Memorandum

To: Water Right 37-2244A
From: Justin Ferguson
Date: January 7, 2020
Re: Water Supply Bank Lease Application 1536

Purpose/Narrative: Mr. Rice submitted an application to the Department to lease portions of water right 37-2244A into the Water Supply Bank on December 16, 2019 for a five year duration. The application listed a start date of 2019 but the previous lease was still active for that year. This contract will be executed for 2020 through 2024. The place of use for this right is overlapped by no. 37-21840.

At this time it is not necessary to lease an equal portion of both rights as 37-21840 was decreed for irrigation from storage and can be concentrated down onto the smaller acreage Mr. Rice intends to continue to irrigate. I spoke with Mr. Rice on March 16, 2020, he is not going to irrigate the acreage being offered for lease with the storage water. Because we can be reasonably assured that Mr. Rice will not irrigate we can lease 37-2244A without an equal portion of 37-21840 as there will be no enlargement.

Authority to File: This application was prepared and submitted by Mr. Jim Rice. Review of the IDSOS information shows Mr. Rice and the president of Gwinn Rice Ranch Inc and a review of IDWR records indicates that Gwinn Rice Ranch is the current water right owner. No concerns about the authority to file.

Water Right Validity/Forfeiture Evaluation: This right was initially decreed in 2010 and has had these same portions placed in the Bank beginning in 2015 through the end of 2019. No concerns of validity or forfeiture at this time.

Injury Evaluation: No injury is apparent through the lease alone, proper rental review should protect against possible injury.

Enlargement of Use: Mr. Rice said the acreage being offered to the bank will not receive water from any other source for the entire lease duration.

Water right 37-21840 was decreed for irrigation from storage from a pond on the north end of his property, shared with Strom Ranches and coming from Francis Dam to the north. Idaho Code § 42-222 states the transfer of a water right for irrigation using stored water is not an enlargement even if more acres are irrigated, if not other rights are injure. By the similar logic water from storage can be used as the primary source to irrigate ground that was previously irrigated with both direct flow and storage water without it being an enlargement of the original right. Therefore, right no. 37-2244A can be accepted into the bank without requiring an equal portion of right no. 37-21840.

Local Public Interest: Staff are unaware of any local public interests that are averse to the lease.

Beneficial Use/Conservation of Water Resources: The lease appears consistent with the conservation of water resources in Idaho.

Department/Watermaster Comments: Watermaster and IDWR Southern Region comments were requested January 7, 2020. No response was received so it is assumed they had no concerns with this lease.

Water Supply Bank Evaluation: Based on the information presented by the applicant, staff recommend the application be approved.
