

**STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES**

**TRANSFER OF WATER RIGHT
TRANSFER NO. 83182**

This is to certify that: **HIGH PLAINS LAND & LIVESTOCK LLC**
PO BOX 1428
TWIN FALLS, ID 83303-1428

has requested a change to the water right(s) listed below. This change in water right(s) is authorized pursuant to the provisions of Section 42-222, Idaho Code. A summary of the changes is also listed below. The authorized change for each affected water right, including conditions of approval, is shown on the following pages of this document.

Summary of Water Rights Before the Proposed Changes

<u>Water Right</u>	<u>Origin/Basis</u>	<u>Priority Date</u>	<u>Diversion Rate</u>	<u>Diversion Volume</u>	<u>Acre Limit</u>	<u>Total Acres</u>	<u>Source</u>

Transfer Approval Notice

Dear Water Right Holder and other Interested Persons:

The Department of Water Resources has issued the enclosed approved Transfer of Water Right(s). Please be sure to thoroughly review the conditions of approval and remarks listed on the approval document.

The Transfer of Water Right(s) is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless the APPLICANT petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

ANY PERSON aggrieved by any decision, determination, order or action of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Department and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

If the transfer approval includes a condition requiring measuring and recording devices, such devices shall comply with specifications established by the Department. Detailed specifications are available on the Department's home page on the Internet, or you can request a copy by contacting any office of the Department. Please be sure to thoroughly review the specifications to avoid unnecessary costs for reinstallation or modification due to non-conforming or improperly installed devices.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at (208) 736-3033.

Sincerely,

Corey Skinner
Southern Regional Manager

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was **not** held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "**Preliminary Order**" issued by the department pursuant to section 67-5243, Idaho Code. **It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:**

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

MEMORANDUM

Date: December 3, 2019
To: Transfer #83182, High Plains Land and Livestock, LLC Transfer File
From: Jim Bitzenburg
Re: Evaluation of Sufficiency of Information Submitted

Application for transfer proposes to change the nature of use, place of use (POU), points of diversion (POD), and period of use for a 0.06 cfs, 10.0 acre portion of irrigation water rights 47-2382, 47-17506, and 47-17507 which currently irrigate land located approximately 3.0 miles north and 10.9 miles west of the intersection of Main Street and Broadway Avenue in Buhl. The application proposes to change the nature of use and POU of these rights from irrigation during the irrigation season to year-round stockwater use at a CAFO located immediately adjacent to the currently irrigated land. The transfer proposes changing the POD for the converted portion from the currently authorized irrigation well to an existing well associated with the CAFO facility.

Because the transfer proposes changing the nature of use, period of use, place of use, and points of diversion within the Blue Gulch Critical Ground Water Area, the transfer was advertised. No protests were received.

The existing rights at the CAFO are 47-17505 (0.13 cfs, stockwater) and 47-17504 (0.13 cfs, stockwater).

The amount of water moving into the CAFO is 33.0 AF. In converting from irrigation to stockwater use, a consumptive use value is used instead of the 3.49 AF/acre available under the combined volume limit for the three rights (this value is less than the standard field headgate requirement of 4.0 in the area). In this case, it is derived from interpolating the evapotranspiration estimates between the Castleford and Hagerman National Weather Service sites and is based on Grass Pasture, high management, which is the crop that has been grown on the dry-up acres (FSA-578 form and maps included with application), and that value is 3.3 acre-feet/acre. The applicant proposes drying up 10.0 acres, so the volume removed from irrigation, 34.9 AF, will yield a volume moved to the CAFO of 33.0 AF.

Use of the 3.3 acre-feet/acre value was questioned by Southern Region and the representative responded by providing additional information in support of their reasoning. Southern Region then requested review of the situation by the IDWR State office. Their response was supportive of the Southern Region position that an efficiency factor should be applied to the authorized diversion volume of 3.49 AF/acre. The efficiency factor of 75% was based on the upper end of University of Idaho irrigation efficiencies for wheel line irrigation systems of the type used on the dried-up acres in this transfer. Application of the 75% factor to the authorized diversion volume of 3.49 AF/acre for the rights yields a consumptive use conversion of 2.62 AF/acre, instead of the 3.3 AF/acre, so the volume available to the feedlot in this transfer is 26.2 AF (10.0 acres at 2.62 AF/acre).

