WATER RESOURCES  
WESTERN REGIONSTATE OF IDAHO  
DEPARTMENT OF WATER RESOURCESTransfer No. 84173**MINIMUM REQUIREMENTS CHECKLIST**  
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at [idwr.idaho.gov](http://idwr.idaho.gov).

Name of Applicant(s) Nampa & Meridian Irrigation DistrictCheck whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.Yes ☐ N/A ☐ \* Means the item is always required and must be included with the application.

- ☒ \* Completed Application for Transfer of Water Right form, Part 1.
- ☒ \* Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ \* Application for Transfer Part 2A. Attach a [Part 2A](#) report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer [Part 2B](#) for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ \* Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ \* Correct fee submitted with transfer application form. ([Fee schedule](#) is on website and instructions for application for transfer.)

**Attachments to Application** - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. \*\*
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). \*\*  
\*\* Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at [idwr.idaho.gov/water-rights/transfers/resources.html](http://idwr.idaho.gov/water-rights/transfers/resources.html).
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ \* #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☐ ☒ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System ([GIS](#)) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☒ ☐ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see [fee schedule](#).
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. ([Attachment WSB](#))
- ☐ ☒ #10 Other. Please describe: \_\_\_\_\_

STATE OF IDAHO  
DEPARTMENT OF WATER RESOURCES

## APPLICATION FOR TRANSFER OF WATER RIGHT PART 1

Name of Applicant(s) Nampa & Meridian Irrigation District Phone 208-629-7447  
Mailing address c/o Bryce Farris, Sawtooth Law Offices PLLC, PO Box 7985, Boise, ID 83707 Email bryce@sawtoothlaw.com

- ☐ If applicant is not an individual and not registered to do business in the State of Idaho, attach documentation identifying officers authorized to sign or act on behalf of the applicant. Label it **Attachment #1**.
- ☐ Attach water right ownership documentation if Department records do not show the transfer applicant as the current water right owner. Label it **Attachment #2a**.
- ☐ If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). Label it **Attachment #2b**.
- ☐ Attach documentation of authority to make the proposed change if the applicant is not the water right owner. Label it **Attachment #3**.

Provide contact information below if a consultant, attorney, or any other person is representing the applicant in this transfer process.

☐ No Representative

Name of Representative Bryce Farris, Sawtooth Law Offices PLLC Phone 208-629-7447  
Mailing address PO Box 7985, Boise, ID 83707 Email bryce@sawtoothlaw.com

☒ Send all correspondence for this application to the representative and not to the applicant.

OR

☐ Send original correspondence to the applicant and copies to the representative.

☒ The representative may submit information for the applicant but is not authorized to sign for the applicant.

OR

☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation providing authority to sign for the applicant and label it **Attachment #4**.

I hereby assert that no one will be injured by the proposed changes and that the proposed changes do not constitute an enlargement in use of the original right(s). The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Will Patterson  
Signature of Applicant or Authorized Representative

Will Patterson - Board Pres. 5 May 20  
Print Name and Title if applicable Date

Daren R. Coon  
Signature of Applicant or Authorized Representative

Daren R. Coon Sec. - Treas. 5 May 20  
Print Name and Title if applicable Date

### A. PURPOSE OF TRANSFER

- ☐ Change point of diversion      ☐ Add diversion point(s)      ☐ Change place of use  
☒ Change nature of use      ☒ Change period of use      ☐ Other \_\_\_\_\_
- Is this a transfer for changes pursuant to Idaho Code § 42-221.O.8?  
If yes, ☐ attach an explanation and any supporting documentation labeled as **Part 1A.2**.
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.3**.  
See attached Part 1A.3

**B. DESCRIPTION OF RIGHTS AFTER THE REQUESTED CHANGES. IF THE RIGHTS ARE BEING SPLIT, DESCRIBE PORTIONS TO BE CHANGED AS THEY WOULD APPEAR AFTER THE REQUESTED CHANGES.**

☒ No changes to point(s) of diversion are proposed - the following chart is therefore not completed. (Proceed to #4.)  
☐ Attach Eastern Snake Plain Aquifer analysis if this transfer proposes to change a point of diversion affecting the ESPA. Label it **Attachment #5**.

☒ No changes to place of use are proposed - the following chart is therefore not completed. (Proceed to #5.)

**Total Acres** (for irrigation use)

STATE OF IDAHO  
DEPARTMENT OF WATER RESOURCES

## APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

No changes to the existing diversion system are proposed. Measuring devices and lockable controlling works have been accommodated.

