$$V = \text{Smaller of } V_{IR} \text{ and } V_{DR} =$$

2. Volume Calculations for Other Uses: Stockwater- 0 to 5 head. Based on Application Processing Memo #3.

**G. NARRATIVE/REMARKS/COMMENTS:** This right was permitted as a domestic right with ½ acre of irrigation but after corresponding with the permit holder, it is used only for stockwater. RE: Water Right Permit No. 85-15763

Dear Water Right Permit Owners:

The Idaho Department of Water Resources is in the process of reviewing your water right permit for licensing. The review process includes verifying development of domestic use in connection with the permit. This can be done by determining if a dwelling exists on the property in question. Aerial photography from Google Earth and the Department's mapping system does not show a dwelling on the property. The permit was issued for 1 home and a ½ acre of irrigation. Is there another structure, recreation vehicle or trailer on the property that is using the water for domestic purposes? If this is the case, please provide pictures of the structure, recreation vehicle or trailer that is using the water.

On the Statement of Completion or Proof of Beneficial Use (Proof) received by the Department, there is no mention of domestic use but there is mention of stockwater use for 0 to 5 cattle. If the water has been put to beneficial use for stockwater purposes, please mark on the enclosed map where the trough is located.

Please provide the requested information within thirty (30) days, or steps may be taken to void your permit.

If you have any questions, please contact me at (208) 287-4942.

Sincerely,

Jean Hersley
