RECITALS

1. The Board is authorized under chapter 17, title 42, Idaho Code to operate a water supply bank and to contract with lessors to act as an intermediary in facilitating the rental of water.
2. The Lessor has filed a completed application to lease water rights described below into the Water Supply Bank on forms supplied by the Idaho Department of Water Resources and received by the Department on March 17, 2020.
3. The Director of the Idaho Department of Water Resources has reviewed the application for compliance with the Water Supply Bank rules and has approved the Lease subject to conditions listed below.

NOW, THEREFORE, in consideration of the mutual covenants and contracts herein contained, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

1. **WATER RIGHTS:** The Lessor shall lease and the Board shall accept into the Bank the Applicant's water rights described as follows:

Summary of Water Rights or Portions Leased to the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)

WATER SUPPLY BANK LEASE CONTRACT No. 1190

2. **COMPENSATION:** The Lessor shall accept and the Board shall pay compensation determined by the amount of water rented under the following rental rate during such times as the water is rented from the Bank over the term of this Lease.

Minimum Payment Acceptable: Current Rental Rate

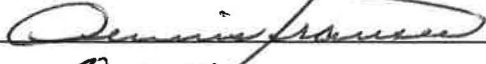

3. **TERM OF LEASE:** The term of this lease shall be January 1, 2020 to December 31, 2021. This Lease shall bind the parties and take effect when both parties have signed it.
4. **WATER SUPPLY BANK CONDITIONS OF ACCEPTANCE:** The Lessor shall abide by all terms and conditions contained in the Water Supply Bank Conditions of Acceptance, attached hereto as "Attachment A" and incorporated herein by this reference.
5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. If a lease contract cannot be reduced sufficient to reflect the legal definition of a water right as amended through a water right split and/or water right transfer, the Board may release the water right from the Water Supply Bank.
6. **ASSIGNMENT OF CONTRACT:** This lease is between the Board and the Lessor, who is the recognized owner or designated representative of the recognized owners of water rights described herein. Should ownership of any part of a water right herein described change during the term of this lease, either through a water right split, a water right transfer, sale of property to which the water right is appurtenant, or through any other recognized water right reassignment, the lease benefits and obligations to the conditions of acceptance for any such water rights will be assigned to the new owners.
7. **DUPLICATE ORIGINAL:** This Lease is executed in duplicate. Each of the documents with an original signature of each party shall be an original.

ADDITIONAL CONDITIONS OF ACCEPTANCE

1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK LEASE CONTRACT No. 1190

8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The leased amounts of rights 21-2121, 21-10286 and 21-7392 are limited to a combined rate of 1.13 cfs, 273 AF and the irrigation of 78 acres in a single irrigation season.
13. The leased rights when combined shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
14. Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

2. DESCRIPTION OF WATER RIGHT OFFERED TO THE BANK

☒ The full water right is being offered to the Bank.

OR

☐ A part of the water right is being offered to the Bank.

If a portion of the water right is being offered, **complete Attachment 2.**

3. MAP

Attach a map of the point(s) of diversion and place(s) of use proposed to be idled by this lease application. Make sure the idled place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to idle. If the water right proposed for lease is located within a permissible place of use (PPU) and portions of the PPU will continue to receive water from non-leased water rights, clearly outline on a map the acres within the PPU that will continue to be irrigated, as well as acres that will be idled during the lease term. Label the map **Attachment 3.**

4. GENERAL INFORMATION

- A. Is the diversion works or system owned or managed by an irrigation district or water delivery company? Yes ☐ No ☒
If yes, provide written consent from the company, corporation or irrigation district authorizing the proposed sale or lease (Attachment 4A).

If your water right is delivered through a canal, lateral or ditch operated by a canal company, irrigation district, or similar delivery entity, your lease request must include written consent from the company, district, or similar entity for your removal of water from its system pursuant to Section 42-108, Idaho Code and IDAPA WSB Rule 37.02.03.25.02e.

- B. Please provide a description of the current water diversion and delivery system.
Well to mainline and sprinkler irrigation system.

