BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

SEP 25 1989

Department of Water Resources Southern Region Office

IN THE MATTER OF PERMIT NO. 47-7751, IN THE NAME OF MESA BUTTE RANCH

CONTINUATION ORDER

This matter having come before the Idaho Department of Water Resources (IDWR) as a requirement of Section 42-203D, Idaho Code, the Department Finds, Concludes and Orders as follows:

FINDINGS OF FACT

1. Section 42-203D, Idaho Code, directs IDWR to review all permits issued prior to July 1, 1985, located within the Swan Falls Trust Water Area, to determine if water was beneficially used prior to said date.

2. If water was not beneficially used until after July 1, 1985, Section 42-203D further directs IDWR to review the permit under the provisions of Section 42-203C, Idaho Code.

3. Section 42-203C requires IDWR to determine whether diversion of water under a permit issued prior to July 1, 1985, causes a significant reduction of trust water available for power production and, if there is a significant reduction, to determine whether the reduction is in the public interest.

4. Permit No. 47-7751 (permit) was issued to Mesa Butte Ranch (permit holder) authorizing the diversion of 0.20 cfs of groundwater for irrigation of 10 acres.

5. Information submitted by the permit holder shows that the irrigation of the 10 acres authorized under this permit did not occur prior to July 1, 1985.

6. The development and use of groundwater authorized under this permit does not cause a significant reduction of trust water.

CONCLUSIONS OF LAW

1. The water authorized for diversion under Permit No. 47-7751 is trust water.

2. The use of water under the permit satisfies the provisions of Sections 42-203C and 42-203D, Idaho Code.

3. An order continuing the permit shall be issued.

ORDER

IT IS HEREBY ORDERED that Permit No. 47-7751 is valid and may CONTINUE as provided in Section 42-203D, Idaho Code, subject to the following additional conditions and limitations:

1. Proof of construction of works and application of water to beneficial use shall be submitted to IDWR on or before October 1, 1990.

2. The use of trust water authorized by this right is subject to review 20 years after the date of this order to determine availability of trust water and to reevaluate the public interest.

3. Diversion and use of trust water under this right is subject to an annual use fee if rules are subsequently promulgated which provide for the submittal of the fee.

4. The Director retains jurisdiction of this right to change, add or remove any requirement as determined to be appropriate.

Order - Page 2

5. All conditions of approval contained on the permit are

incorporated into and made part of this order. Dated this _ , 1989. day of L. GLEN SAXTON, Chief Water Allocation Bureau

Mesa Butte Ranch c/o Albert Munk Rt. 3 Buhl, ID 83316

Gentlemen:

Re: Permit No. 47-7751 and 47-7752

The Department has recently received inquiries from water right permit holders in the Twin Falls area relative to development or continued development of their projects seeking to use the warm groundwater resource in the area. In addition, the Department recently noticed an editorial in the <u>Times</u> <u>News</u> urging taxpayer support for a swimming pool bond issue.

The Department would like to call to the attention of undeveloped water right permit holders as well as to others in the area that there are potential resource problems that should be carefully considered in the decision to proceed with development.

In direct response to reports of declining pressures and temperatures from the warm water resource in the area, on January 11, 1984 the Department created the Twin Falls Groundwater Management Area. The area is roughly described as extending from Salmon Falls Creek on the western boundary to the Kimberly area on the east. The northern boundary is approximately the location of the Snake River and extends southerly averaging from 5 to 15 miles in depth.

A groundwater management area (GWMA) is defined as any groundwater basin or part thereof which may be approaching the conditions of a critical ground water area. Applications for permit in a GWMA may only be approved after it has been determined on an individual basis that sufficient water is available and that other right holders will not be injured. The Director of the Department of Water Resources is also authorized by statute to require water right holders in a GWMA to report withdrawals of ground water and other information for the purpose of assisting him in determining available ground water supplies and their usage. The Department has in fact monitored and will continue to monitor select wells for pressure and temperature with the express intent of future management and/or regulation of the resource if appropriate. Depending on the findings of the monitoring, it is possible that the Department would limit withdrawal of water from the resource, require reinjection of water diverted for various permitted uses or impose other regulatory criteria. The Department has recently ordered the owners of a well in the area to repair the well in order that flow may be adequately controlled.

With the monitoring data gathered so far by the Department, it is premature to predict what, if any, action the Department may pursue; however, it would only be prudent for undeveloped water right permit holders to carefully consider their potential investment before making a commitment.

Data gathered from the monitoring effort may be reviewed at the Department's regional office in Twin Falls or in the state office in Boise.

Sincerely,

NORMAN C. YOUNG, Administrator Administration Resource Division

Gentlemen:

Re: Permit No. 47-7751

The department has reviewed the request for extension of time submitted in connection with the above referenced permit. The department will hold the request without action until the permit is reprocessed in compliance with the provisions of Sec. 42-203D, <u>Idaho Code</u>. Upon completion of reprocessing, an appropriate development period will be granted if the permit is to be continued.

Please feel free to contact this office if you have any questions.

Sincerely,

J. Blue Sayton

Re: Water rights for Albert Munk.

Dear Mr. Melanson:

Enclosed is a copy of water right claim No. 47-4048 which evidences a water right appurtenant to the Munk property as described in your request of Aug. 30, 1984.

The Munks also hold groundwater permit No. 47-7751 for irrigation, commercial, heating, and fish propagation on the same property.

If you have any further questions, please contact this office.

Very truly yours,

Loren O. Holmes Southern Region Supervisor

Re: Water rights for Albert Munk

Dear Sirs:

I represent Albert Munk and Juanita Munk who own the following described real property in Twin Falls County:

Township 9 South, Range 14 East, Boise Meridian, Section 27: NW\%NW\% Section 28: That part of the NE\%NE\% lying north of Mud Creek and East of the roadway.

There is a dispute between the Munks and their neighbors to the immediate east as to the use of waters of Wilson Creek. There is, apparently, a ditch from Wilson Creek which runs across Munk's property and to the property of the neighbors. The neighbors have objected to the Munks use of water from the ditch.

I would appreciate it if you could provide information regarding the water rights appurtenant to the property owned by Mr. and Mrs. Munk. Thank you very much for your help in this matter.

Sincerely yours,

hulcours

JOHN M. MELANSON

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State 47-7751 , and said application is hereby APPROVED of Idaho No.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or be-

April 1 , **19**<u>87</u>. fore

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

An access port or other device as specified by the Department shall be d. Other: installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Water used under this permit if discharged into a natural channel shall

meet Idaho Water Quality Standards. This permit is subject to the provisions of Sections 42-205 through 42-210, <u>Idaho Code</u>, restricting the sale, transfer, assignment, or mortgage of this permit. Failure to comply with these provisions is cause for immediate cancellation of this permit.

Use of water under this permit may be affected by an agreement between the protestant and the applicant.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

> th Witness my hand this \mathcal{ZB} day of April, 1982.

Operations Burea
