A new owner for a water right under lease shall supply a W-9. Water rights with multiple owners must specify a designated lessor, using a completed Lessor Designation form. Beginning in the calendar year following an acknowledged change in water right ownership, compensation for any rental will go to the new owner(s).

 o \$100 per *split* water right.
 o No fee is required for pending adjudication claims.
☐ If water right(s) are leased to the Water Supply Bank AND there are multiple owners, a Lessor Designation form is required.

Re: Change in Water Right Ownership: 13-7269 (Split into 13-7269 and 13-8061),

Dear Water Right Holder(s):

The Department of Water Resources (Department) acknowledges the receipt of correspondence changing ownership of a portion of the above referenced water right(s) to you. The Department has modified its records based on the information received and has enclosed a computer-generated report for you.

We are unable to complete an ownership change for water right 13-4088. On January 30, 1979, Delmer Olson filed a claim pursuant to Section 42-243, Idaho Code. This claim was assigned water right number 13-4088. The map prepared by Delmer Olson and included with the claim was vague. We are unable to confirm that any portion of water right 13-4088 is appurtenant to your property. For example, the claim describes five acres of irrigation in the NESE of Section 27, T14S, R40E, but the map highlights the entire quarter-quarter (40 acres). It is not clear where the five acres are located in the 40-acre tract.

At this point, we will refund the filing fee (\$100) associated with water right 13-4088. A check from the state of Idaho should arrive the next two weeks. One way to address the ambiguity would be for you and the other property owners under the claim to file an amended claim with a better map. The amended claim could clarify the location of the twenty acres of irrigation, the domestic uses and the stockwater use described in the claim. Once the claim is amended, you would be able to re-file the ownership change for water right 13-4088.

Your portion of each water right(s) has a specified point of diversion, nature of use and place of use. If you plan to change the authorized point of diversion, nature of use, or place of use, including adding a new point of diversion, you must file an Application for Transfer of Water Right. If you do not plan to change any elements of your water right, then no further action is required at this time.

The portion of the water right retained by the original right holder retains the original water right number. The Department is sending the original right holder a copy of this letter and a computer-generated report showing the changes to the original water right.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing a Notice of Change in Water Right Ownership, the Department does not review the history of water use to determine if the right has been forfeited or deliberately abandoned through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Idaho Code §§ 42-222 and 42-223.

Please note, water right owners are required to report any change of water right ownership and any change of mailing address to the Department within 120 days of the change. Reporting forms are available from any office of the Department, or from the Department's website.

If you have any questions concerning the enclosed information, please contact me at (208) 497-3787.

Sincerely,

Jonie Barg
