RE: Application for Permit 95-17116

Dear Sirs,

The Idaho Department of Water Resources (IDWR) is commencing review of Greenferry Water and Sewer District's (GWSD or District) application 95-17116 leading to permit issuance. We are seeking supplemental information beyond what was provided in the narrative report that accompanied the original application received by IDWR on 2/19/2015. Please respond to the following requests.

- 1) Provide the names and addresses of the current GSWD Board members.
- 2) Provide names and contact information for representative(s) or contractors, and what authorization they have to a) submit information on your behalf, or b) have power of attorney to sign on the Board's behalf.
- 3) Please confirm the GWSD proposed service area that was provided in the original 2015 application (map attached) is correct. There are presently several versions of service areas on record for GWSD that include areas outside the proposed area.
- 4) It is IDWR's understanding that GWSD has developed a Water Facility Plan for the Idaho Department of Environmental Quality, for Public Water Supply purposes. These types of plans provide current and forward looking details regarding water diversion and distribution. The narrative report submitted with the application 5 years ago has dated and generalized information. IDWR requests a copy of the GWSD Water Facility Plan to address many questions we have regarding the proposed appropriation. For example, IDWR is seeking justification for the proposed 30 year planning horizon. The Plan will likely provide insight for the horizon upon which the long term Maximum Daily Demand (MDD) and other criteria are determined.
- 5) Please provide information about Unaccounted for Water (UAW) flow rates and volumes presently in the system and what is the District's plan to manage the loss.

Please provide the requested information within 30 days, or make a written request for extension with a date certain for submittal of the information within 30 days. Thank you for your attention to this matter. We look forward to working with the District to secure needed water resources.

Respectfully,

Douglas Jones
IDWR Northern Regional Manager
