Right Acre Limit: 90.0

POU Total Acres: 330.0

**CONDITIONS OF APPROVAL**

1. This right is limited to the irrigation of 90 acres within the authorized place of use in a single irrigation season.
2. Rights 45-14377, 45-14379, 45-14381, and 45-2363 when combined shall not exceed a total diversion rate of 2.73 cfs, and the irrigation of 90 acres.
3. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 140.
4. Rights 45-660, 45-663, 45-680, 45-688, 45-2363, 45-14377, 45-14379 and 45-14381 when combined shall not exceed a total diversion rate of 7.53 cfs and the irrigation of 330 acres.

**WATER RIGHT NO. 45-2363**  
**As Modified by Transfer No. 83910**

**CONDITIONS OF APPROVAL**

5. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
7. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Idaho Code § 42-222 or other Department approval.
8. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than May 6, 2005.
9. Use of this right is combined with water from Mill Creek.
10. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
11. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
12. Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

**CONDITIONS OF APPROVAL**

6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
7. Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
8. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
9. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
10. Pursuant to Idaho Code § 42-1412(6), this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as determined by the Snake River Basin Adjudication court in the final unified decree entered 08/26/2014.

### **CONDITIONS OF APPROVAL**

1. This right is limited to the irrigation of 78.2 acres within the authorized place of use in a single irrigation season.
2. Rights 45-14377, 45-14379, and 45-14381 when combined shall not exceed a total diversion rate of 1.73 cfs and the irrigation of 90 acres.
3. Rights 45-14377, 45-14379, 45-14381, and 45-2363 when combined shall not exceed a total diversion rate of 2.73 cfs, and the irrigation of 90 acres.

5. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 45A.

Transfer No. 83910

**WATER RIGHT NO. 45-14377**

**As Modified by Transfer No. 83910**

**CONDITIONS OF APPROVAL**

6. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
7. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
8. Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
9. The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.

## APPLICATION FOR TRANSFER OF WATER RIGHT PART 1 Continued

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Groundwater diversions have a full profile magnetic flowmeters in place. Surface water regulated by 45-A watermaster. Mainline from Robinson well will be connected to the G5 mainline that roughly follows the Mill Creek channel. Mainline system will be extended to the two new pivots in section 2.

- b. Who owns the property at the point(s) of diversion? Nathan Robinson (GW diversion)

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:  
See attached documentation describing purchase of well.

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?

If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: \_\_\_\_\_

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

If yes, ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:

Lands where water is transferred from will be dried and used for rangeland.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

All rights associated with lands are included in this combination.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Section 42-1412(6), Idaho Code.
2. C22 Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.
3. E55 USE OF THIS RIGHT WITH RIGHT NO. 45-688 IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 166 ACRES IN A SINGLE IRRIGATION SEASON.

Conditions of Approval:

1. X27 This right is limited to the irrigation of 90 acres within the authorized place of use in a single irrigation season.
2. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
3. 104 If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
4. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
5. 208 Rights 45-2363, 45-14377, 45-14379, and 45-14381 are limited to the irrigation of a specific 90.0 acres within the 113.0 acre place of use authorized by this right in a single irrigation season. The specific 90.0 acres to be irrigated by the right holder are shown in the electronic shape file associated with these rights in the geographic information system component of the water rights database maintained by the department. Before changing the 90.0 acres to be irrigated within the 113.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
6. 065 The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
7. X61 The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than May 6, 2005.
8. S21 Use of this right is combined with water from Mill Creek.
9. X35 Rights 45-14377, 45-14379, 45-14381, and 45-2363 when combined shall not exceed a total diversion rate of 2.73 cfs, and the irrigation of 90 acres.
10. R64 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
11. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
12. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
13. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 140.

1. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
2. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
3. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
4. R64 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
5. 206 Rights 45-14377, 45-14379, 45-14381, and 45-2363 are limited to the irrigation of a specific 90.0 acres within the 113.0 acre place of use authorized by these rights in a single irrigation season. The specific 90.0 acres to be irrigated by the right holder are shown in the electronic shape file associated with these rights in the geographic information system component of the water rights database maintained by the department. Before changing the 90.0 acres to be irrigated within the 113.0 acre place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur. Additionally when only the 12/31/1879 priority water rights are deliverable and in rotation the water user shall identify to the watermaster which specific 35.9 acres will be irrigated.
6. X35 Rights 45-14377, 45-1437, 45-14381, and 45-2363 when combined shall not exceed a total diversion rate of 2.73 cfs, and the irrigation of 90 acres.
7. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 45A.
8. X27 This right is limited to the irrigation of 35.9 acres within the authorized place of use in a single irrigation season.
9. X35 Rights 45-14377, 45-14379, and 45-14381 when combined shall not exceed a total diversion rate of 1.73 cfs and the irrigation of 90 acres.
10. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
11. C22 Priority of appropriation shall give the better right as among those using the surface and ground waters of Mill Creek, Warm Springs, Spring Creek, Summit Creek, and their tributaries, and rights having the same priority date shall share equally in the available water supply in a manner that will equally apportion all natural channel losses among rights having the same date of priority. For example, if there are seven points of diversion from the natural channel, which have the same 1879 date of priority, and the flow in the stream is equal to one-half of the amount of flow necessary to fully satisfy all of the 1879 priorities at their respective points of diversion, then the diversion rates at each of the seven points of diversion shall be reduced by one-half. A pro rata sharing of the water in the stream shall continue to be enforced among rights of equal 1879 priority until the watermaster shall have determined that water in the stream is inadequate to reach a downstream 1879 point of diversion in a sufficient quantity to be applied to beneficial use. Thereafter, upstream 1879 appropriators who are still able to receive water in a sufficient quantity to be applied to beneficial use shall continue a pro rata sharing of the water in the stream.

1.3 This Easement is described on Exhibit A.

**2. EASEMENT:** In consideration of the Contract of Sale between the Grantor and the Grantee as to certain Water Rights the Grantor grants and conveys to the Grantee, its successors, assigns and licensees, a 50-foot Easement and Right-of-Way for the purpose of laying, constructing, operating, inspecting, maintaining, repairing, replacing, substituting and removing a pipeline for the transportation of water in, over and through the premises in Cassia County, Idaho, described on Exhibit A.

1           3.     INGRESS & EGRESS: Grantee shall have the right of ingress and  
2 egress to and from the Premises adjacent to the Right-of-Way for any and all purposes  
3 necessary or convenient to the exercise by Grantee of the rights granted in this Agreement  
4

5           4.     RESERVATION BY GRANTOR: Grantor reserves the right to use and  
6 enjoy the Premises to the fullest extent possible as herein provided without unreasonable  
7 interference with the exercise by the Grantee of the rights granted in this Agreement.  
8

9           5.     BURYING PIPELINES AND USE RESTRICTIONS: The parties  
10 further agree:

11               5.1     Grantee, by acceptance of this Agreement, agrees to bury the  
12 pipeline, or pipelines, so that they will not interfere with the ordinary cultivation of the  
13 Premises and at a depth of at least six (6) feet to top of the pipeline or pipelines.

14               5.2     The Grantor agrees that the land over the pipeline may be used by  
15 the Grantor for any purpose that does not interfere with the pipeline or pipelines and so  
16 long as there is not installed or constructed on the Easement any permanent structure that  
17 would interfere with the access to the pipeline or pipelines by the Grantee. Any trees,  
18 shrubs, fences, etc., planted or installed on the Easement are at the risk of the Grantor and  
19 the Grantee shall not be responsible for their removal in the event it is necessary to  
20 remove the same in the use of the Easement by the Grantee and its licensees.  
21

22               5.3     Except in an emergency, the Grantee shall reasonably notify, either  
23 orally or in writing, the Grantor or the successors and assigns of the Grantor of any  
24 intended action in the exercise of the rights under this Easement that would involve  
25 excavation, trenching or similar activity.  
26

1           6.     **ATTORNEY FEES:** The prevailing party in any action arising under this  
2 Agreement shall be entitled to reasonable attorney fees in addition to all other relief  
3 afforded by the court.  
4

5           7.     **EASEMENT RUNNING WITH THE LAND:** The Right-of-Way  
6 hereby granted in this Easement Agreement shall be deemed an Easement running with  
7 the land and shall be binding upon the Grantor and the successors and assigns of the  
8 Grantor in the Premises.

