WATER RIGHTS AND TRANSFER AGREEMENT

This agreement is made on the ____ day of July, 2002, among (a) Jacob A. Bloom and Ruth Bloom, individuals, ("Blooms") (b) Wood River Properties, Inc., a California Corporation, and Harry S. Rinker Trust, by Harry S. Rinker, Trustee, ("Rinker"), and (c) Riverview Cloverly Irrigation, Inc., a Idaho Corporation, ("Riverview").

The parties each agree, that in exchange for the promises, performance and other consideration given by the other parties through this agreement, to the following:

1. Purposes and Scope of the Agreement.

This agreement resolves disputes and concerns among the parties to it relating to the nature, extent, and ownership of certain water rights in which the parties claim an interest.

The water rights covered by this agreement include a groundwater right identified by the Idaho Department of Water Resources ("IDWR") and the parties to this agreement as right number 37-02640A and surface water rights identified as right numbers 37-00521B, 37-00522B, and 37-00523B.

The agreement does not cover other water rights the parties may hold an interest in, including without limitation, other rights that are used in conjunction with or on the same places of use as the water rights covered by this agreement.

The agreement also resolves disputes and concerns about the use and transfer of the rights covered, including by imposing on each party the obligation to cooperate in, and not object to, the transfers of the rights in proceedings before the IDWR pursuant to I.C. 42-222 and other law applicable to such proceedings.

2. Quit Claim and Transfer of Portions of 37-02640A.

The parties forever resolve and settle any claims, known or unknown, to and interests in water right 37-02640A by agreeing that ownership and other interests in it be apportioned and transferred as follows:

- ✓ A. A total of seven miners inches (0.14 cfs) of this right will be conveyed from Rinker to Blooms by quit claim deed for irrigation use on seven (7) acres of land within Lots 2 and 3 of Riverview Ranches Subdivision, which is located in Blaine County, Idaho. A transfer of this part of the right will be filed with IDWR to establish the places of use, amount, and point of diversion within those Lots.
- ✓ B. A total of three additional miners inches (0.06 cfs) of this right will be conveyed from Rinker to Blooms by quit claim deed for irrigation use on three acres of land comprising the entry area to Riverview Ranches Subdivision located on the eastern

part of Lots 1 and 2, Riverview Ranches Subdivision. A transfer of this part of the right will be filed with IDWR to establish the places of use, amount, and point of diversion within those Lots. The parties acknowledge that the groundwater rights currently owned by Joyce E. Gordon are not appurtenant to the entry area of Riverview Ranches Subdivision.

- C. The remaining two (2) miners inches (0.04 cfs) of this right that were appurtenant to Lot 2 of Riverview Ranches Subdivision for irrigation use and owned by Rinker may be transferred from that Lot to new places of use determined by Rinker. The parties agree, without admitting, IDWR may determine that this portion of the right is supplemental to and "stacked" with some or all of the surface water rights covered by this agreement. To the extent that the two (2) miners inches are stacked with surface water rights covered by this Agreement, Riverview agrees to transfer to Rinker those portions of the surface water rights that are "stacked" in order to facilitate Rinker's transfer of such groundwater. ✓
- D. The parties acknowledge that eleven (11) miners inches (0.22 cfs) of Water Right 37-02640A was conveyed by Corporation Grant Deed from Wood River Properties, Inc. to Joyce E. Gordon, dated August 6, 1999, and that nothing in this Agreement shall affect or alter said conveyance. A transfer of this part of the right will be filed with IDWR to establish the place of use, amount, and point of diversion within Lot 1, Riverview Ranches Subdivision.
- E. The parties acknowledge that eleven and one-half (11 1/2) miners inches (0.23 cfs) of Water Right 37-02640A was conveyed by Warranty Deed from Harry S. Rinker, Trustee to Ward W. Woods, Jr. and Priscilla B. Woods, dated April 20, 1990, and that nothing in this Agreement shall affect or alter said conveyance. A transfer of this part of the right will be filed with IDWR to establish the place of use, amount and point of diversion within Lot 4, Riverview Ranches Subdivision.

3. Present Quit Claim and Transfers of Portions of 37-00521B, 37-00522B, and 37-00523B.

The parties forever resolve and settle any claims, known or unknown, to and interests in water rights of 37-00521B, 37-00522B, and 37-00523B by agreeing that ownership and other interests in them be apportioned and transferred as follows:

- A. The IDWR regional staff has acknowledged a total historical irrigation of 83.6 acres of land west of the highway that is irrigated by the surface and groundwater rights identified in this Agreement. According to IDWR documentation, there are 34.6 acres of land west of the highway that are irrigated with groundwater right 37-02640A and 21.0 acres of land west of the highway that are irrigated with groundwater right 37-02640B and 37-02507B, and in those areas covered by such groundwater rights, the

surface water rights identified hereinabove are "stacked". There are twenty-eight (28) acres of land irrigated by surface water alone ("unstacked" surface water).

