RE: Application for Transfer No. 83023

Dear Patrick:

After additional discussions with the Applicant, she has determined it would be a better course of action to complete the processing of this application for transfer rather than amending it at this time. The following information is provided in response to your June 11, 2019 letter request.

Bennett Creek is an active Water District numbered as Water District 61C in IDWR's files. In the past, IDWR has placed a condition of approval on transfer applications limiting the amount of water that can be diverted at any new point of diversion to the amount of water available for diversion at the original point of diversion under each specific water right. This condition is reasonable on a stream with an active Water District to ensure a transfer does not enlarge the amount of water diverted under any transferred water right thus preventing injury to other water rights.

Please let me know if I can provide you with any additional information or if you have any additional questions regarding this application for transfer.

Yours truly,

A handwritten signature in blue ink that reads "Dave".