- C. Describe any other water rights used for the same purpose at the same place of use as the water right being offered to the Bank. Water Right 21-10286 is an enlargement of 21-2121 and is also offered to the WSB.
North Fremont Canal Systems, Inc., through Farmers Own Ditch Company, is now deliverable to the place of use.
Shares were obtained in 2019.

- D. Are any of the water rights identified in Section 4C stacked with the water right proposed for lease? Yes ☒ No ☐
Stacked water rights are used together to achieve a common beneficial use, such as irrigation of the same lands. Stacked water rights cannot be separated and must be jointly leased to the Water Supply Bank. Stacked water rights qualify for the multiple fee payment of \$500.

- E. Will the present place of use continue to receive water from any other source? Yes ☒ No ☐
If yes, explain the relationship between the different water sources and how enlargement of the authorized use will not occur if this water right is leased. Farmers Own Ditch Company shares were recently acquired for the irrigation of the place of use. Beginning in 2020 irrigation season, the POU will be irrigated with surface water, not ground water.

- F. Identify annual volumes and/or rates of water diverted in the last 5 years to accomplish the beneficial use authorized by this water right. Fully used in 2019.

- G. Has any portion of this water right undergone a period of five or more consecutive years of non-use? Yes ☐ No ☒
If yes, describe the circumstances and attach evidence to demonstrate how the water right has not been lost through forfeiture (Attachment 4G). See Section 42-223, Idaho Code for exceptions to forfeiture. Your application may be denied if forfeiture concerns are not addressed.

- H. Is this water right involved in any other IDWR process, such as an application for transfer or a mitigation plan?
If yes, describe. Yes ☐ No ☒

5. SALE/LEASE AGREEMENT

A. Is the water right, or portion thereof, offered to the Idaho Water Resource Board (IWRB) for sale ☐ or lease ☒.

If lease, specify the years when the use of water will be suspended: 2020 to 2021 (maximum lease period 5 calendar years).
(Year) (Year)

B. Show the minimum payment acceptable to the seller/lessor. The minimum payment may be shown as the "current rental rate" as established by the IWRB. Include the method of determining the minimum payment if other than the current rental rate.
Current rental rate. _____

I hereby assert that the information contained in this application is true to the best of my knowledge, and that I have the authorities necessary to offer this water right for sale or lease to the Idaho Water Resource Board.

The Designated Applicant acknowledges the following:

1. Payment to the Designated Applicant is contingent upon the sale or rental of the water right from the Bank.
2. While a water right is in the Bank, the seller/lessor of the water right may not use the water right, even if the water right is not rented from the Bank.
3. A water right accepted into the Bank stays in the Bank until the Designated Applicant receives written confirmation from the Board or Water Supply Bank that the water right has been released from the Bank.
4. While a water right is in the Bank, forfeiture is stayed.
5. Acceptance of a water right into the Bank does not, in itself, confirm the validity of the water right or any element of the water right.

RE: **WATER SUPPLY BANK LEASE CONTRACT 1190
FOR WATER RIGHTS 21-2121, 21-10286, 21-7392**

Dear Lessor:

Water rights **21-2121, 21-10286, 21-7392** were leased into the Water Supply Bank (Bank) as of January 1, 2020, in accordance with the enclosed executed lease contract. **Your water rights, as described on the lease contract, are considered leased into the Bank and should remain unused until they are formally released from the Bank.** More information and further restrictions placed on your water rights while leased can be found in conditions of acceptance of the lease contract. Read the conditions of acceptance carefully.

The rights will automatically be released from the Bank on **December 31, 2021**, unless the rights are released earlier by the Water Resource Board (Board). On behalf of the Board, the Department of Water Resources (Department) can evaluate an early release of the lease contract upon your request. To release the water rights from the Bank prior to the release date, submit a written request on the *Request to Release a Water Right from the Bank* form. This form is available on our public website at www.idwr.idaho.gov. **Please note your water rights may not be available for immediate release if they have been rented or are being considered for a future rental. Furthermore, it is at the discretion of the Department whether or not a water right can be released early from a lease contract.**

If you have questions regarding this matter, please contact this office at bank@idwr.idaho.gov or 208-287-4800.

