Subject: Boise River Storage Water Accounting, Water Year 2009

Dear Mr. Barrie:

Following the completion of the final water accounting of reservoir storage for the Boise River by the Idaho Department of Water Resources, this data was reviewed by Mr. Rex Barrie, District No. 63 Watermaster, and representatives of the Boise Project Board of Control and the U.S. Bureau of Reclamation, Mr. Paul Deveau and Mr. Brian Sauer, respectively. The 2009 accounting shows that the storage accounts for the three mainstem Boise River reservoirs were filled on the following dates:

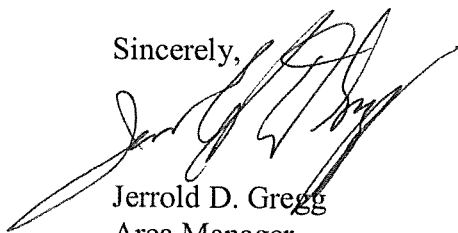

Arrowrock - April 3, 2009
Anderson Ranch - May 29, 2009
Lucky Peak - May 25, 2009

Also, the maximum storage for the three reservoirs occurred on June 18, 2009, with a total of 931,618 acre-ft. stored in the three reservoirs.

Base upon this information, no storage accounts were negatively impacted by the 2009 flood control operations.

Questions regarding this information may be referred to Mr. Brian Sauer, Water Operations Manager, Bureau of Reclamation, Snake River Area Office, 230 Collins Road, Boise, ID 83702, or via telephone at 208-383-2282.

Sincerely,

Jerrold D. Gregg
Area Manager