- **Authority to File:**

In the IDWR data base, High Plain Land & Livestock is shown as the owner of the land and water rights at the location where the water is being transferred from, and the CAFO where the water is being moved to. The application was signed by David Gandolfo, a member of High Plains Land and Livestock, LLC. The annual report form from the Idaho Secretary of State showing this is included with the application.

- **Water Right Validity:**

Right 47-2382 was decreed in the SRBA in 2009, and rights 47-17506 and 47-17507 were decreed in the SRBA in 2007. Aerial imagery appears to show recent irrigation, so forfeiture is likely not an issue.

- **Injury to Other Water Rights:**

None anticipated or foreseen. The CAFO well is less than 400 feet from the irrigation well.

- **Enlargement of Use:**
None anticipated. The 10.0 acres being transferred will be dried up and not irrigated.
- **Local Public Interest:**
No issues anticipated. The application was advertised with no protests.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated
- **Effect of the Agricultural Base of the Area:**
None Anticipated

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.

MEMORANDUM

To: Jim Bitzenburg, Angie Grimm
From: Manuel Rauhut
Date: August 7, 2019
Re: Transfers 83182 & 83184

Overview:

The table below provides an overview of the water rights associated with the proposed transfer.

WR#	Diversion Rate (cfs)	Diversion Rate Limit (cfs)	Volume (afa)	Volume Limit (afa)	POU (acres)	POU Limit (acres)
47-2382	1.34	1.34	568.4	568.4	225.1	170.9
47-17506	0.59	1.08	183.6	216.8	45.9	54.2
47-17507	0.69		216.8		54.2	
Combined	-	2.42	-	785.2	-	225.1

- Authorized annual diversion volume: 785.2 acre-feet/225.1 acres = 3.49 acre-feet/acre
- Authorized daily diversion volume: 2.42 cfs = 4.80 acre-feet/day
- Precipitation deficit at Hagerman (Grass Pasture-high management): 1,121 mm (3.68 feet)
- Precipitation deficit at Castleford (Grass Pasture-high management): 939 mm (3.08 feet)
 - Interpolated for the location 1,006.6 mm (3.30 feet)

The applicant hired JCH Engineering & Consulting, PLLC (JCH), who performed an analysis of consumptive water use proposed by transfer for water rights 47-2382, 47-17506, and 47-17507 (Transfer 83132 and 83184). The analysis was prompted by the February 6, 2019 letter from IDWR to High Plains Land & Livestock LLC (owner). In the letter IDWR addresses a potential enlargement concern with the proposed volume included with the transfer application. The applications proposed a consumptive use volume of 3.30 acre-ft per acre, which corresponds to the interpolated precipitation deficit at this location obtained through ETIdaho. The authorized annual diversion volume of 3.49 acre-feet per acre is below the normally allowed 4.0 acre-feet per acre in that area and is insufficient to meet the Consumptive Irrigation Requirement for pasture (assuming irrigation inefficiencies). This proposed annual volume of 3.30 acre-feet/acre is 95% of the authorized diversion volume of 3.49 acre-feet/acre. As stated in the letter, studies show that the efficiency of wheel-line irrigation systems is generally between 60-75%. Assuming the higher figure of 75% to the authorized rate of 3.49 acre-feet/acre would result to an amount of 2.62 acre-feet/acre. JCH's analysis shows that there could be feasible circumstances where essentially all the water applied to a crop is considered consumptive and supports this with simulations conducted with the Irrigation Scheduler Mobile tool developed at WSU.

Conclusions:

The analysis provided by JCH supports the premise that yield reduction due to water stress can have a minor effect (5%) when compared to crops given an unlimited amount of water. The simulations were based on an application efficiency of 75% (25% loss), which JCH acknowledges is considered typical for wheel and hand line irrigation systems. The analysis is not specific to the fields in question. A review of aerial imagery (NAIP and Google Earth) and Landsat photos show that the field in question (yellow outline) was irrigated in 2017 and in 2018 (see Attachment). The Landsat image photo of 2018 shows that the field is being irrigated, but at what appears to be less intensity