Sincerely,

for Water Supply Bank

RE: APPLICATION TO LEASE WATER RIGHT 21-2121, 21-10286 & 21-7392 TO THE WATER SUPPLY BANK CONTRACT 1190

****TIME SENSITIVE RESPONSE REQUIRED***

Dear Applicant:

The Department of Water Resources has completed its review of your application to lease the above-mentioned water right to the Water Supply Bank. **I have enclosed two original Water Supply Bank Lease Contracts for your review and signature. Please sign and return ALL Lease Contracts within 14 days.** Upon signature and return of the contracts, the Department will also sign the original contracts and return an executed copy to you. The Lease Contract is not considered final until you and the Department have both signed.

The right will automatically be released from the Bank on **December 31, 2021**, unless the right is released earlier by the Board, or upon your request. To release the right from the Bank prior to the release date, submit a written request on the Request to Release a Water Right from the Bank form. To propose a new lease period, submit a new Application to Sell or Lease a Water Right to the Water Supply Bank form along with applicable fees to the Department. These forms are available from any IDWR office or from our public website at <http://www.idwr.idaho.gov>. Please note your right may not be available for immediate release if it has been rented.

Please review the conditions of acceptance listed on the Lease Contract, including #3 which says:

"While a right is in the bank, **the lessor may not use the right** without approval of the department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B."

If you have questions regarding this matter, please contact this office at bank@idwr.idaho.gov or 208-287-4800.

Sincerely,

Sincerely,

MEMORANDUM FOR LEASE CONTRACT # 1190

To: Water Right(s) 21-2121, 21-10286, 21-7392

From: Alex Dagleish

Date: 5/1/2020

Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

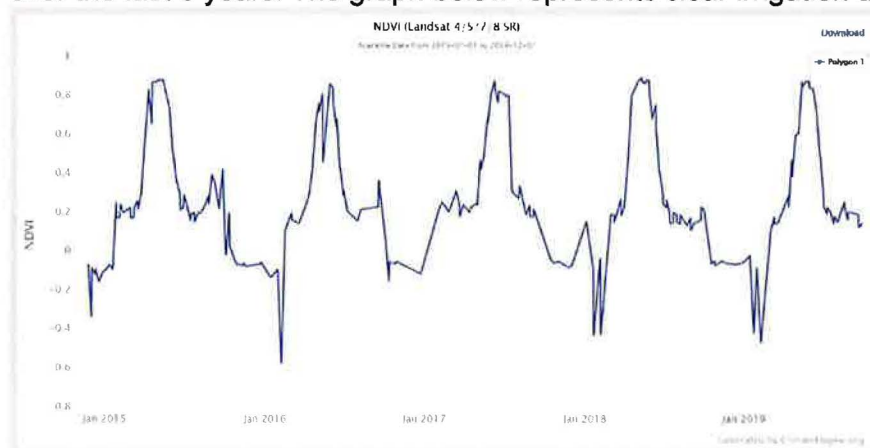

PURPOSE/NARRATIVE: Two lease applications were received March 17, 2020 from Dennis Fransen offering the entire portions of water rights 21-2121 and 21-10286. The applications proposed to lease the rights into the Bank for 2020 and 2021. Together, the rights amount to 68 acres, 56.4 acres from 21-2121 and 11.6 acres from 21-10286. According to the application, the POU will be irrigated with surface water from the Farmers Own Ditch Company beginning in 2020. As a result, rights 21-2121 and 21-10286 are offered to the Bank.

A third application was received by email on 4/24/2020 to lease in the full amounts of right 21-7392. This right was requested to be leased in as it overlaps the place of use (POU) and point of diversion (POD).

AUTHORITY TO FILE: The application was completed by representative Kristin Moore, a Senior Water Rights Analyst at Rocky Mountain Environmental Associates Inc. Department records indicate that water rights 21-2121, 21-10286 and 21-7392 are currently owned by Dennis and Susan Fransen. The applications were signed by Dennis and included an attachment authorizing Dennis as the Designated Applicant on behalf of himself and Susan. According to Fremont County tax lot data, the land at the POU and POD are owned by Dennis and Susan Fransen. Both the POU and POD are on parcel # RP09N42E7200. There are no concerns with the authority to file.

