Re: Change in Water Right Ownership: 45-14501 (Split into 45-14501 and 45-14529), and 45-10547

Dear Helen:

The Department of Water Resources (Department) acknowledges the receipt of correspondence changing ownership of a portion of the above referenced water right(s) to you. The Department has modified its records based on the information received and has enclosed a computer-generated report for you. In addition, the portion of right 45-14501 conveyed to you (45-14529) has been abandoned per your request. Right 45-10547 is the domestic which was not split and simply conveyed into the name of the Trust.

Your portion of each water right(s) has a specified point of diversion, nature of use and place of use. If you plan to change the authorized point of diversion, nature of use, or place of use, including adding a new point of diversion, you must file an Application for Transfer of Water Right. If you do not plan to change any elements of your water right, then no further action is required at this time.

The portion of the water right retained by the original right holder retains the original water right number. The Department is sending the original right holder a copy of this letter and a computer-generated report showing the changes to the original water right.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing a Notice of Change in Water Right Ownership, the Department does not review the history of water use to determine if the right has been forfeited or deliberately abandoned through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Idaho Code §§ 42-222 and 42-223.

Please note, water right owners are required to report any change of water right ownership and any change of mailing address to the Department within 120 days of the change. Reporting forms are available from any office of the Department, or from the Department's website.

If you have any questions concerning the enclosed information, please contact me at (208) 293-9909.

Re: Change in water right ownership for Water Rights 45-10547, 45-12889, 45-14501, 45-14224, 45-14226, 45-14228, and 45-14230

Dear Helen and ViAnn:

It was nice to talk to the two of you yesterday and actually have voices instead of pages of paper that I can't communicate with. The whole ownership change process is often confusing, and I'm fairly new to it, but we'll get through it. To start with, the change in staffing has thrown a few of the ownership change notices into disarray, and, unfortunately yours was one of those. I'm not sure I even have all of the paperwork you submitted with the form.

First off, let's take a look at the enclosed map. The lands outlined in light blue are those which appear to be conveyed in the ownership change- all of the SWSE and SESW of Section 12, except the pentagon outlined in white, which we agreed is owned by Bonnie Sorensen. We also determined that water right 45-12889 is appurtenant to that parcel. The other parcel conveyed is the NENW of Section 13, also outlined in light blue. So, a portion of rights 45-14224, 45-14226, 45-14228, and 45-14230 (irrigation from Land Creek) will be appurtenant to those lands.

On the water right reports for the above irrigation rights, you'll notice that a 3.6 acre portion (outlined in white on the map) is still appurtenant to ground in the NWNW of Section 13, Ron Osborne's land. That looks to be a portion of the 27 acres you said you sold to him, and I would guess that he has never submitted an ownership change for that portion. He submitted a change of ownership for 14.4 acres back in 2005, but that deed didn't cover the 3.6 acre portion.

Additionally, 38.0 acres of the four rights are appurtenant to the NESE of Section 12, which our tax parcel layer shows to be owned by Bonnie Sorensen. That quarter-quarter is outlined in white. The parent rights of the above four rights were decreed in that quarter-quarter, so without some sort of conveyance document, they cannot be moved off.

The reason that the four irrigation rights need to be split is because of the portions that will be staying on the Ron Osborne and Bonnie Sorensen properties. At this point, one of the items we'll be needing is a conveyance document transferring the land ownership into the Helen Sorensen Trust. We have a death certificate for Sern Sorensen and a Quitclaim Deed which quitclaims the parcels outlined in light blue from the Estate of Ronald Sorensen to Helen Sorensen, Trustee of the Helen Sorensen Trust. That deed would take Ronald Sorensen's name off of the water rights, but something is needed to change the property, and thus, the water rights from Sern Sorensen to the Helen Sorensen Trust. There may be a deed that transferred the property of the estate after Sern passed away.

We also spoke about right 45-14501, which is a ground water right diverted from a well on a neighbor's property in the SENE of Section 12. You mentioned that the right did not belong on your land, but it was licensed that way, though it is not particularly useful to you, as you have no means of diverting it. In looking at the back file for the right, I found a letter to you from Dan Nelson, with the IDWR State office in Boise, suggesting that you could relinquish it (it was only a permit back then, and permits are relinquished, whereas water rights are abandoned to give them up). When you supply the conveyance documents for the current ownership change, you could then complete a Notice of Abandonment of Water Right form to give up any claim to that right. Or, if you so choose, you may keep the right, but since part of it is on the Bonnie Sorensen quarter-quarter, we would need to include it in the ownership change, and split it.

In summary, it appears to me that the rights which should be included in the ownership change are: 45-10547, 45-14224, 45-14226, 45-14228, and 45-14230. Right 45-14501 is the right which, if you choose, could be abandoned. Hopefully the information I have presented will give you a way forward in getting the documents we need to complete the ownership change.

Don't hesitate to call, write, or email if you have any questions or concerns. My email is: james.bitzenburg@idwr.idaho.gov and our phone number is 208-736-3033.

Sincerely,

Re: Change in water right ownership for Water Rights 45-10547, 45-12889, 45-14501, 45-14224, 45-14226, 45-14228, and 45-14230

To Whom It May Concern:

On August 31, 2017, our office received a Notice of Change in Water Right Ownership for the above rights. Due to a change in staffing and the departure of the person who normally processes ownership changes, the ownership change paperwork was only recently brought to my attention. In reviewing the deeds involved in the ownership change, it appears that additional information and fees will be required before I can continue to process the ownership change.

From my review of the water rights and deeds, four irrigation surface water and one irrigation ground water right will need to be split, as the deeds only convey a portion of the rights. Four of those rights were listed on the ownership change form which you submitted last year. Those four were 45-10547, 45-14224, 45-14226, and 45-14228. Right 45-14230 is within that group of rights and should be included in the ownership change. Ground covered by the five rights which was not conveyed by the deeds is located in the NESE and a portion of the SESW of Section 12, T12S, R24E and a portion of the NWNW of Section 13, T12S, R24E. This portion of the water rights will need to remain in its present ownership position, unless documents are presented which convey ownership.

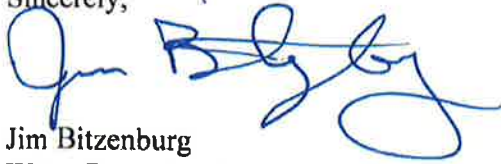

Additionally, right 45-12889 (stockwater and domestic), which was included in the ownership change, appears to be appurtenant to the 1.9 acre tax parcel in the SESW of Section 12, which was not included in any of the deeds which were received with the change of ownership material, so, unless other conveyance documents are presented, this right probably should not be included in the ownership change. Domestic right 45-10547 was included on the change of ownership form, and it looks to be appurtenant to the one acre lot and home directly to the east of the 1.9 acre lot. This parcel did appear to be conveyed in the deeds.

The fee to process an ownership change which involves a split is \$100.00 per right, and is \$25.00 to process an undivided right. For this ownership change, five rights will be split and one will not, so a total fee of \$525.00 is necessary. A fee of \$150.00 was submitted with the ownership change, so the fee now due is the difference, \$375.00.

I have enclosed water right reports for each of the above-referenced rights, including right 45-12889. If you would like to schedule an appointment or call to discuss the issues with the ownership change, feel free to do so. You can also email me at: james.bitzenburg@idwr.idaho.gov.

If we do not receive the additional fees and information by January 5, 2019, (30 days from the date of this letter), I will return the Notice of Change of Water Right Ownership form and materials to you and contact our State office to initiate a refund of the fees you have paid.

Sincerely,
