2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. WATER SUPPLY BANK LEASE CONTRACT No. 1068

5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Water used under water right 29-7855 when discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.
13. When water used under water right 29-7855 is discharged into the natural channel, settling ponds must be maintained which are capable of reducing the silt load to such a level that the quality of water will not be impaired for other beneficial uses.
14. Industrial use is for a cement processing plant.

Narrative: The Department received the application for 29-4069 on Nov. 26, 2019, and the applications for the other rights on Dec. 10, 2019. The application were signed by Kelly Packard, who is the Terminal Manager of the Ash Grove Cement Co. Authorization was given by Curtis D. Lesslie, Vice President of Environmental Affairs. Water rights 29-4069, 29-7076 & 29-10029 were decreed in 2004 and 29-7855 was licensed in 1997. According the the review of the applications in 2015, the water rights were put to beneficial use as recent as 2012. The data is with the WSB Lease application received on 9/15/2014. An email from Bruce Newell, V.P Manufacturing Services, stated the water was used in different ways. Water was used then pumped to a retention pond and evaporated. No water was discharged back to the river. Therefore, these right should be considered 100% consumptive. According to the applications, the plant will continue to operate with water from the City of Inkom. Water right 29-10029 is within WD 29D.

Curtis:

Could you please file or have someone file the attached application with the Idaho Department of Water Resources for the following four water rights at the Inkom location? Bruce filed the applications the last time. A copy of a completed application is attached for reference. Each water right will need an application. Ash Grove has already paid the application fee of \$500.

I have submitted applications already for all the water rights. However, the State won't accept the applications because they don't have documentation granting me authority to sign as an official for the company.

We are running up to a deadline at the end of the month to file the applications.

The contact with the State is cc'd on this email.

Thanks

Thank you for submitting the lease applications for the additional water rights. I have one more issue. The Department will need documentation that allows you to sign on behalf of the Ash Grove Cement Co. You are not listed on the Idaho Secretary of States webpage as a registered agent or officer or director of the Ash Grove Cement Co or any of the registered agents. Thank you.

Dear Lessor:

The Department of Water Resources received applications to Lease Water Rights 29-4069 from you on November 26, 2019. While I was reviewing the application, I noticed that on question 4C, which says, "Describe any other water right used for the same purpose at the same place of use as the water right being offered to the Bank." Your response was, "All of the following rights are being offered to the water Bank: 29-10029, 29-7076, 29-7855 and 29-4069." The Department only received the application to lease water right 29-4069 to the Bank. If you would like to place water rights 29-10029, 29-7076, 29-7855 in the Bank, the Department will need a separate application, with an original signature, for each right. Applications can be found on our web page: www.idwr.idaho.gov.

Because the Department cannot process the Application to lease this water right without the information requested, we will hold any action on your application pending receipt of the necessary information. If we do not receive the necessary information within **14 days** the application will be denied because they cannot be processed without the requested information.

If you have any questions or no longer have an interest in the water right, please contact me at (208) 287-4800.

Sincerely,

Jean Hersley
