RE: Permit 47-7677 - Request for Extension of Time

Gentlemen:

This office has reviewed the request for extension of time you submitted in connection with the above referenced permit.

The permit was issued for 9.0 cfs for diversion and use of water from a surface water source for power generation purposes. Based on the information provided on the request for extension of time, it does not appear that work has been accomplished in connection with diversion and use of water for power generation purposes as authorized by the permit. For this reason, the request cannot be approved as submitted.

If you have evidence to show that you have pursued the power development, please provide it to the Department within thirty (30) days. If suitable information is not received within this time period, the request for extension of time will be denied. The Idaho Code does not allow the Department to consider lack of financial resources to be an acceptable reason for lack of project development and completion.

Please feel free to contact the Department if you have questions.

Sincerely,

GLEN SAXTON, Chief

Operations Bureau