WATER RIGHT VALIDITY: Rights 21-10286 and 21-2121 were decreed on 3/11/2011. 21-2121 was the initial right and 21-10286 was an expansion right adding volume and acreage but no rate. Right 21-7392 was licensed on 5/22/1996.

Using Climate Engine, it is evident that the POU for rights 21-10286, 21-2121 and 21-7392 have been irrigated over the last 5 years. The graph below represents clear irrigation use.

To a further extent, after reviewing Sentinel, Landsat and NAIP imagery, approximately 78 acres have been irrigated at the POU for the rights in the NESE QQ and SESE QQ Sec. 34, Twp. 9N, Rge. 42E. Roughly 2 acres in the SE corner of the SESE QQ have a home and structures and thus cannot be irrigated.

Rights 21-2121 and 21-10286 are limited to irrigate a maximum of 68 acres when used together and right 21-7392 authorizes a maximum of 19.4 acres but has no combined acre limit. The difference in 78 observed irrigated acres and the 68 acres is 10. Presumably, these 10 acres are used under right 21-7392. When used together 21-2121 and 21-10286 authorized a volume of 207.9 AF. With a local headgate limit of 3.5 AF/acre, $207.9 \text{ AF} / 3.5 = 59.4$ acres. Right 21-7392 does not have a designated volume but if the 19.4 acres are multiplied by 3.5 AF, the outcome is 67.9 AF. If this same logic from above is applied to the calculated volume of 67.9 AF, the outcome is 19.4 acres, which is what the right authorizes. Now, if the volumes are added together, their sum is 275.8 AF. When 275.8 is divided by 3.5 AF, the product is 78.8 acres which is approximately the acreage that has been irrigated. There are no concerns with the validity of the water rights in the lease.

INJURY TO OTHER WATER RIGHTS: The lease of rights 21-2121, 21-10286 and 21-7392 do not appear to cause injury to other water rights. Proper rental review should address the possibility of injury.

ENLARGEMENT OF USE: The POU is within the North Fremont Canal Systems Inc. and Fremont Madison Irrigation District. According to the application, North Fremont Canal Systems, Inc. though Farmers Own Ditch Company is now deliverable to the POU. Therefore, shares from the Ditch Company were acquired in 2019 and the POU will be irrigated with surface water shares, not groundwater. Right 21-7392 overlaps the POU and was not originally proposed to be leased into the Bank which posed a threat of enlargement. Rights 21-10286, 21-2121 and 21-7392 are not stacked together and have no combined limits when all used in conjunction. It is probable that rights 21-10286 and 21-2121 authorize the same use and allowing 21-10286 to be leased without enforcing a partial administrative reduction, while also allowing 21-7392 to continue to be used, could result in enlargement.

I sent an email to the representative on 4/6/2020 inquiring if right 21-7392 will be used in conjunction with the newly acquired surface water shares. She responded the next day stating that 21-7392 would not be used with the surface water shares and that the right should probably be leased in with the other overlapping rights. She discussed the options with the applicant and the full amounts of 21-7392 were offered to the Bank. With all three rights fully offered to the Bank, there are no concerns with enlargement through the lease.

The rentable amounts of the rights will be limited to maintain the respective combined limits. Rights 21-2121 and 21-7392 when used together are limited to 1.13 cfs and likewise, rights 21-2121 and 21-10286 when combined are limited to the same rate of 1.13.

Also, as noted above, based on aerial imagery, a maximum of 78 acres have been irrigated at the POU under rights 21-2121, 21-10286 and 21-7392. The table below describes the amounts accepted for lease from each right as well as the overall combined leasable amounts.

WR	Rate	Vol	Acres	Rate/AC	Vol/AC
21-2121	1.13	168	56.6	0.020	3.0
21-10286	0.23	39.9	11.4	0.020	3.5
combo	1.13	207.9	68	0.017	3.1
21-7392	0.39	67.9	19.4	0.020	3.5
combo	1.13	273.0	78	0.014	3.5

Although the full amounts of each right were leased in for a total of 87.4 acres, the rentable acres will be reduced to maintain consistency with the 78 acres of observed irrigation under the leased rights. Limiting the acres rentable will help limit the possibility of enlargement.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the leased is subject to Water District # 100. Comments were requested from WD Watermaster Blake Jordan and Eastern Region on 4/24/2020. No response was received within 7 days, so it was presumed the watermaster and region did not have concerns with the lease.

