Response to Question 6a. for Application for Transfer of Water Right – Point(s) of Diversion.

Intake System for Water Right License 86-07324

The intake pump station has four (4) vertical turbine (VT) pumps and have the following capacity(ies) when on alone:

P-1: 75 hp VT pump – 4,300 gpm (6.2 mgd) and is equipped with across the line starter for constant speed operation

P-2: 75 hp VT pump – 4,800 gpm (6.9 mgd) and is equipped with across the line starter for constant speed operation

P-3: 125 hp VT pump – 6,700 gpm (9.6 mgd) and is equipped variable frequency drives at 60Hz

P-4: 125 hp VT pump – 6,800 gpm (9.8 mgd) and is equipped variable frequency drives at 60Hz

The intake building facility consists of a rectangular steel support framing system around the intake structure starting down at the foundation level, and extending up to the floor system where the steel floor framing system provides an overall pump station foot print o be 26 feet by 12 feet. A metal insulated building and roof structure is constructed over all four pumps and equipped with four roof scuttles for access to the VT pumps. The building provides security to the pumps and associated infrastructure. Included in the infrastructure are measuring devices and lockable controls.

The pump station is equipped with a DEG backup power system; the generator is a 200kw (250kVA) 480 VAC/3/60 unit that is capable of running one large pump and one small pump at the same time. It is equipped with a 383-gallon diesel fuel tank.

Raw water is conveyed from the site to the water plant via a 30-inch inside diameter concrete cylinder pipe (CCP) of about 2.3 miles in length that was installed in 197. (see attached map)

MEMORANDUM

To: Application for Transfer of Water Right No. 84203

From: Adam Frederick AF

Date: 7/6/2020

Re: Application for Transfer of Water Right.

Original transfer application, received on March 3, 2020, identified the incorrect source and did not have an approvable map. A corrected application was received on June 22, 2020 which properly identified the source and had an approvable map. The corrected application had a typing error on two of the water rights that identified them in basin 84 instead of basin 86. Because the original application and proof reports identified the proper rights (86-4034 A & 86-4034 B), there is no need for a corrected application.

Re: Legal Notice Remarks

This transfer proposes to correct the City of Lewiston's surface water rights 86-4034 A, 86-4034 B, and 86-7090 to show the correct location and number of points of diversions.