9           8.     **TERMINATION:** This Easement may be terminated by the Grantor, or  
10 the successors in interest of the Grantor and the Grantee, or its successors and assigns, by  
11 an instrument in writing signed by the respective parties and recorded in the office of the  
12 County Recorder, County of Cassia, State of Idaho.  
13

14           9.     **SUCCESSORS AND ASSIGNS AND ASSIGNMENT:** This  
15 Agreement shall be binding upon the parties, their successors and assigns, and the rights  
16 and easements granted in this Agreement shall be assignable together or separately and in  
17 whole or in part.  
18

19           10.    **COSTS AND EXPENSES:** The Grantee shall pay all costs and expenses  
20 incident to the performance of the installation, maintenance, replacement and purpose of  
21 the pipeline or pipelines, and to save the Grantor, their successors and assigns, harmless  
22 from any such costs and expenses and shall not allow any lien or liens to be filed against  
23 the Premises for costs and expenses incurred under the terms of this Agreement for the  
24 pipeline or pipelines.  
25  
26

1           11.    **REPRESENTATION**: The Grantor represents that the Grantor has legal  
2 right to execute this Agreement and that any subordination of any lienholder in and to the  
3 Premises has been obtained.  
4

5           12.    **INSTALLATION OF PIPELINE**: The pipeline or pipelines will be  
6 installed in a workmanlike manner and when installed, the trench will be compacted to the  
7 grade of the land that it was before the trench was excavated. This is a continuing  
8 obligation of Grantee and should the grade not be maintained because of improper  
9 compaction or maintenance on the pipeline or pipelines and the trench, then Grantee will  
10 repair the same.  
11

12           13.    **DEFAULT**: If the Grantee defaults in the performance of its obligations  
13 under this Agreement, the Grantor shall give the Grantee thirty (30) days notice in writing  
14 of the claimed default and the Grantee shall have such thirty (30) day period to cure any  
15 default that may exist provided however, that if such default cannot be cured within said  
16 thirty (30) day period because of the inability to cure the default because of labor and  
17 material unavailability then in such event the Grantee shall have a reasonable time  
18 thereafter to obtain materials and labor for the curing of the default.  
19

20           14.    **ENTIRE AGREEMENT**: This Agreement constitutes the entire  
21 understanding of the parties and that all prior negotiations and representations are deemed  
22 merged herein. This Agreement may only be modified in writing by the Grantor and  
23 Grantee, or their successors and assigns, and recorded in the office of the County  
24 Recorder, County of Cassia, State of Idaho. There shall be no oral modifications of this  
25 Agreement.

**CONTRACT OF SALE**

AGREEMENT MADE this 3rd day of September, 2019, by  
NATHAN ROBINSON, a single person as his sole and separate property, of Box 118,  
Oakley, Idaho 83346 ("SELLER") and G5 LAND COMPANY, L.L.C., of 1310 South  
600 West, Oakley, Idaho 83346 ("BUYER").

1. **RECITALS**: The recite and declare:

1.1 The Seller owns five (5) Water Rights, namely: 45-2363, 45-  
14377, 45-14379, 45-14381 and 45-11747, along with an eight tower Zimmatic Pivot SS#  
LD2463 and a 75 h.p. Layne Pump SS# L14050, herein called the ("WATER RIGHTS &  
EQUIPMENT").

2. **SALE**: The Buyer desires to buy the Water Rights and Equipment and the  
Seller is willing to sell the same to the Buyer.

3. **TERMS**: The parties have agreed on the buy and sell under the terms and  
conditions of this Agreement that follow.

4. **SALE**: The Seller shall sell to the Buyer the Water Rights and Equipment  
for cash in the amount of The purchase price shall be deposited in the Trust  
Account of Parsons, Smith, Stone, Loveland and Shirley, LLP to be disbursed subject to  
other terms of this Contract.

5. **PAYMENT**: Upon the approval of the transfer of the Water Rights to the  
Buyer and a Bill of Sale to the Equipment and the Easement from the Seller the firm of  
Parsons, Smith, Stone, Loveland and Shirley, LLP is instructed to pay the to

1 the Seller, assuming there are no liens on the Water Rights and/or Equipment or any other  
2 impairments.

3  
4 6. EASEMENT: As further consideration for the purchase price the Seller  
5 will execute an easement to the Buyer described on Exhibit A attached hereto and  
6 incorporated herein by reference for the purpose of installing an underground pipeline that  
7 joins another pipeline of the Buyer.

8  
9 7. WARRANTY: The Seller warrants that he has good title to the Water

**PART 1 Continued**

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Groundwater diversions have a full profile magnetic flowmeters in place. Surface water regulated by 45-A watermaster. Mainline from Robinson well will be connected to the G5 mainline that roughly follows the Mill Creek channel. Mainline system will be extended to the two new pivots in section 2.

- b. Who owns the property at the point(s) of diversion? Nathan Robinson (GW diversion)

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:  
See attached documentation describing purchase of well.

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? **If yes,** ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien: \_\_\_\_\_

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank?

