

DEPARTMENT OF WATER RESOURCES

APPLICATION FOR PERMIT

IDWR/NORTH appropriate the public waters of the State of Idaho

1. Name of applicant(s) GARY HAGAN Phone 509-758-3450
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address 2255 RESERVOIR RD City CLARKSTON
 State WA ZIP 99403 Email _____
2. Name of representative, if any _____ Phone _____
 Mailing address _____ City _____
 State _____ ZIP _____ Email _____
- a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☐ Send original correspondence to the applicant and copies to the representative.
- b. ☐ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply GROUNDWATER which is a tributary of _____
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
44N	03W	35			SE	SW	BENEWAH	GROUNDWATER	92-95-N-28
44N	03W	35			SE	SW	BENEWAH	GROUNDWATER	92-95-N-0007
44N	03W	35			SE	SW	BENEWAH	GROUNDWATER	92-89-N-6

5. Water will be used for the following purposes:
- Amount 0.20 CFS for DIVERSION TO STORAGE purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 4.7 AF for FISH PROP STORAGE purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 4.7 AF for RECREATION STORAGE purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 0.20 CFS for FISH PROPAGATION purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
6. Total quantity to be appropriated is (a) 0.20 cubic feet per second (cfs) and/or (b) _____ acre-feet per year (af).
7. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. APPLICANT HAS WELL AND PUMP TO POND
- b. Height of storage dam 15 feet; active reservoir capacity 12 acre-feet; total reservoir capacity 12 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
- e. If well is already drilled, when? VARIOUS; drilling firm MULTIPLE;
 well was drilled for (well owner) MIKE NEEDHAM; Drilling Permit No. MULTIPLE

For Department Use

Received by _____ Date _____ Time _____ Preliminary check by _____
 Fee \$ 100 Received by TA Receipt No. N034741 Date 6-10-19
420 NS N036090 5-22-20
100 (shifted over) N036741

8. Description of proposed uses (if irrigation only, go to item 9):
- Hydropower; show total feet of head and proposed capacity in kW. _____
 - Stockwatering; list number and kind of livestock. _____
 - Municipal; must complete and attach the [Municipal Water Right Application Checklist](#).
 - Domestic; show number of households _____
 - Other; describe fully. FISH PROPAGATION FOR CUT THROAT TROUT. RECREATION STORAGE FOR FISHING.
9. Description of place of use:
- If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
 - If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

														RS					

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? 92-7203 FOR RECREATION STORAGE AND FISH PROPAGATION STORAGE FROM UNNAMED STREAMS.
11. a. Who owns the property at the point of diversion? APPLICANT
- b. Who owns the land to be irrigated or place of use? APPLICANT
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____
12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. APPLICANT HAS EXISTING RIGHT 92-7203 FOR STORAGE FOR RECREATION STORAGE AND FISH PROPAGATION STORAGE. APPLICANT IS APPLYING FOR NEW WATER RIGHT TO ADD WELL WATER TO MAKE UP SEEPAGE AND EVAPORATION AND FOR COOLING WATER FOR FISH PROPAGATION AND RECREATION STORAGE.
13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).
14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

Total Storage Calculations (Big Pond)

FILE NUMBER	Hagan
REVIEWER	Adam Frederick
DATE	5/22/2020

This spreadsheet has been designed by Idaho Department of Water Resources to estimate the total seepage, evaporation and fill capacity required for a pond.