Alex,

We will put the third right in the bank based upon your analysis and agree to the combined use limits. I will be sending it to the applicant to sign today and he will have to mail it to me. I'll send you a scanned copy before I drop it in the mail to your office.

Kristin,

There are two options with this lease proposal. First, if right 21-7392 is not leased into the Bank with 21-2121 and 21-10286, the amounts authorized under 21-7392 (0.39 cfs, 67.9 af and 19.4 acres) must be discounted from the lease to avoid enlargement.

On the other hand, if right 21-7392 were offered to the bank, it would be accepted. However, the amounts rentable would be based on the acres that have been irrigated. After analyzing aerial imagery from the last 5 years in the NESE and SESE QQ's where irrigation is authorized, I determined as much as 78.0 acres have been irrigated.

Below is a table summarizing the authorized acres that can be irrigated under the 3 rights. If 78.0 acres were irrigated, then a question arises about the 2.6 acres of what would be unauthorized irrigation in the NESE QQ. (2.6 acres is the difference between the 40 legal acres in NENE and the 37.4 acres authorized). If the Department accepts that the 2.6 acres were irrigated with ground water from either 2121/10286 or 7392, then those 2.6 acres might be subject to enforcement procedures.

	NESE	SESE	Totals
Observed irrigated	40	38	78
21-2121	32	36	68
21-10286	32	36	68
combined	32	24	56
21-7392	5.4	14	19.4

sum of all WRs	37.4	38	75.4
legal acres	40	40	80
excess irrigation	2.6	0	

So, based on 78 acres of observed irrigation, the rentable extent of the 3 rights would equate to 1.13 cfs, 273.0 af and 78 acres.

WR	Rate	Vol	Acres	Rate/AC	Vol/AC
21-2121	1.13	168	56.6	0.020	3.0
21-10286	0.23	39.9	11.4	0.020	3.5
combo	1.13	207.9	68	0.017	3.1
21-7392	0.39	67.9	19.4	0.020	3.5
combo	1.13	273.0	78	0.014	3.5

Please let me know how the applicant would like to proceed with the lease proposal.

Alex,

Thank you for your email. We became aware of the overlapping water right 21-7392 also, but it isn't referenced on the rights 21-2121 and 21-10286. No, it will not be used to irrigate the property. It appears to be almost entirely overlapping with the other ground water rights on the property. The water right was decreed with supplemental language. There were never any surface water rights on the property, but it was assumed so base upon language in the application for permit. The field examination for licensing did not identify any surface water nor were any surface water rights decreed to the property. I believe that in the SRBA, the supplemental language was added erroneously.

I believe it makes the most sense to also submit an application to lease 21-7392 to the water supply bank. Would there be any reason it would not be accepted into the Bank? And would it be rentable?

Thanks,

Good morning Kristin,

I am processing lease applications for water rights 21-2121 and 21-10286. During my review, I have come across a possible issue relating to groundwater right 21-7392. According to Department records, this right overlaps the place of use (POU) and point of diversion (POD). I am concerned about the possibility of enlargement of right 21-7392 since it is not included in the lease proposal.

Irrigation rights 21-2121 and 21-10286 are proposed for lease in 2020 and 2021. Item 4C on the applications asks for any other water rights used for the same purpose at the same place of use as the water right being offered to the bank. Overlapping irrigation right 21-7392 is not listed on either application under this section. Furthermore, item 4E on the applications states that the POU will be irrigated with surface water not groundwater beginning in the 2020 season. Can you explain if right 21-7392 will continue to be used at the place of use in conjunction with the recently acquired surface water shares? At this time, I will refrain from further processing of the lease proposal until it is clear that enlargement of right 21-7392 is not an issue. Thank you for your attention to this matter.
