**Re: Request for Extension of Time to Submit Proof of Beneficial Use for  
Ground Water Permit 75-13977**

Dear Sir or Madam,

The Statement of Completion was filed for Water Permit 75-13977 before the water was put to beneficial use per the permit terms. We understand through discussion with our local IDWR contact, Cindy Yenter, that because the permit proof date (02/16/2020) has not passed, we have an opportunity to withdraw this statement and submit a request for extension of time to submit proof of beneficial use.

Please note that we are submitting a separate packet regarding Water Permit 75-14880. The Statement of Completion was also filed for this permit before the water was put to beneficial use per the permit terms. Because the permit proof date (11/1/2018) has passed, we understand that we need to relinquish this permit and reapply for a new permit. Therefore, we are submitting the Relinquishment of Permit form for Water Permit 75-14880. We will also follow up separately with a new application for ground water rights.

Filing fees for the IDWR Assignment of Permit (\$25) and the IDWR Request for Extension of Time (\$50) will be submitted to the IDWR account today (2/10/2020) via the ACH system.

Please note that as of January 17, 2020, our company name has officially changed from Formation Capital Corporation, US, to Jervois Mining USA Limited. The enclosed forms provide the documentation of the name change, which was administered in the state of Nevada.

If you need more information, please contact me directly. I am the lead point of contact for environmental permitting for the Idaho Cobalt Operations.

Thank you for your assistance,

  
Theresa Hughes