User Input
Calculated value
Formula Explanations

Surface Area (AC.)	2	"Surface Area" is automatically carried over from the "Seepage Loss" sheet.
Average Pond Depth (FT.)	6	"Average Pond Depth" depicts the actual depth of the pond either measured or estimated. Note: If you know the maximum depth and not the average depth, the Field Examiner's Handbook suggests multiplying the maximum depth by 0.4 to get the average depth, or you can use any method that seems reasonable to attain average depth.
Pond Capacity (AF)	12.0	Pond Capacity is calculated by multiplying the Pond Surface Area by the Average Pond Depth. If you know the capacity, divide the capacity by surface area and enter the average pond depth in the space above. Note: If pond capacity is determined using a method shown on the "Pond Capacity" sheet, the user may need to modify the value of "Pond Capacity" (cell B9) manually. Note that if the value is modified manually, the formula will be altered for future use.
Multiple Fill Volume Above Initial Fill to Fulfill From Storage Needs- "Multiple Fills" (AF)	0	The "Multiple Fill Volume Above Initial Fill" is the acre-feet of water required to meet a <i>from storage</i> component if the <i>from storage</i> component exceeds a one time fill. This section should not include the amount of water needed to fill the pond initially or the amount of water needed to maintain the pond level due to evaporation or seepage. For example: if a pond has a capacity of 5 acre feet and 2.5 acre feet of seepage and evaporation, but the pond is used for irrigation that requires 10 acre feet of from storage for the irrigation use, then you would insert 5 acre feet into this location (10 acre feet needed - 5 acre feet from the initial fill = 5 acre feet of additional storage needed). Note: You must have a "From Storage" component exceeding the initial fill on the permit to include a volume in this space.
Estimated Seepage Loss (AF)	2.2	The "Estimated Seepage Loss" is automatically carried over from the "Seepage Loss" sheet.
Estimated Evaporation Loss (AF)	2.5	The "Estimated Evaporation Loss" is automatically carried over from the "Evaporation Loss" sheet.
Total Volume Required (AF)	16.7	The "Total Volume Required" is calculated by adding the Pond Capacity, Multiple Fills, Seepage Loss, and Evaporation Loss amounts to determine the total amount of storage required.

RE: Application for Permit No. 92-11092 & 92-11093

Dear Applicant:

The Department of Water Resources has received your water right applications. Please refer to the numbers referenced above in all future correspondence regarding these applications.

A legal notice of the applications has been prepared and is scheduled for publication in the ST MARIES GAZETTE RECORD on 6/3/2020 and 6/10/2020. Protests to the applications may be submitted for a period ending ten (10) days after the second publication.

If the application(s) is/are protested, you will be sent a copy of each protest. All protests must be resolved before the application(s) can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the applications are not protested, the Department will process your applications and notify you of any action taken on the applications. If your applications are approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the applications.

Sincerely,

Tammy Alleman
Administrative Assistant

Alleman, Tammy

Subject: Request for Comments on WR#92-11092 & WR# 92-11093

Dear Interested Agencies:

The Department of Water Resources is seeking written comment and/or recommendations from your agency regarding the above referenced Water Right applications. You can find copies of the applications at: <http://www.idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>.

This office can publish notice of the application as soon as the initial review is completed; therefore, your prompt response to this request is appreciated. If your agency desires to formally protest the approval of the application(s), you may do so after the notice is published by filing a written protest along with a \$25.00 filing fee within 10 days after final publication. The deadline for comments on the applications is June 22, 2020.

Please contact the Northern Region Office at (208) 762-2800 if you have any questions regarding the applications.

Thank you,

Tammy

**CHENEAH COUNTY PROPERTY TRANSFER
VERIFICATION**

WHY IS THE INFORMATION NEEDED? Sales of real estate are used as one factor in assessing property for taxation. Sales are also used to measure uniformity of assessments to ensure that all taxpayers pay only their fair share of property taxes.

HOW WILL THE INFORMATION BE USED? Your assessor will consider the selling price of your property and the selling price of similar properties to determine the market value for many properties. Present day building construction costs, income and expenses (if the property being appraised produces income), age of the buildings. Location, etc., will also be considered.

WILL MY TAXES BE RAISED IF I ANSWER THIS QUESTIONNAIRE? Not because you answered the questionnaire. Property tax increases are caused by increasing costs of operating schools, cities, water districts, and the many other public services supported by the property tax. Accurate sales information makes possible accurate assessments. The property tax load is more evenly distributed under present laws when all assessments are based on current market value.

WHY ARE SO MANY QUESTIONS ASKED ABOUT MY PROPERTY? Selling prices of property often include more than just the land and buildings. Many sales prices include furniture, machinery, livestock, and farm crops. The value of these items is deducted from the total selling prices when the sale is studied by the Assessor.

PARCEL NUMBER: **RP44N03W356600A**

Subject: RE: POU Shapes for CSRBA Recommendation 92-7206 (Hagen)
Attachments: 92-7206_Layout.pdf

Hey Shaun,

Sorry I missed you yesterday. I will be around today till about 3 your time. Drop me a line or I can call you later this morning.

In the meantime, I did have a shape file that should have been attached to the recommended POU. I must have missed attaching it.

