WATER SUPPLY BANK LEASE CONTRACT No. 1159

6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. This right is limited to the irrigation of 1188 acres within the authorized place of use in a single irrigation season.
13. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/1 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than 4/8/2008.
14. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
15. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 02.
16. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

13	<p>Narrative: The Department received this application on January 2, 2020. The applicant would like to place the entire right in the Bank. This right was split from 2-10449, which was split from 2-10433. 2-10433 was decreed in 2008 and place in the Bank in 2009 for an indefinite period, which was updated to the end of 2019. In 2011, transfer 77479 moved the POU to the current location. This right has ever been used on the current POU since it has been lease to the Bank. Water right 61-7096 (groundwater) overlaps this right and will continue to irrigate the land. 2-10472 also overlaps this right and is being placed in the Bank also. There are no combined conditions. This right is currently within WD 02.</p>
