This application proposes the diversion and use of water from a tributary of the Salmon Wild & Scenic River. The decreed minimum stream flow rights for the federal Wild & Scenic Rivers are subordinate to certain categories of water use and to specific amounts of water use established after the minimum stream flow. The water use proposed in this application will benefit from the subordination provision because the diversion rate and acres will be applied to the subordination amounts specified in the decree for the Wild & Scenic River listed above.

Permits will be subject to all prior water rights. For additional information concerning the property location, contact the Western office at (208)334-2190; or for a full description of the right(s), please see <https://idwr.idaho.gov/apps/ExtSearch/WRAApplicationResults/>. Protests may be submitted based on the criteria of Idaho Code § 42-203A. Any protest against the approval of this application must be filed with the Director, Dept. of Water Resources, Western Region, 2735 W AIRPORT WAY, BOISE ID 83705-5082 together with a protest fee of \$25.00 for each application on or before 8/24/2020. The protestant must also send a copy of the protest to the applicant.

RE: Application for Permit

On 6/22/2020, the Department of Water Resource (Department) received an application for permit in the name of Paul & Gayle Poorman. The application proposed diverting 0.20 cfs divided equally between four points of diversion (POD). Each POD will deliver irrigation water to a distinct place of use (POU) totaling 12.25 acres of irrigated land. The Department decided to process Poorman's filing as four separate applications- each describing one of the four proposed irrigation areas.

The filed application was separated into four applications as follows:

67-15358:	<i>POD – T15N R03W SEC22 NWNE – 0.05 cfs</i> <i>POU – T15N R03W SEC22 NWNE – 2 acres</i>
67-15359:	<i>POD – T15N R03W SEC22 NENE – 0.05 cfs</i> <i>POU – T15N R03W SEC22 NENE – 4.5 acres</i>

Re: Application for Permit Nos. 67-15358 – 67-15361

Dear Applicant:

On 6/22/2020 the Department of Water Resources (Department) received your application for permit for irrigation uses. Based on the nature of your proposal, the Department has decided to split your application into four separate water right applications- one application describing each of your four irrigation locations.

You filed application for new water rights from a regulated source within the Weiser River Water District. Regulated sources include tributary surface water and tributary shallow ground water (ground water above the first confining layer in the aquifer). If approved, your application would be a junior water right.

The Weiser River watermaster regularly curtails junior water rights by June 15 each year. This is necessary under Idaho law to protect senior water rights when the water supply is not adequate to fill all rights at the same time.

This means your application, if approved, would include a condition of approval automatically curtailing your new use by June 15 of each year. This condition of approval balances protection of senior water rights with promotion of the maximum economic benefit of water resources.

To determine if you want to proceed with your application based on the above explanation, please complete and return the enclosed questionnaire. Your written reply must be received within the next thirty (30) days. Failure to make a timely response will cause your application to be voided. A refund of the application fee cannot be issued for a voided application.

More information about water rights and other matters administered by IDWR is available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 or anna.kaiser@idwr.idaho.gov if you have any questions.

Sincerely,

Anna Kaiser