I went ahead and attached the POU shapefile to the version 2 recommendation of 92-7206. Note that even though Version 2 Rec for 92-7206 and WR 92-7206 have the same RightID, I don't see that the Shape I attached to the recommendation is showing up in the WR record. I am not sure why that is. You might have to manually link it.

Anyway, the other thing to note is that you will see the shape for those ponds in the SESE of that property extends south over Hagen's property boundary. But in the recommendation (and subsequent water right), the PLS description for the portion of the ponds that extend south of Hagen's property boundary are not included in the POU description on the face of the water right. I didn't include PLS for property that isn't owned by Hagen as part of the POU for 92-7206. But drew the shape around the full pond anyway.

I don't know if that makes any sense. Anyway, the point is that we can cut off the bottom of the shape if we need to.

Later,
c

Craig:

A couple of new Ground Water Applications for Permit, that are currently on hold due to a requested delay in processing, will be coming to Northern Region. These Applications involve the same POU as 92-7206.

Could you give me a call concerning 92-7206 at your convenience? I need to provide more information than I put into my voicemail message for you.

Thanks,

RE: Unacceptable for Filing- Applications for Permit / Approved 90 day Request For Extension

Dear Mr. Hagen:

Thanks for your recent fax to Adam Frederick; Idaho Department of Water Resources (IDWR) Water Rights Supervisor; that requests a 90 day extension to delay the commencement of Application For Permit processing to April 21, 2020. This request extends beyond the previously approved deadline of January 21, 2020. Your fax request applies to three Applications for Fish Propagation and other beneficial uses.

I have been advised by Mr. Frederick that your 90 day extension request, to delay the commencement of Application processing until April 21, 2020, has been approved. This approval is subject to the condition that you continue to work diligently to satisfactorily complete, and deliver your Applications to IDWR, by April 21, 2020.

IDWR continues to recommend that you obtain the services of a water engineering consultant, professional engineer, and / or well drilling firm to assist you, or act as your representative, in completing Application(s) for Permit that are acceptable for filing. Your consultant can aid you in determining the correct fees and deciding if all three of your current Applications are needed to meet your objectives.

Please be advised that use of the wells shown in your Applications for Permit for Fish Propagation, Irrigation, or any Storage uses is not authorized until you have completed Application(s) for Permit and Permit(s) have been issued by IDWR. Please contact me at (208) 762.2816 if you need assistance or have questions.

Respectfully,

Shaun M. Maxey

RE: Unacceptable for Filing- Three Applications for Permit / Request For Extension

Dear Mr. Hagen:

Thanks for your recent letter to Doug Jones; Idaho Department of Water Resources (IDWR) Regional Manager; that requests a delay in the commencement of processing on three Groundwater (Well) Applications For Permit. Your letter and two pond dimension drawings were received on December 16, 2019. Your letter indicates that you are working to complete your Applications for Fish Propagation (commercial sale of fish) and other beneficial uses.

IDWR will initiate procedures to refund your Application fees if we have not received Applications that are acceptable for filing by January 21, 2020. Blank Application For Permit forms and IDWR maps suitable for labeling are enclosed for your use to replace the current Applications. IDWR received \$300 total under Receipt N034741. The Applications for Permit were returned to you in July 2019 and remain unacceptable for filing. No further extensions on the existing Applications for Permit will be granted.

Preparation of Applications for Permit that involve Fish Propagation, Irrigation, or Storage uses may be challenging. You may wish to consider using a water engineering consultant, professional engineer, and / or well drilling firm to assist you, or act as your representative, in completing Applications for Permit that are acceptable for filing. Your consultant can assist you in determining what well upgrade fees are required and deciding if all three of your current Applications are needed to meet your objectives.

Please be advised that use of the wells shown in your Applications for Permit for Fish Propagation, Irrigation, or any Storage uses is not authorized until you have completed Application(s) for Permit and Permit(s) have been issued by IDWR. Please contact me at (208) 762.2816 if you need assistance or have questions.

Subject: RE: Examples of wells used to cool surface water ponds for raising fish

Shaun,

Yes, its feasible and I have worked up at least one. That one had a heat exchanger but the heat transfer can be done by direct contact of one water with another.

And Dan is right about the difference between raising fish for recreation and for-profit fish production.

I am assuming that this is recreational use. There is a mixing equation that can be solved to issue the permit. That equation requires temperature information. So we need get that from them and we need to set up the permit so that the operations information is collected for us during the development period and even better, that that operation data is submitted with proof.

