 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Memorandum

To: Water Rights 63-4277A
From: Justin Ferguson
Date: February 24, 2020
Re: Water Supply Bank Lease Application 1463

Purpose/Narrative: This lease application was received by the Bank on September 13, 2019 requesting to place the entirety of water right no. 63-4277A into the bank for a full 5 year duration. The applicants indicate that they have not used the right in more than 5 years, however it is indicated that use would not have been beneficial as there was sufficient snowpack and wildlife activity.

Authority to File: The application was submitted to the Department by Mr. Lionel Robinson. Review of IDWR records show Lionel Robinson, as well as Miriam, Andrew, Bartholomew and Peter Robinson, as owners. Per attachment 1A of the application packet, Lionel has authority to file on behalf of all parties listed. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The applicant has stated that no active pumping has taken place in recent years, to irrigation the place of use (POU) associated with water right 63-4277A, evidently because good snowpack and the presence of beaver dams, has resulted in an elevated water table, which kept the POU naturally vegetated. Review of satellite imagery and aerial photography from recent years (see Appendix to this memo) confirms that the irrigation POU has been vegetated in recent years, corroborating the applicant's assertion that active irrigation would not have resulted in an additional beneficial use of water.

Injury Evaluation: No injury is apparent through the lease alone. Proper rental review should guard against injury. Specifically, because a real consumptive use of water within the irrigation POU may naturally occur without active irrigation of the lease POU, it may be necessary to evaluate whether a consumptive water use rental might cause injury to prior appropriators.

Enlargement of Use: No enlargement is evident through the lease alone. Since the area has not been actively irrigated with surface water in recent years, consideration of the consumptive use of water under a rental may be necessary to protect against enlargement.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: IDWR Western Region and Watermaster for district 63 comments were requested February 24, 2020

Water Supply Bank Evaluation: Staff recommend this lease be approved
