Hello Mr. Miller:

Thanks for the explanation. I do not remember receiving the attached letter, but I understand.

When I get operational for the mining phase I will apply for either a permanent or if available temporary permit at that time. I have been working setting up a base camp on property I purchased in Secesh Meadow for the operation, which has extended longer than expected. As soon as this task has completed and I am ready to go operational I will contact your office for advice.

I have written a check to IDWR for the applications, could you have this check returned for my accounting disposition?

Again, thanks.

If you have any questions please contact my office.

Sincerely,
Tom

Mr. Blalock,

Patrick forwarded me your message and letter asking about the four applications for temporary water use. I have reviewed the applications and I see a letter we sent to you last year informing you that Department would not approve the same applications in future years. I have attached the letter for your reference.

I am prepared to deny the applications consistent with the letter, but I am also willing to approve them if I receive some assurance from you that you understand the applications will not be approved in future years and that you let me know whether you intend to file an application for permit to obtain a permanent water right.

Please let me know how you would like to proceed.

RE: Temporary Approval Nos. TP-77-73, TP-77-74, TP-77-75, TP-79-38

Dear Applicant(s):

Your application for a Temporary Approval of a Water Use has been approved and is enclosed. Please be advised the approval only authorizes the temporary use of water. It does not grant trespass or other activity on public land or on private property. Please note the conditions of approval to understand the limitations associated with the temporary use of water. The expiration date cannot be extended under this temporary approval.

Please note also that a temporary approval is intended to be used for a minor use of short duration and not for a use that requires a continuing water supply. Because this marks your 4th approval for the same use, your use of water appears to require a continuing water supply and should be authorized by a permanent water right. As such, future temporary water use approvals will not be granted for this use. Diversions for these mining claims past the expiration of this approval must be authorized by a permanent water right permit or license. For your convenience, an Application for Permit form is enclosed with this letter.

If you have any questions regarding this matter, please call me at 208-334-2190.

Sincerely,

Nick Miller
Manager
Western Regional Office
