Complaint of Larkin by Cafferty

- with Patrick Cafferty,
Larkin = out of state owner

Cafferty recommended AT 63-3422B V.2 (License)

S. FK Rubie Ck } .12 cfs 14 Ac. in
Schonover gulch } 1964 priority

Not enough flow to fill right, most of pln dry.

Larkin

63-12602 (Permit)

Spring .02 cfs D/I internal
.02 cfs fire prot. (only for actual fire)
.02 cfs total

these pln
upstream from
Cafferty's PFD's
at S FK Rubie Ck

unimproved stream 63-12603 (Permit)
Same as above

both 2000 priority

No diversions further upstream above Larkin's

Used forest road to view Larkin's place.

Cafferty said Larkin uses - part time trailer/camp for D/I.

- portable pump for creek
- 1" white PVC pipe for spring

observed this just above forest road. Open discharge today.

Said Larkin attaches portable pipe to use this pln when on-site.

→ Best solution - informal neighborly approval
Other " - watermaster contact ... what would this include?

Both Larkin pld require written denial for Wm
control upon notification by trustee.

→ Require this now to urge informal response to solve?

Letter e suggestions, formal v informal etc.
cc Wm

if Coffey thinks his drop < 1964, needs do
something in SRBA to claim, validate, protect
trust
