Application for Permit: 63-34847

Author: abradbury

Subject: Comment/Analysis

The well driller sealed the well from 0 to 360 feet, but reported that the well was cased to 320 feet. The well log reported that manufactured stainless screen was installed from 320 to 420 feet and filter packed from 300 to 420 feet. There are obvious errors within the Well Drillers Report, therefore the correct water bearing zone cannot be accurately determined. However, a safe WBZ can be extrapolated to be 300 to 420 feet.
