RE: Permit No. 43-7166

Dear Mr. Ward,

We have received your Application for Permit to appropriate water from the State of Idaho.

Your application is located in the area identified as the Elba Sub Basin, in which past hydraulic studies have shown the groundwater supply to be very limited. The Department has already received several applications for water permits in this area and if all were to be developed the available groundwater supply would be exceeded.

For this reason, the Department is not issuing any new permits until it is known what effect the existing permits, as they are developed, will have on this supply.

We will hold your application without approval until it can be determined that water is available for appropriation.

If you have any questions on this matter, please contact this office.

Sincerely,

DAVID R. TUTHILL JR., P.E.
Supervisor, Water Allocation Section

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 43-7166, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

- SUBJECT TO ALL PRIOR WATER RIGHTS.
- Proof of construction of works and application of water to beneficial use shall be submitted on or before May 1, 19 86.
- The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- Other:

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

Witness my hand this 13th day of May, 1981.