**If yes,** ☐ complete Attachment WSB.

- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:  
Lands where water is transferred from will be dried and used for rangeland.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:  
All rights associated with lands are included in this combination.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

**Yes No**

# APPLICATION FOR TRANSFER OF WATER RIGHT

## PART 3

**A. PLAT MAP (See Part 3A of Instructions for application for transfer for complete requirements.)**

- ☐ Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a**.
- ☒ If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System ([GIS](#)) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

### B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a**.

### C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

- ☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b**.

Describe how the supplemental water rights have been used historically in conjunction with other water rights at the existing place of use. Describe the time during the irrigation season that the supplemental rights have been used. Include information about the availability or reliability of the primary right(s) being supplemented, both before and after the change. If the applicant is proposing to change a supplemental irrigation right to a primary right, provide the information requested on Part 3B above:

**Transfer Approval Notice**

Dear Water Right Holder and other Interested Persons:

The Department of Water Resources has issued the enclosed approved Transfer of Water Right(s). Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Transfer of Water Right(s) is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

ANY PERSON aggrieved by any decision, determination, order or action of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Department and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

If the transfer approval includes a condition requiring measuring and recording devices, such devices shall comply with specifications established by the Department. Detailed specifications are available on the Department's home page on the Internet, or you can request a copy by contacting any office of the Department. Please be sure to thoroughly review the specifications to avoid unnecessary costs for reinstallation or modification due to non-conforming or improperly installed devices.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at (208) 736-3033.

Sincerely,

Corey Skinner  
Southern Regional Manager

## **EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER**

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

### **PETITION FOR RECONSIDERATION**

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

### **EXCEPTIONS AND BRIEFS**

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

### **REQUEST FOR HEARING**

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

### **ORAL ARGUMENT**

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

## **CERTIFICATE OF SERVICE**

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

## **FINAL ORDER**

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

## **APPEAL OF FINAL ORDER TO DISTRICT COURT**

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

## MEMORANDUM

**Date:** March 30, 2020  
**To:** Transfer 83910  
**From:** Bill Mills  
**Re:** Evaluation of Sufficiency of Information Submitted

---

Application proposes rearranging acres under 4 irrigation water rights and moving 4 irrigation water rights the applicant intends to purchase to create a combined 330 acre place of use (POU) for all 8 water rights. Approximately half of the ground in the POU (157.4 acres) is on new property the applicant recently acquired. All rights when combined will be limited to a diversion rate of 7.53 cfs and the irrigation of 330 acres. There will be no changes to the points of diversion for the water rights. The proposed place of use is located approximately 1.5 to 2.3 miles east and 1.5 miles south to 1.5 miles north of the center of Oakley.

The new grounds in the proposed POU are located in the NW1/4, NWNE, SWNE, SENE, and NWSE of Sec. 2, Twp 14S, Rge 22E and the water rights the applicant is purchasing and moving to this ground are currently utilized on adjacent grounds in the SWNE, NESE and NWSE of Sec. 35, Twp 13S, Rge 22E.

The water rights the applicant will acquire upon finalization of a contract of sale post transfer approval are as follows:

45-2363, for 1.0 cfs and 308.0 af for irrigation using ground water

45-14377, 0.32 cfs of irrigation using Mill Creek water

45-14379, 1.3 cfs of irrigation using Mill Creek water and

45-14381, 0.11 cfs of irrigation, 0.02 cfs and 1.2 af stockwater using Mill Creek water

The PODs and POU are located in Water District 45A and Water District 140. Watermaster comments were solicited. The Watermaster of Water District 45A did not oppose approval of this application and the Watermaster for Water District 140 did not provide comments.

This application only rearranges acres in the current POU and/or shifts acres to lands adjacent to current POUs and there is no actual hydrologic change. Therefore, pursuant to Section 42-222, Idaho Code, this transfer can be processed and approved without advertising.

- **Authority to File:** Applicant is listed as the current owner of water rights 45-660, 45-663, 45-680 and 45-688 and IDWR records indicate that the applicant owns the properties this group of rights are currently appurtenant to. A warranty deed was provided indicating the applicant owns the grounds that are proposed to be added to the place of use. A copy of the contract of sale was provided for water rights 45-2363, 45-14377, 45-14379 and 45-14381. The contract specifies that upon approval of the transfer application the applicant will finalize purchase of the water rights.
- **Water Right Validity:** Water rights 45-660, 45-663, 45-680 and 45-688 were decreed in the SRBA on 5/6/2005. Water rights 45-2363, 45-14377, 45-14379 and 45-14381 were decreed in the SRBA on 1/8/2007. Recent aerial imagery indicates grounds associated with the water rights appear irrigated.
- **Injury to Other Water Rights:**  
None anticipated.
- **Enlargement of Use:**  
None anticipated.
- **Local Public Interest:**  
No issues anticipated.
- **Beneficial Use/Conservation of Water Resources:**  
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**  
None Anticipated.
- **Effect on Agricultural Base of the Local Economy:**  
None Anticipated.

**Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing**

Dear Brian:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. A copy of the application is enclosed for your reference. You can also find additional information related to this application at:

<https://idwr.idaho.gov/apps/ExtSearch/WRAJSearch/WRADJSearch.aspx>. Please review the application, then complete the enclosed recommendation form and return it to this office within 21 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR can finish reviewing an unprotested application as soon as the protest period has past. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 21 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.

Sincerely,

Whoops, my bad. Sorry about that, my apologies. I overlooked that as I was focused on the pivot. You're correct. I think we're good then. I do need you to either send in the original signed copy of the application with the map or bring it in. I'll start processing the application, once we have the original signed copy we should have all we need. Thanks for getting it all together for us.

Subject: RE: Application for transfer water Rights

Ryan,

The map looks great! I hate to be a stickler, but the map and the acres on the transfer don't quite match and they need to for the application to be acceptable for processing. The transfer application indicates the pivot still slightly overlaps into the SENW1/4 by 0.4 acres (which would be okay based on parcel ownership) but the map shows the pivot completely out of the SENW1/4. The Department requires the shape on the map and the acres on the transfer application to match for an application to be acceptable. If the map was changed to match the acres on the application, or if the application was changed to match the map, either scenario would work for us.

Thanks,

Bill

Bill,

Here you go. I hope this finally does the trick.

Thanks for the help on this.

Ryan,

That would be great. However, We'll also need a new signed transfer application that reflects the actual shift in acres under that pivot because the acres in the place of use will change as the pivot moves. Currently, the transfer application indicates there are 3.4 acres in the SENW (partially on Matthews property) and I'm assuming those acres will move to the east into one or up to three or four quarter/quarter tracts depending on how the proposed pivot is shifted.

Thanks,

Bill

Bill,

I see the error, whoops. Do you want me to send you a new map with the change or can you just shift the pivot to the east so that it is off the Matthews property? Just let me know.

Thanks,

Ryan Cranney

JaNice,

The deeds and the letter from D.L Evans were very helpful, and they resolved the majority of the issues with this application for transfer. However, there is one minor issue that remains to be addressed. The small pivot proposed on the south end overlaps what appears to be Blake Matthews property (see attached map) by 3.4 acres in the SENW1/4 of Section 2, Township 14 South, Range 22 East. Unless, there is another warranty deed that covers that land, we will need some kind of permission from the current land owner to proceed with the transfer. I can write a water sharing agreement that would need to be signed by the property owner and Ryan, that would resolve the issue. Or we can shift the pivot to the east so it is completely on G5 lands and amend the transfer application. Should I call Ryan?

Thanks,

Bill Mills

Here is the permission from lien holder, so this should complete everything you were needing. I hope!

Thank you

Attached please find the warranty deed and water rights change, for 45-2363, 45-14377, 45-14379, 45-14381, 45-663, 45-680, 45-660, and 45-688.

We are still working on the permission from the lien holder, so as soon as we have that we will also send it right over.

If you have any questions please give me a call.

Thank you

RE: Application for Transfer for Water Rights 45-2363, 45-14377, 45-14379, 45-14381, 45-663, 45-680, 45-660 and 45-688

Dear Mr. Cranney:

This letter is in reference to an application for transfer that you submitted to the Department on 2/18/2020. Review of the application indicates it is incomplete as submitted and cannot be processed without additional documentation. We will hold the application for 30 days to allow you time to submit the required items. The required information is described below.

No proof of ownership or permission from the property owner, such as a copy of a warranty deed or a water sharing agreement, was provided for the new ground where portions of the water rights are proposed to be moved to. The lands in question are located in the NWNW (Government Lot 4), SWNW and the SWNE of Section 2, Township 14 South, Range 22 East, B.M.

I will hold the application for transfer for 30 days to allow you time to provide the requested documentation. If no documentation addressing the ownership of the property and or permission to irrigate the property is received in that time frame, the application for transfer will be returned to you and the submitted application filing fee will be refunded to Cranney Farms (\$1060.00, receipt #S037774).

Sincerely,

A handwritten signature in blue ink, appearing to read 'Bill Mills'.
