																			6210

The total irrigation within these places of use will not exceed 6,010 acres.

Additional Information for Application Item 11a.

The applicant has successfully initiated a Lease of Power Privilege with the Bureau of Reclamation, which controls the federal land where the point of diversion is located.

Additional Information for Application Item 11b.

Relative to the place of storage and the irrigation uses the applicant has a lease with the property owner Wood Creek Ranch, LLC. Relative to the place of use for the downstream uses the applicant has memorandums of agreement with Black Canyon Irrigation District and the City of Nampa.

Additional Information for Application Item 12.

This application is a companion to Application for Permit No. 63-34403, with the same name and points of diversion. This application merely adds uses with associated places of use. The 31,000 acre-feet identified in this application are not intended to increase the total storage identified in Application for Permit No. 63-34403 but rather provide additional uses for 31,000 acre-feet of this storage. Per IDWR guidance this application also has its own Diversion to Storage component -- for 2,000 cfs.
