7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
13. Place of use is located within Lot 1A, Blk 2, Zinc Spur Ranch Subdivision #4.
14. Diversion of ground water is limited to those times water is available for diversion under this right and priority from the Big Wood River.

Memorandum

To: Water Rights 37-22888, 37-22889, & 37-22914

From: Justin Ferguson

Date: January 3, 2020

Re: Water Supply Bank Lease Application 1579

Purpose/Narrative: An application offering portions of water rights 37-22888, 37-22889, & 37-22914 was received by the Department December 26, 2019 on behalf of Ms. Lynn Campion. The applicant is proposing to lease into the Bank the same irrigation use portions of these three water rights, which were previously leased to the Bank from 2015 through 2019. All three water rights authorize irrigation of 27.4 acres in the SESW QQ of T03N R18E, Sec 29, while water rights 22888 and 22889 also authorize irrigation of an additional 10 acres in the NESW QQ of T03N R18E, Sec 29. There applicant also possesses a fourth water right, 37-8485, that also authorizes irrigation of 3.0 acres within the 27.4 acres of the SESQ QQ of T03N R18E, Sec 29 however, it is not being offered for lease. This lease proposal includes the irrigation of 15.0 acres in the SESW QQ, which leaves available for irrigation 17.4 acres in that QQ, meaning water right 37-8485 can be fully used for the irrigation of 3.0 acres without a water use enlargement occurring.

Authority to File: The applications were submitted and signed by Ms. Campion. IDWR records indicates she is the current water right holder. The land authorized to be irrigated is owned by Lynn Campion as well as the Campion Daughters Trust. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The parent rights for these three water rights were decreed through the SRBA in 2010 (for right nos. 37-22888 and 37-22889) and 2015 (for right no. 37-22914). A 2015 transfer (no. 79235) split the three parent rights into the portions that Ms. Campion has offered to the Bank. The portions now proposed for lease to the Bank were previously leased to the Bank from 2015-2019. As such, four years of non-use may have elapsed under water rights 37-22888 and 37-22889, however no non-use would seem to have occurred under water right 37-22194. No concerns about water right validity.

Injury Evaluation: No injury is apparent through the lease, Ms. Campion has requested to leave portions of these rights out of the Bank such that irrigation can continue. Proper rental review should protect against injury.

Enlargement of Use: At this time it appears that there is not an enlargement through the lease. Ms. Campion will continue to use portions of the rights for irrigation however, a limit will be placed on the unleased portions such that the combined limits are preserved. There is a fourth right overlapping the combined place of use but its use will be restricted and its acres have not been offered as they overlap with a portion Ms. Campion wishes to continue irrigating.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster for district 37 and IDWR Southern Region comments will be requested.

Water Supply Bank Evaluation: Based on the information presented by the applicant, staff recommend the application be approved.
