

MEMORANDUM

Date: September 13, 2019
To: Transfer 83593
From: Scott Stosich
Re: Review & Evaluation of Sufficiency of Information

The purpose of this transfer is to change the place of use for water rights 35-2811B and 35-7715. The proposed place of use will reflect the current irrigation configuration.

Authority to File:

The applicant, Bool Farms, LLC., is the current owner on record. The signee, Elizabeth Bool, is the registered agent for Bool Farms, and has the authority to sign and make changes to the water right on behalf of them. Bonneville County parcel data confirms that the applicant is the property owner covering the current and proposed place of use.

Water Right Validity:

The right included in this transfer was decreed in the SRBA in 2002. Review of 2006, 2011 and 2015 aerial photography shows growing vegetation on the current place of use. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

Other rights do not appear to be injured by the proposed change. The place of use is being rearranged within the current place of use in order to represent the current irrigation configuration. Neither the point of diversion nor the quantity authorized to be diverted will change as a result of the transfer. I talked with the watermaster about the proposed transfer and he did not oppose its approval.

Enlargement of Use:

The proposed changes does not appear to result in enlargement because neither the rate, volume nor irrigated acres will increase as a result of this transfer. There are no overlapping water rights on the property.

Local Public interest:

No issues identified.

Beneficial Use/Conservation of Water Resources:

No issues identified.

Effect on Economy the Local Area:

No issues identified.

Effect on Agricultural Base of the Local Area:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