- b. Who owns the property at the point(s) of diversion? No changes proposed

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: \_\_\_\_\_

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

n/a

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

Associated Ridenbaugh natural flow rights 63-30181 & 63-198AJ for irrigation use.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

- ☐ ☒ undergone a period of five or more consecutive years of non-use,  
☐ ☒ currently leased to the Water Supply Bank,  
☐ ☒ currently used in a mitigation plan limiting the use of water under the right, or  
☐ ☒ currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe:

Total Acres: 69495

Place of Use: INDUSTRIAL same as IRRIGATION

Place of Use: GROUND WATER RECHARGE same as IRRIGATION

**Conditions of Approval:**

1. The place of use for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.
2. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
3. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.0156 cfs/acre.
4. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
5. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
6. The annual volume of water used for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
7. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

8. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
9. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
10. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
11. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of .72 cfs.
12. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
13. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
14. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.
15. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
16. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.
17. 135 The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.
18. SD1 This right originated as all or part of right no. 67 in the Stewart Decree and the historic Boise River Water Masters records.
19. 127 Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
20. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
21. Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.

Page \_\_\_\_\_ of \_\_\_\_\_

22. This right when combined with Right Nos. 63-198AJ, 63-200B, 63-2392B, 63-2968, 63-30181 and 63-32695 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.

Total Acres: 69495

Place of Use: INDUSTRIAL same as IRRIGATION

Place of Use: GROUND WATER RECHARGE same as IRRIGATION

**Conditions of Approval:**

1. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
2. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
3. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
4. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.
5. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
6. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
7. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Page \_\_\_\_\_ of \_\_\_\_\_

8. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
9. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. The place of use for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.
11. Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.
12. This right when combined with Right Nos. 63-198AJ, 63-199B, 63-2392B, 63-2968, 63-30181 and 63-32695 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.
13. SD1 This right originated as all or part of right no. 106 in the Stewart Decree and the historic Boise River Water Masters records.
14. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
15. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
16. 127 Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
17. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and tributaries.
18. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.0156 cfs/acre.
19. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.
20. 135 The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

Page \_\_\_\_\_ of \_\_\_\_\_

21. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.
22. The annual volume of water used for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.

Decreed Date: 3/30/2011

**DEPARTMENT OF WATER RESOURCES**

# APPLICATION FOR TRANSFER OF WATER RIGHT

## PART 3

**A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)**

- ☒ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☐ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

### B. CHANGES IN NATURE OF USE (Water Balance)

- ☒ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

### C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information required on Part 3B above:

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper appears to be a standard notebook page.

### Transfer Narrative, Part 1A.3

Micron Technology Inc. (Micron) and J.R. Simplot Company annexed 1300 acres into Nampa & Meridian Irrigation District (NMID) in 1998; Micron annexed 870 acres and Simplot annexed 430 acres. The total flow rate apportioned to the 1300 acres in 1998 was 20.34 cfs (0.0156 cfs/ac).

As part of the annexation, a transfer application was required and filed on NMID natural flow water rights. The resulting transfer approval (No. 5273) changed the nature of use of 2 cfs from irrigation to industrial and 8 cfs from irrigation to recharge. This change was not additive with irrigation (i.e., the irrigation flow rate for the entire NMID portfolio did not decrease). Instead, the NMID water rights were conditioned as follows to prevent enlargement.

- *Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.*
- *The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.*
- *The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.0156 cfs/acre.*
- *Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.*
- *Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.*

NMID has recently agreed to modify 1998 agreement to increase the apportionment of benefits to the 1300 Micron/Simplot acres from 20.34 cfs to 26.00 cfs. NMID also proposes to increase the total rates allocated to industrial use from 2 cfs to 5 cfs and recharge use from 8 cfs to 16 cfs. The amounts of individual rights to be changed are listed in Table 1 below.

Table 1: Current and Proposed Flow Rates

| Right Number | Priority Date | Total (cfs) | Current          |                  |                | Proposed         |                  |                |
|--------------|---------------|-------------|------------------|------------------|----------------|------------------|------------------|----------------|
|              |               |             | Irrigation (cfs) | Industrial (cfs) | Recharge (cfs) | Irrigation (cfs) | Industrial (cfs) | Recharge (cfs) |
| 63-120F      | 6/1/1864      | 0.4         | 0.4              | 0.00             | 0.00           | 0.40             | 0.00             | 0.00           |
| 63-198Q      | 6/1/1877      | 0.4         | 0.4              | 0.00             | 0.00           | 0.40             | 0.00             | 0.00           |
| 63-199B      | 5/1/1878      | 169.6       | 169.6            | 0.64             | 2.56           | 169.60           | 1.60             | 5.11           |
| 63-200B      | 8/20/1888     | 361.94      | 361.94           | 1.36             | 5.44           | 361.94           | 3.40             | 10.89          |
|              |               | 532.34      | 532.34           | 2.00             | 8.00           | 532.34           | 5.00             | 16.00          |