- B. All right, title and interest in the surface water rights, except as specifically provided in this agreement, shall remain in the ownership of Riverview for the benefit of the shareholders of its stock, including without limitation as described in the Articles of Incorporation, Bylaws, amendments and other documents and laws conferring rights and obligations on Riverview and its shareholders.
- C. A total of two (2) acres of irrigation use water of these surface water rights from the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 32 in Lot 2 of Riverview Ranches Subdivision will be conveyed from Riverview to Rinker by quit claim deed for re-conveyance by Rinker for use at the Little Makawao Subdivision property which is located near the confluence of the East Fork of the Big Wood River and the Big Wood River in Blaine County, Idaho. The quantity of water conveyed pursuant to this paragraph is 0.126 cfs, which quantity is in the proportion of the total quantity under these rights (4.92 cfs) divided by the total historically irrigated acres (83.6 acres). If, in any of the transfer proceedings contemplated by this Agreement, IDWR determines the per acre quantity of these rights is less than the per acre quantity being conveyed to Rinker pursuant to this paragraph, the quantity of conveyance for the two acres shall be reduced to no more than IDWR's per acre rate determination.

Blooms and Riverview agree, that in order to accommodate the transfer of two acres of water to Little Makawao Subdivision, IDWR may require that two acres of land that has been historically irrigated on Lots 2 or 3 of Riverview Ranches Subdivision be dried up. In that event, Bloom and Riverview agree to dry up two acres within those two Lots.

- D. Riverview agrees to convey to Rinker the "unstacked" portions of the above-¹ numbered surface water rights covering twenty three (23) acres to a location to be prescribed by Rinker. The same shall be conveyed to Rinker by quitclaim deed with no warranties. In quantity, the amount of water to be conveyed to Rinker will be the remainder of 4.92 cfs minus the sum of the conveyance loss, plus the per-acre irrigation duty of water times 23. The per-acre duty of water and conveyance loss figures to be used will be the highest figures approved by IDWR pursuant to the transfers mentioned in the preceding paragraphs. If, in the process of transferring these rights, IDWR determines the historically-irrigated acreage to be less than 83.6, the number of "unstacked" surface water acres conveyed to Rinker shall be reduced on an acre-for-acre basis and the diversion rate reduced accordingly.
- E. The parties acknowledge that the stockholder interest in water rights held by Riverview Cloverly Irrigation, Inc. was conveyed by Corporation Grant Deed from Wood River Properties, Inc. to Joyce E. Gordon, dated August 6, 1999, and that nothing in this Agreement shall affect or alter said conveyance or the quantities of water specified therein for use on Lot 1, Riverview Ranches Subdivision.

4. No Protests or Objections.

RE: **WATER SUPPLY BANK LEASE CONTRACT 1089
FOR WATER RIGHTS 37-22600, 37-22602, 37-22604**

Dear Lessor:

Water rights **37-22600, 37-22602, 37-22604** were leased into the Water Supply Bank (Bank) as of January 1, 2020, in accordance with the enclosed executed lease contract. **Your water rights, as described on the lease contract, are considered leased into the Bank and should remain unused until they are formally released from the Bank.** More information and further restrictions placed on your water rights while leased can be found in conditions of acceptance of the lease contract. Read the conditions of acceptance carefully.

The rights will automatically be released from the Bank on **December 31, 2024**, unless the rights are released earlier by the Water Resource Board (Board). On behalf of the Board, the Department of Water Resources (Department) can evaluate an early release of the lease contract upon your request. To release the water rights from the Bank prior to the release date, submit a written request on the *Request to Release a Water Right from the Bank* form. This form is available on our public website at www.idwr.idaho.gov. **Please note your water rights may not be available for immediate release if they have been rented or are being considered for a future rental. Furthermore, it is at the discretion of the Department whether or not a water right can be released early from a lease contract.**

If you have questions regarding this matter, please contact this office at bank@idwr.idaho.gov or 208-287-4800.

Sincerely,

for Water Supply Bank

Re: Lease applications for Harry S. Rinker Trust

Enclosed please find three (3) applications to lease 7.0 acres of water rights 37-22600, 37-22602, and 37-22604 to the Water Supply Bank for the 2020, 2021, 2022, 2023 and 2024 irrigation season. These rights are Big Wood River rights owned by Harry S. Rinker Trust, appurtenant to land 1 mile north of Hailey and west of Highway 75.

The three rights are wholly overlapping amongst themselves. They are currently appurtenant to land within the service area of Riverview Cloverly Irrigation, Inc. (RCI), but the rights do not overlap with rights owned by RCI and utilized by shareholders of the company. Furthermore, the rights are categorically not overlapping with any groundwater right, even though individual lot owners – shareholders of RCI – have their own private groundwater rights. IDWR's shape files may show overlap, but there is none.

A copy of the RCI agreement is attached. Please refer to Section 3, Paragraph D of the agreement. The 23 acres referred to in this paragraph represents the "unstacked" water – meaning water not stacked with groundwater – retained by Mr. Rinker under the agreement.

These same water rights and acre amounts have been leased into the Idaho Water Supply Bank since 2016.

If there are any questions on these issues, please do not hesitate to contact me.

Sincerely,

Greg Sullivan, M.S., Engineer
