Re: Water Supply Bank Lease Application 1610

Purpose/Narrative: An application was received January 9, 2020 offering the full portion of water right 37-23215 for lease to the Bank. The applications were submitted by Mr and Ms. Leavell, requesting only a two year duration through the end of 2021. This right, similar to the other two applications submitted by Mr. Leavell, is a split of a larger right in an area being developed into what appears to be a subdivision. The parent right, 37-22166 was split into several smaller portions with two of those portions being split again to develop 37-23208 & 37-23210 which are directly above this right. A recent transfer of the three rights moved them to their current place of use, it was indicated by the applicant that this area has never received ground water. The lease is intended to prevent the comingling of the groundwater such that the right remains primary, possibly for future development.

Authority to File: The applications were prepared on behalf of Mr. and Ms. Leavell by Brockway Engineering. Review of IDWR records indicate The Levalls are both the current water right holder and land owners. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: review of the WMIS records for the place of use, in conjunction with climate engine suggests that there has in fact been irrigation. Per the transfer and information provided, the place of use the right has been moved to has not been irrigated with ground water and this lease seeks to keep them separate. No concerns of water right validity.

Injury Evaluation: No injury is apparent through the lease, review of the past usage may be necessary to determine the amount rentable.

Enlargement of Use: No enlargement through the lease alone as the applicant has indicated the ground water and surface water have remained separate. The acreage will continue to receive irrigation from canal shares however, as they have not been stacked, the right can be leased separately.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster for district 37 & 130, along with IDWR's Southern Region comments were requested January 29, 2020

Water Supply Bank Evaluation: Based on the information presented by the applicant, staff recommend the application be approved.

Re: Water Supply Bank Lease

Dear Remington,

Lonnie Leavell desires to lease three water rights (37-23208, 37-23210 and 37-23215) into the Idaho Water Supply Bank for the 2020 and 2021 irrigation seasons. These three water rights were involved in the recently approved Transfer #83718. These three water rights are primary ground water rights that have never been combined with canal water. The location in which these three water rights were transferred too, has been historically irrigated with canal shares. These lease applications are to help insure that these three water rights remain primary ground water rights.

Water right 37-23208 is allowed a diversion rate 0.02 cfs, an annual volume of 4.0 acre feet and the irrigation of 1.0 acres. Water right 37-23210 is allowed a diversion rate 0.03 cfs, an annual volume of 6.0 acre feet and the irrigation of 1.5 acres. Water right 37-23215 is allowed a diversion rate 0.01 cfs, an annual volume of 3.2 acre feet and the irrigation of 0.8 acres.

Sincerely,

Greg Sullivan, Engineer M.S.
