RE: Additional Information Request for Transfer 83023

Dear Applicant:

On February 6, 2019, you filed a transfer application to change the points of diversion and create a PPU for irrigation use authorized under water rights 61-283 and 61-284. Two of the points of diversion are existing with a new point of diversion located within the NWSW Sec 13, Twn 4S, Rge 8 E of Elmore County.

Review of the application finds the following items to be addressed related to injury and enlargement before processing of the transfer may resume:

- Water right 61-283 carries a priority date of 3/1/1872. The proposed point of diversion in Sec 1 places the more senior right upstream above other water users.
- The proposed point of diversion in Sec 13 is located adjacent to the irrigation use. Administrative Memo #24, Item 5d states in part: *"An application for transfer, which proposes to change a point of diversion from a surface water source to a new location where the water available is greater or more reliable... is presumed to enlarge the water right, unless the proposed change is subject to conditions limiting diversion of water at the proposed new point of diversion to times when water is available and the water right is in priority at the original point of diversion."*

Please submit information that the transfer application will not cause injury to other users or enlarge the rights for the application to be processed. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. The application will be voided without a timely written reply within the next thirty (30) days. Refunds are not issued for voided applications. Thank you for your attention to this matter.

Respectfully,

Patrick Kelly

Water Rights Supervisor
