3. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
4. 004 This right does not grant any right-of-way or easement across the land of another.
5. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

7. 196 The right holder shall install or construct a straight length of conduit or ditch suitable for installation of a device for measuring the entire flow of water being diverted in connection with this right. If the right holder uses conduit, the straight length of conduit shall be at least fifteen times the diameter of the conduit and shall be above ground or otherwise easily accessible.

The right holder shall provide the Department with a plan for monitoring-reporting aquifer levels, diversion flow rates, and volumes. The monitoring-reporting should occur in parallel with land development and production and should include identification of non-production wells and timelines for measuring and reporting. The right holder shall not divert water in connection with this right until the plan is approved by the Department. Failure to comply with the plan once it is accepted shall be cause for the Department to cancel or revoke the right.
