To whom may concern:

The water system at this address was existing but the permit had lapsed before my purchase in Jan 2016. After viewing all the installed equipment and fixing the pump I applied for a renewed permit. That was issued 20 Feb. 2019. After which I contacted the water master of this dist. And notified him of the issued permit and will he come and expect the equipment. I explained to him that it had been installed, I thought, in 2004 or 5 by the owner than, Mr. Schumer. The permit called for a lockable device (a J-box down at the pump) and a water meter to verify the cf/m. I told him the pump hp and He told me that wouldn't necessary due the small draw and limited use.

The water master indicated he was familiar with the system and asked at what level would the draw be? I said 0.03 cf/m. and that has not changed.

So he told me to proceed and said the Middle Fork was not on the restricted list at this time. He thought a small fee would be imposed if it were since the permit draw was so small and a short period of time.

I thanked him and started the system.

I thought I'd add this bit of history to better familiarize you with what has transpired as I know it.

Thank you for your consideration?

Bill Thompson