The currently authorized places of use and points of diversion are not proposed for change; only the flow rate amounts currently allocated to industrial and groundwater recharge uses. As a result of this transfer, the transfer rights and associated rights contain the following conditions that will need to be modified as follows:

- The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of ~~0.0156~~ 0.020 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.*
- The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by ~~0.0156~~ 0.020 cfs per acre.*

**Propose:** Change the flow rate from 0.0156 cfs per acre to 0.020 cfs per acre

- The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of ~~20.34~~ 26.00 cfs.*

**Propose:** Change the flow rate from 20.34 cfs to 26.0 cfs

**Period of Use.** The transfer also proposes to change the period of use of the rights to March 1 through November 15.

Currently the irrigation and ground water recharge portions of water right 63-199B have a period of use from March 1 through November 15 while the industrial portion has a season of use of March 15 through November 15. All of water right 63-200B has a season of use from March 15 through November 15. The proposed period of use provides a consistent season of use under both 63-199B and 63-200B.

According to Application Processing Memo #52, it appears that it possible to change the season of use to the standard season, which is March 1 to November 15 in the Treasure Valley. Specifically, Memo #52 says

“For a transfer of a license or decreed water right, the transfer approval should retain the licensed or decreed season. However, when the new standard season is longer than the licensed or decreed season, an approval condition like the following may be added:

The period of use of the irrigation described in this approval may be extended to a beginning date of new standard and an ending date of new standard provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before new standard and after new standard is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.”

NMID will accept an approval condition similar to the condition above for the industrial use under 63-199B and for all uses under 63-200B.

## **Attachment 8a – Water Balance**

The water rights proposed for change have historically been used for irrigation of agricultural crops within the Treasure Valley. The water is fully diverted to the extent it is available, and must be supplemented with storage water to provide a full season of irrigation.

There will be no increase in consumptive use as part of this transfer.

- The proposed industrial use will be at Micron Technology, Inc (Micron). At Micron, industrial water is utilized for manufacturing of semiconductor products after which the water is pre-treated and discharged to the City of Boise municipal wastewater system. The City of Boise discharges the treated wastewater to the Boise River. Estimated consumptive use of industrial water at Micron is less than 20 percent.
- The proposed groundwater recharge use is non-consumptive. The recharged groundwater is eventually diverted under Micron decreed and licensed groundwater rights to be used for industrial purposes and then discharged to the City of Boise municipal wastewater system. As previously noted, the estimated consumptive use of industrial water at Micron is less than 20 percent.

**RE: Transfer No. 84173**  
**Water Right No(s). 63-199B, 63-200B**

Dear Applicant(s):

The Department of Water Resources has received your water right transfer application. Please refer to the transfer number referenced above in all future correspondence regarding this transfer.

A legal notice of the application has been prepared and is scheduled for publication in the IDAHO STATESMAN, IDAHO WORLD, TIMES NEWS, and LEWISTON TRIBUNE on 7/2/2020 and 7/9/2020 and the POST REGISTER on 7/1/2020 and 7/8/2020. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the approval document.

Please contact this office if you have any questions regarding the application.

Sincerely,

Kensie Thorneycroft  
Administrative Assistant

Gentlemen,

NMID filed a nature of use change to convert 11.00 cfs portion of the water rights from irrigation to industrial and groundwater recharge. A fee of \$1300 was received which covers the 11.00 cfs transfer, but still requires a \$250 nature of use change fee. Review of the file is not fully complete and more info may be required, but I wanted to get this to advertising by the next round which goes out tomorrow and expect that the fee would be paid between now and when we are ready to sign (assuming of course...).

Thank you!

Patrick,

I will get you the additional fee ASAP.

Terry

Subject: Application for Transfer – Nampa & Meridian Irrigation District

Dear Patrick,

On behalf of Nampa & Meridian Irrigation District (NMID), enclosed please find an Application for Transfer of water rights 63-199B and 63-200B. The application seeks to change the nature of use an 11.00 cfs portion of the water rights from irrigation to industrial (3.0 cfs) and groundwater recharge (8.0 cfs). The specifics of the transfer are described in the Transfer Narrative, Part 1A.3. Check No. 015141 for the \$1300 filing fee is included.

Please contact me or NMID Attorney Bryce Farris with any questions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Terry M. Scanlan", is written over a horizontal line.

Terry M. Scanlan, P.E., P.G.
