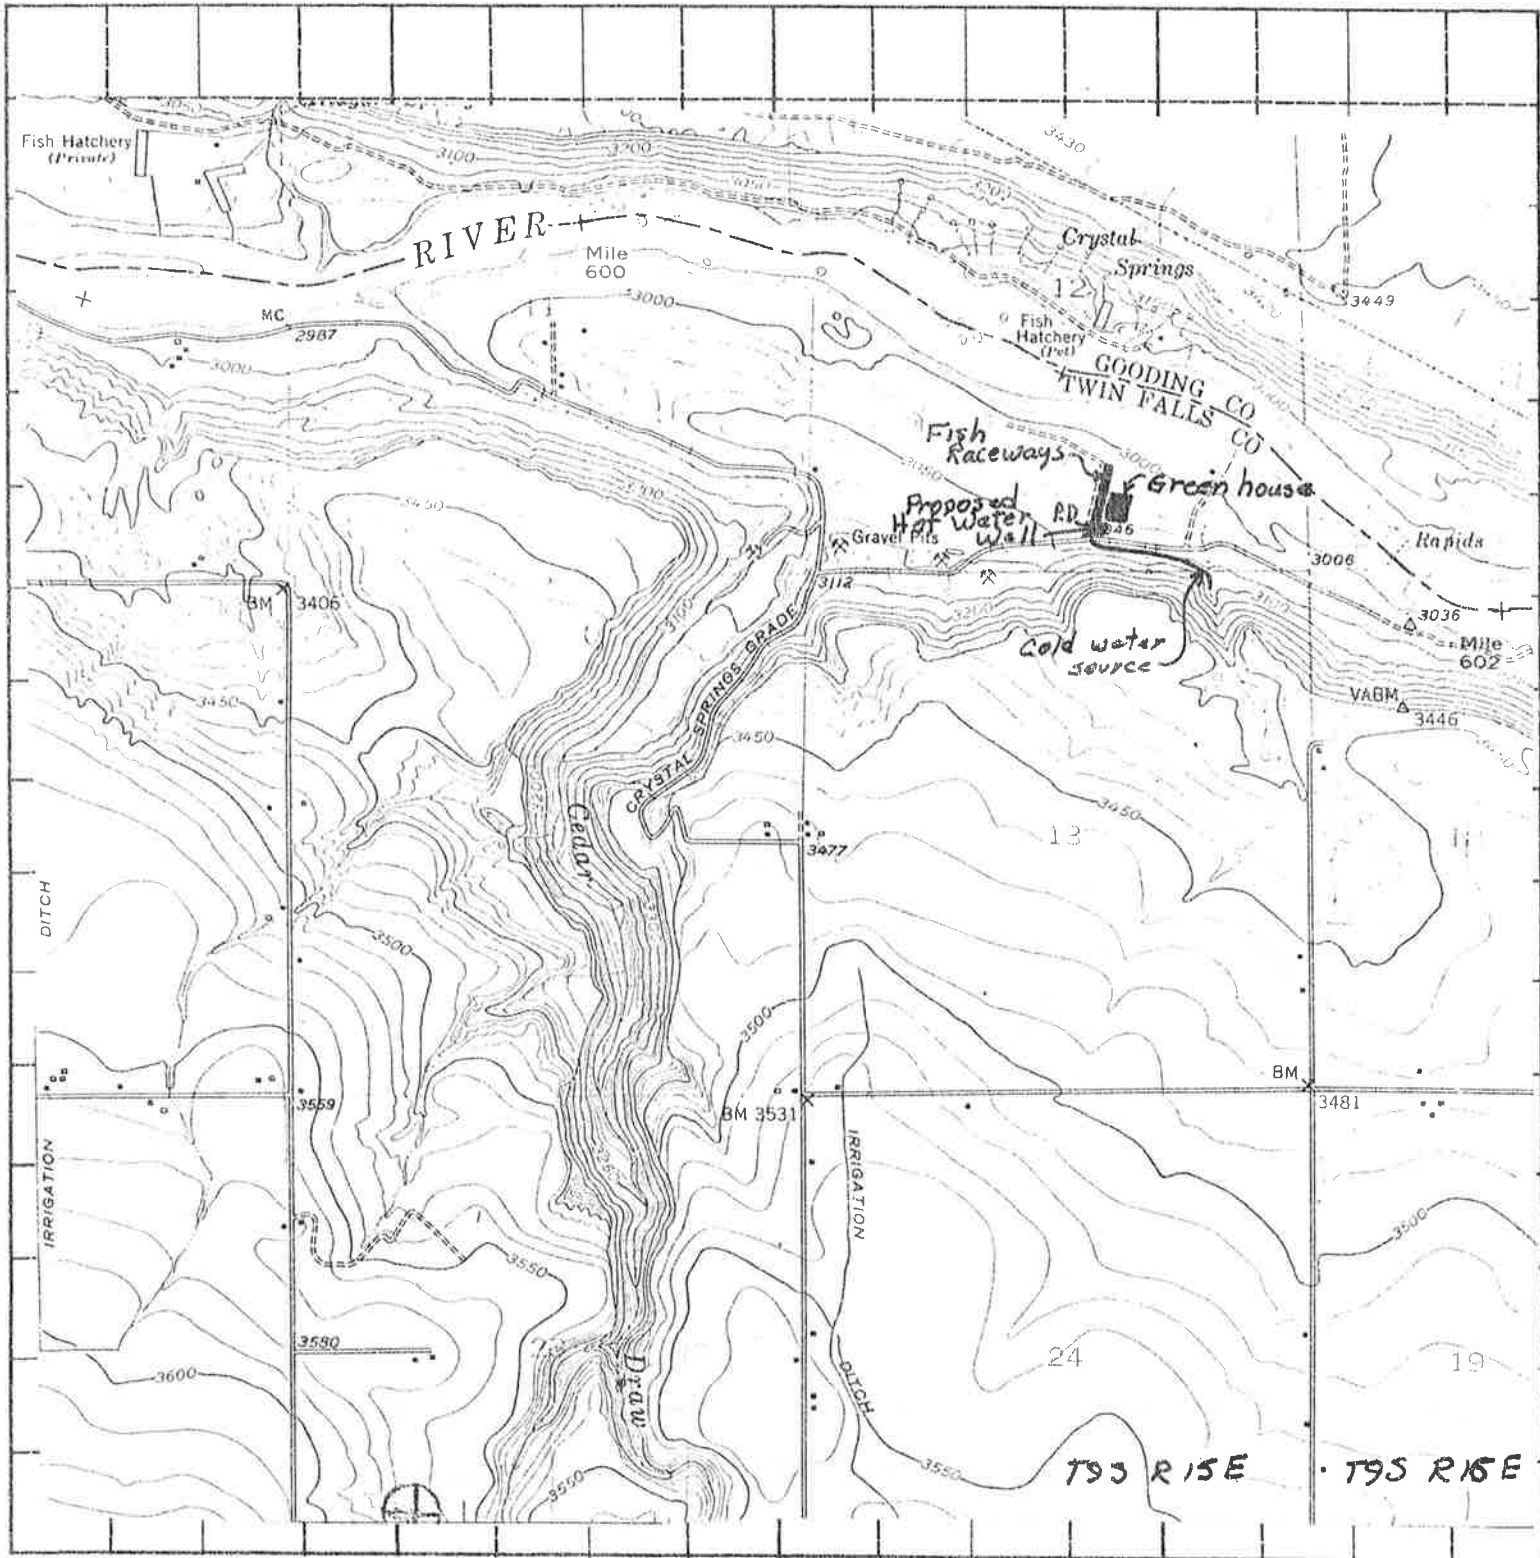

11. a. Who owns the property at the point of diversion? Applicant

b. Who owns the land to be irrigated or place of use? Applicant

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing. _____

12. Remarks: _____

13. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile.

BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. _____, and said application is hereby _____.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before _____, 19 ____.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.
