RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
10. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
11. Prior to diversion of water under this rental agreement, the renter shall install a lockable device, subject to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion.
12. When notified by the Department, the renter shall install and maintain a measuring device of a type acceptable to the Department as part of the diverting works.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-8031	irrigation	0.03 cfs	3.0 AF	1.0 AC		0.03 cfs	3.0 AF	1.0 AC
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.03 cfs	3.0 AF	1.0 AC
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Memorandum

To: Water Right 37-8031
From: Justin Ferguson
Date: March 9, 2020
Re: Water Supply Bank Rental Proposal

Purpose/Narrative: An application was received as part of a lease/rental package from Helen Spalding on behalf of the Spalding Revocable Trust. The application is a continuation of their previous rentals using these same rights from 2016, 2017, & 2019. While there appears to be an agreement between the HOA and Spaulding Revocable Trust, it was not stated that the rental would be for admin fees only. Per the application information appears the lease is only a private agreement such to facilitate a rental for the Spalding Trust. Review of the place of use indicates that there are no other rights and per the application the Trust has not been able to locate and transfer a water right to the acreage.

Authority to File: The application was submitted by Jim Speck as the representative for the Trust, the applications were signed by Ms. Helen Spalding as an agent for the Trust. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The requested water right is valid and leased to the Bank for a single year as part of the lease/rental package. No concerns at this time.

Injury Evaluation: No injury is apparent through the rental as the water will remain within the Big Wood Ground Water Management Area.

Enlargement of Use: No enlargement is evident through the rental, there are no other irrigation water rights associated with the acreage. There is a domestic right located around the primary residence however, this area will be in addition to the 0.5 acre exemption.

Local Public Interest: Sustainable management of water throughout this basin is in the local public interest. As such, comments will be requested from the staff of Water District 37, and IDWR's Southern Region office.

Beneficial Use/Conservation of Water Resources: The beneficial use of irrigation is consistent with the conservation of water throughout the State of Idaho.

Department/Watermaster Comments: Water District 37 and IDWR Southern Region comments were requested March 9, 2020

Water Supply Bank Evaluation: Subject to favorable water district and regional office comments, it is recommended this rental be approved.
