RE: NOTICE OF PENDING ORDER TO REJECT APPLICATION FOR PERMIT NO. 41-7056 IN THE NAME OF DON BENSON

Dear Mr. Benson:

On September 16, 1981, you submitted the above referenced application to the department proposing the diversion of 30.0 cubic feet per second of water to be diverted from Fall Creek tributary to the Snake River for power generation purposes in Power County, Idaho.

A review of the file shows that the last correspondence in connection with the application was in April 1986. There is nothing subsequent to that date to show that you have been actively pursuing the proposed project.

Water Appropriation Rule 4,5,3,3,2. requires an applicant for a permit to to be actively obtaining other permit approvals needed in connection with the project. The proposed project most likely will require approval from the Federal Energy Regulatory Commission (FERC). Please provide evidence to show that you have obtained approval from FERC and that the approval is in good standing or show that FERC approval is not needed for your project.

If you are no longer interested in the project, please sign and return the partially completed relinquishment form. If you do not relinquish the application, you are directed to provide within thirty (30) days appropriate information to show that you are actively pursuing development of the project. If you do not timely submit the requested information, the department will issue an order rejecting the application pursuant to Section 42-203A, Idaho Code.

Feel free to contact the department if you have questions.

Sincerely,

L. GLEN SAXTON, Chief Water Allocation Bureau

Encl: 1