The mixing equation is

$$C_f = \frac{(C_1 \times Q_1) + (C_2 \times Q_2)}{(Q_1 + Q_2)}$$

The parameters are

- 1) The desired end result temperature for the fish pond C_f
- 2) The temperature of the well water C_1
- 3) The temperature of the surface C_2
- 4) The flow rate required from the well Q_1
- 5) The flow rate of the surface water into the pond Q_2

We can solve for the flow rate needed from the well, if we know the other parameters.

Hope this helps.

Michele

Subject: RE: Examples of wells used to cool surface water ponds for raising fish

Shaun,

There are several fish propagation water rights that use well water to either cool or warm up the water for fish. The field exams that I am thinking of for a Donald K. Campbell that Michele Edl is working on. They are permits 47-8055 and

47-8056. I know we have done a couple of others for a fish propagation right in Basin 47, so you may look into the fish propagation rights there also. I did a fish propagation field exam for Simplot 2-7472, that uses several different sources of water and need them for water quality reasons. You might also look at water rights 51-13026 and 51-13120 for Greg Obendorf.

The main thing to remember on fish propagation rights, is that they need to producing fish for sale. Ponds used to raise fish for recreational fishing is called recreation storage not fish propagation. They will need to provide fish numbers and the average fish size of the fish raised and sold to determine if the amount of water they are requesting is an actual beneficial use of the water. The number of fish raised gives you size of storage needed for that type of fish, and from that you can use Administrative Processing Memorandum #15 to determine if the diversion rate and volume are a reasonable beneficial use of water. I have some spreadsheets that I use, and Michele also has some spreadsheets she uses to review fish propagation licenses.

Subject: Examples of wells used to cool surface water ponds for raising fish

Hi:

Do you recall any situations where water from 6 inch wells is being used to add cooling water to ponds that are currently filled by surface water.

I'm working with customer on new Applications for Permit that propose use of existing wells to cool two ponds for raising fish. I'm wondering how feasible this is.

Thanks,

Shaun

RE: Unacceptable for Filing- Applications for Permit / Request For Extension

Dear Mr. Hagen:

Thank you for the information you provided during our phone conversation on August 1, 2019 concerning the August 9, 2019 response deadline on your Applications for Permit that are unacceptable for filing. The three Applications were receipted for \$300 under Receipt number N034741.

It is my understanding that you wish to request a delay in commencement of processing for the three Applications for Permit that you have submitted to Idaho Department of Water Resources (IDWR). IDWR's Water Appropriation Rules (IDAPA 37.03.08) require that your request for extension be submitted in writing to the Director of IDWR.

Your request for extension letter, bearing your original signature, listing the Receipt Number (N034741), and specifying what time period you are requesting for a delay in commencement of processing (not to exceed six months, or not to exceed one year), **must be received at the IDWR Northern Region office by 5 P.M. on August 9, 2019**. Please address the letter to the IDWR Director; Gary Spackman; and cc the Northern Regional Manager; Doug Jones.

Please telephone me at (208) 762-2816 / 2800 to indicate when you have mailed the request for extension letter.

Respectfully,

A handwritten signature in dark ink, reading 'Shaun M. Maxey'. The signature is fluid and cursive, with a large loop at the end of the last name.

Re: Unacceptable Applications for Permits (Parcel RP44N03W356600A) (Rule 35 Application Requirements)

Dear Mr. Hagen:

Idaho Department of Water Resources (IDWR) received three Applications for Permit from you on June 10, 2015 to divert water from three wells. The wells and storage locations appear to be on Benewah County tax parcel RP44N03W356600A. The Applications are enclosed and are currently unacceptable for filing as explained below.

We are returning your Applications because each of the Applications is missing the required map and two Applications do not specify the development period (Page. 2 (#13). The measurement units shown on Line 5 and Line 6 of each Application are also contradictory.

My review of your Applications indicates that Water Rights do not exist yet for the large pond or reservoir in the Southeast corner of parcel RP44N03W356600A (See attached map). It is unclear if the 4 Acre Feet (AF) shown on each Application is for this pond / reservoir.

Please contact me by no later than July 12, 2019 to correct your Applications for Permit. IDWR will take steps to terminate the Applications, if no response is received, in accordance with Idaho Code § 42-204.

Respectfully,

Shaun M. Maxey