as the adjacent fields that share the water rights described above. The infrared image also shows significant variability within the field itself. This observation is supported by the NAIP image of 2017, which shows the southern half of the field thrives significantly more than the northern half. The drainage that passes through the field also appears to be an area of potential runoff. Given the field specific conditions, which show significant spatial variability of crop success, and potential areas of runoff, it is unlikely that the Irrigation Mobile Tool will yield accurate crop yield for this particular field. Although a stressed crop may have some increment of increased water uptake when water becomes available, one also has to consider that the soil profile may be dry and hydrophobic during irrigation events, which could promote runoff and water availability in the root zone, there may be a lesser plant canopy, which would increase evaporative losses. There are simply too many variables to conclusively deduce that a very high percentage of available water would be used consumptively. Furthermore, wheel line irrigation systems have been shown to have efficiencies as low as 40% and as high as 75% (some studies indicate ranges between 60 and 75 percent, see February 6, 2019 letter). Irrigation system efficiency and historic limitation on diversion volume together must be taken into account when assessing historic consumptive use.

Recommendation:

Assuming that water stress does increase the consumptive use of a crop, it is acceptable to apply the upper end of wheel line irrigation system efficiency (75%) to the 3.49 acre-feet/acre allowance, which corresponds to 2.62 acre-feet/acre.

Aerial Photograph Review:

6/12/2018 Landsat shows that some irrigation occurred on the field to be dried up.

2017 (ArcMAP): Area to be dried up appears to be irrigated, most likely with a wheel-line. Note that on the southern half of the field it appears that areas are seasonally flooded and may experience runoff during irrigation. The 6/9/2017 Landsat image also shows that the area was irrigated.

6/8/2016 (Google Earth): Area to be dried up does not appear to be irrigated. The 6/22/2016 Landsat image confirms that there was no irrigation in 2016.

2015 (ArcMAP): Southern half of the field is marginally irrigated. As in the 2017 imagery there appear to be areas that seasonally flooded. The 5/3/2015 Landsat image also confirms that irrigation was minimal.

6/1/2014 (Landsat): Area to be dried up does not appear to be irrigated.

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 83182**

HIGH PLAINS LAND & LIVESTOCK LLC, PO BOX 1428, TWIN FALLS, ID 83303-1428; has filed Application No. 83182 for changes to the following water rights within TWIN FALLS County(s): Right No(s). 47-17506, 47-17507, 47-2382. The purpose of the transfer is to change a portion of the above rights as follows: Application for transfer proposes to change the nature of use, place of use (POU), points of diversion (POD), and period of use for a 0.06 cfs, 10.0 acre portion of irrigation water rights 47-2382, 47-17506, and 47-17507 which currently irrigate land located approximately 3.0 miles north and 10.9 miles west of the intersection of Main Street and Broadway Avenue in Buhl. The application proposes to change the nature of use and POU of these rights from irrigation during the irrigation season to year-round stockwater use at a CAFO located immediately adjacent to the currently irrigated land. The transfer proposes changing the POD for the converted portion from the currently authorized irrigation well to an existing well associated with the CAFO facility.

**NOTICE OF PROPOSED CHANGE OF WATER RIGHT
TRANSFER NO. 83184**

HIGH PLAINS LAND & LIVESTOCK LLC, PO BOX 1428, TWIN FALLS, ID 83303-1428; has filed Application No. 83184 for changes to the following water rights within TWIN FALLS County(s): Right No(s). 47-17506, 47-17507, 47-2382. The purpose of the transfer is to change a portion of the above rights as follows: Application for transfer proposes to change the nature of use, place of use (POU), points of diversion (POD), and period of use for a 0.06 cfs, 10.1 acre portion of irrigation water rights 47-2382, 47-17506, and 47-17507 which currently irrigate land located approximately 3.0 miles north and 10.9 miles west of the intersection of Main Street and Broadway Avenue in Buhl. The application proposes to change the nature of use and POU of these rights from irrigation during the irrigation season to year-round stockwater and commercial use at a CAFO located approximately 1.2 miles south and 12.0 miles west of Buhl. The transfer proposes changing the POD for the converted portion from the currently authorized irrigation well to two existing wells associated with the CAFO facility.

For additional information concerning the property location, contact Southern Region office at (208) 736-3033; or to see a full description of these rights and/or the proposed transfers, please see research.idwr.idaho.gov/apps/waterrights/Query-NewTransfers. Protests may be submitted based on the criteria of Idaho Code Sec. 42-222. Any protest against the proposed change must be filed with the Department of Water Resources, Southern Region, 650 ADDISON AVE W, STE 500, TWIN FALLS, ID 83301-5858 together with a protest fee of \$25.00 for each application on or before **June 24, 2019**. The protestant must also send a copy of the protest to the applicant.
