RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK RENTAL AGREEMENT No. 397

10. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.
11. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 02.
12. Prior to diversion of water under this rental agreement, the renter shall install and maintain a measuring device and lockable controlling works of a type acceptable to the Department as part of the diverting works.
13. Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. Memorandum

To: Water Rights 2-40, 2-7061, 2-7062, & 2-10471

From: Justin Ferguson

Date: April 10, 2020

Re: Water Supply Bank Rental Application 1620

Purpose/Narrative: An application was received by the Department January 11, 2020 requesting a rental of water rights 2-40, 2-7061, 2-7062, & 2-10471 by the Grand View Mutual Canal Company for a full five years. The rental was submitted as a continuation of their previous 2015 rental requesting additional water for conveyance loss. On the previous rental agreement the applicant had requested two additional water rights, 2-2176A & 2-2405A, for a total of 7.07 cfs and 1551.5 af. This application was submitted for only the four above with a reduced rate of 5.36 cfs and 1171.5 af. Water rights 2-7061 & 2-7062 are only available through the end of 2020 so the rental will be limited to a single season unless other rights can be located to replace them for a longer term.

It may be of note, since the rental is for conveyance loss, the total loss through the canal may have decreased since the applicant has requested less water than previous years. At this time it is not known if the canal has been lined or other measures have been taken to prevent loss of if the previous estimate of 7.07 was incorrect. Should the applicant apply again, for a larger quantity of water, the increase in conveyance may warrant explanation. Further, this rental is not intended to increase the total acreage irrigated by the users of the canal system. IDWR is obligated to prevent injury to the Trust Water and any Minimum Streamflow rights within the area and, should the rental increase the acreage, there could be injury and decreased flows within the Snake River.

The applicant has submitted the application with a map outlining approximately 350 acres however, as the water is intended as conveyance loss the rental will be limited to 270 acres within the 350 acre permissible place of use.

Authority to File: The application was signed and submitted by Randy Hipwell on behalf of the Grand View Mutual Canal Company. Review of the Idaho SOS information shows Mr. Hipwell as an authorized agent for the Canal Company. No concerns at this time.

Water Right Validity/Forfeiture Evaluation: The leased water rights are in the Bank and available to be rented. No concerns about its validity.

Injury Evaluation: No injury is apparent as the water does not appear to increase consumptive use of the Snake River or Trust Water areas and is intended to stay within the canal system for conveyance loss.

Enlargement of Use: No enlargement is apparent through the rental as the applicant intends to use the water to prevent conveyance loss through their canal system. Further, they submitted a map prepared by Clay Webster, formerly of IDWR, as their specific place of use such that there is not enlargement.

Local Public Interest: Staff are unaware of any local public interests that are averse to the rental.

Beneficial Use/Conservation of Water Resources: The rental appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster and IDWR Eastern Region comments were requested February 24, 2020

Water Supply Bank Evaluation: Bank staff recommend the approval of this rental through 2020.
