Subject: Permits 86-12025 & 86-12026 Requests for Extension of Time
Date: Tuesday, February 11, 2020 1:51:00 PM

Permit Holder,

Good afternoon. The Department is processing your Requests for Extension for permits 86-12025 and 86-12026. The Department can only grant extensions based on determinations that the permit holder has proceeded diligently to develop the permitted water use. Your responses on the Extension forms for both permits do not provide sufficient evidence to make those determinations and requires additional information.

On the extension request form for permit 86-12025, you stated that the work completed was, "partial dig out". On an extension request for this permit that was received November 19, 2015 and approved December 24, 2015, the work performed was stated on the form, "dug out wood debris to expose open spring". Is the partial dig out referenced on the recent form addition to the work stated on the form that was approved December 24, 2015? If so, this additional work may be grounds for an extension approval.

On the extension request form for permit 86-12026, you stated that the work completed was, "none". Have you contacted a contractor or received bids for the work? Have any other steps been taken to further the development of this permit? If so, this may affect the request.

Please provide additional information confirming that you have commenced construction of works and are proceeding diligently to completion regarding these permits. If additional information is not received within 14 days, the Department will initiate a denial of your request and issue a lapse notice for your permit(s).

Please feel free to contact me should you have any questions or concerns.

Best regards,
Debbi
