Good Afternoon,

I have updated the application and map. I used the Boise county GIS map to approximate the acreage outlines. I believe I have the quarter quarter summaries correct, but if not I will fix them as needed. Thank you for your patience.

Good Morning,

I attached a scanned copy of the second page of your Application for Permit and the map outlining your proposed place of use boundary to this email. Please make the following corrections to your application and map and email me back a scanned copy of the application and map:

-
• 9 – Description of place of use:

- Please change the “total number of acres to be irrigated” from 28.5 to 9.
- Please update the table to reflect quarter-quarter sections of your new irrigated acres. (you may want to do this part AFTER drawing out your new place of use boundary on your map so you can see which quarter-quarter sections the new place of use will fall under)
- Please date & initial each change.

-
• 14- map of proposed project

- Please draw approximately where you plan to irrigate your 9 acres.
- Please date & initial this change.

Once we receive these corrections, the Department will continue processing your application. Since we are decreasing the irrigated acres from the amount advertised, we will not need to re-advertise this application.

-

Please do not hesitate to contact me with any further questions.

-

Thank you for your attention to these matters!

Anna

MEMORANDUM

TO: Water Right File 65-23857
FROM: Anna Kaiser
DATE: 1/10/2020
SUBJECT: Diversion Rate Adjustments

On 11/15/2019, The Department of Water Resources (Department) received Katherine and Joshua Dace's application for permit proposing an irrigation rate of 0.57 cfs and a domestic rate of 0.08 cfs. The applicant proposes to divert through an existing well pumping at a rate of 40 gpm. This rate matches the well log for well D0082744. 40 gpm equals a diversion rate of 0.09 CFS. Admin Memo #22 limits the domestic rate for two homes to 0.06 cfs.

Via telephone conversation on 1/10/2020, Dace's representative Lawrence White Engineering clarified the applicant's selected diversion rate as follows:

The applicant(s) plan to use the well diversion rate of 40 gpm (or 0.09 cfs) to irrigate their property.

It is recommended the Permit No. 65-23857 be approved with an irrigation rate of 0.09 cfs and a domestic rate of 0.06 cfs with a total rate of 0.09 cfs to reflect the described well and the stipulations of Admin Memo #22.
