Subj: Drawdown of Larkey Dam Pool - 1994

The annual drawdown and dewatering of Larkey Dam Pool is scheduled to start on March 24th and run until April 8th when refill and return to normal operations should be complete.

This two-week period is to allow a dry out and dieback of the water weeds, to allow dam inspection, and to allow a deposited sediment volume measurement. Normal winter inflows will not be changed into Loggers Creek and both the drawdown and refill will be done over a period of time long enough to minimize flow changes below Larkey Dam and allow fish escape from Larkey Pool.

If you have any questions, please call at 384-0687.
