BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES RECEIVER

OF THE

STATE OF IDAHO

IN THE MATTER OF PROTEST AGAINST APPROVAL OF APPLICATION FOR PERMIT NO. 47-7571 IN THE NAME OF JOHN M. THOMAS

Department of Water Resources Southern District Of Water Resources

APR 25 1980

AND ORDER

On September 4, 1979, John M. Thomas filed with the Department of Water Resources an application for permit to appropriate the waters of Salmon Falls Creek. The application proposed to divert 8 cubic feet per second of water by pump to storage during the period between September 1 and June 1 and to store 780 acre feet in an off-system reservoir year-round and divert 780 acre feet per year to irrigation use from storage between March 15 to November 15. The water is to be diverted within the SE4NE4, Sec. 20, Twp. 10S, Rge. 13E, Twin Falls County.

Notice of the application was published in the Twin Falls Times News on September 27 and October 4, 1979. On September 24, 1979, a protest against the appli cation was received from Magic Water Company, Inc.

On October 29, 1979, the application was amended by the applicant. The amount of water to be diverted was increased to 20 cubic feet per second and the amount to be stored for irrigation was increased to 1500 acre feet.

Notice of the amended application was published in the Twin Falls Times News on November 15 and November 22, 1979.

Issues raised in the protest are as follows:

2

194

1) Is the water supply sufficient for the purpose intended?

2) Is the application made in good faith and not for delay or speculation?

3) Does the applicant have sufficient financial resources to complete the proposed project?

On November 27, 1979, a conference in the matter was held in Twin Falls, Idaho. The applicant was represented by W. F. Ringert, attorney at law, and the protestant was represented by Kenneth P. Elkin, President of Magic Water Company, Inc., and William L. Nungester, attorney at law.

The applicant maintained that flows of Salmon Falls Creek are sufficient to allow diversion during the season proposed and requested the Department take official notice of published stream flow records.

The protestant expressed concern over whether the proposed diversion would affect existing rights by reducing bank storage and the flows of springs tributary to the creek.

The parties agreed to allow the Department to issue a decision without a formal hearing.

Based upon his understanding of the law and upon the information obtained at the conference on this matter and upon the records of the Department, the Director of the Department of Water Resources makes the following Findings of Fact, Conclusions of Law and Order:

FINDINGS OF FACT

st.

And the second s

1) Published stream flow records for Salmon Falls Creek near its confluence with the Snake River show for the years 1970 through 1977 that 11,621 acre' feet per month was the average discharge during the months of September through May.

2) This applicant has also filed Desert Land Entry No. I-2590 with the Bureau of Land Management on the land which is sought to be irrigated.

3) The pumping plant which is proposed to be used to divert water to storage under this application is in place and is used to divert water under other rights during the irrigation season. The pumping plant has a capacity of appoximately 27 cubic feet per second.

4) Protestant, Magic Water Company, Inc. has License No. 47-2269 for 94.56 cubic feet per second of water from Salmon Falls Creek with a priority of February 11, 1953. This water is diverted during the irrigation season.

5) Diversions from Salmon Falls Creek in the reach concerned are under the control of the watermaster of State Water District No. 47-C. <u>CONCLUSIONS OF LAW</u>

 Unappropriated water is available in Salmon Falls Creek during the period of time the applicant proposes to divert water.

2) The amount of water diverted to storage is a small proportion of total flow during the winter and, therefore, will not decrease the bank storage along the stream.

3) Applicant is entitled to a permit to appropriate the quantity of water requested subject to all prior rights.
ORDER

IT IS, THEREFORE, HEREBY ORDERED that Application for Permit No. 47-7571 is APPROVED subject to the following conditions:

1) Diversion of water under this permit shall be subject to the control of the watermaster of State Water District No. 47-C.

2) A measuring device capable of recording the total volume of water diverted

shall be installed and maintained as part of the diverting works,

3) The storage of water is contingentupon certification by the Department of Water Resources of the applicant's dam under the dam safety provisions of the <u>Idaho</u> <u>Code</u>.

4) The issuance of this permit in no way grants any right-of-way or easement across the land of another.

5) The priority of this permit shall be October 29, 1979.

6) Proof of construction of works and application of water to beneficial use shall be submitted to the Department on or before April 1, 1985.

Dated this <u>2/</u> day of April, 1980.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State 47-7571 of Idaho No. _ _____, and said application is hereby _____APPROVED

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or be-

fore <u>April 1</u> _, 19 85 .

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: _____PURSUANT_TO_MEMORANDUM_DECISION_AND_ORDER

Witness my hand this _____ day of _____ April

, **19** <u>80</u> .

uty Director
