H. NARRATIVE/REMARKS/COMMENTS

Proof of beneficial use for water right permit 82-12254 was submitted on August 12, 2019. The application and additional documents/letters in the file described a spring located on the right holder's property. The system was described as diverted from the source to a 500 gallon tank through a one inch, gravity fed pipe. Google Earth imagery from 2016 and NAIP imagery from 2017 clearly show a home on the property. There is also a square shaped structure at the point of diversion, which likely is the 500 gallon tank. Although the permit included condition 187, which restricts irrigation to 1/2 acre, the application explicitly states in both section 7 and section 11 the diversion will be for in house use only. Additionally, I contacted the permit holder via phone call on September 9, 2019 and he confirmed that the system is only designed for in home use only. As such, I am recommending an annual volume 0.6 afa per Permit Processing Memo 22, when irrigation is not included in the domestic use.

Condition 26A (#4 on the permit) relating to project construction was removed for licensing. Condition 187 (#3 on the permit) relating to irrigation was removed for licensing because the system is not designed to include any irrigation. Condition X01 (#2 on the permit) relating to home use, was changed to WB5 because the system was only designed for in home use
