Amended

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

WATER RESOURCES
WESTERN REGION

1. Name of applicant(s) Warren Budell *Cascade Properties LLC* Phone 208-859-5196
Name connector (check one): ☐ and ☐ or ☐ and/or
Mailing address 9747 E Gatfield Rd City Montour
State ID ZIP 83617 Email WarrenT@speedyquick.net
2. Name of representative, if any David Shaw Phone 208-365-7684
Mailing address 4001 E Main St City Emmett
State ID ZIP 83617 Email dshaw@eroresources.com
 - a. ☐ Send all correspondence for this application to the representative and not to the applicant OR
☒ Send original correspondence to the applicant and copies to the representative.
 - b. ☒ The representative may submit information for the applicant but is not authorized to sign for the applicant OR
☐ The representative is authorized to sign for the applicant. Attach a Power of Attorney or other documentation.
3. Source of water supply Padget Creek which is a tributary of North Fork Little Squaw Creek
4. Location of point(s) of diversion:

Twp	Rge	Sec	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
10N	02E	2			NE	SW	Valley	Padget Creek	

5. Water will be used for the following purposes:

Amount 15.0 AF for Storage for Stock Water purposes from 1/1 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)

Amount 15.0 AF for Stock Water From Storage purposes from 1/1 to 12/31 (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
(cfs or acre-feet per year)

6. Total quantity to be appropriated is (a) _____ cubic feet per second (cfs) and/or (b) 15.0 acre-feet per year (af).

7. Proposed diverting works:

- a. Describe type and size of devices used to divert water from the source. Water will be stored in existing pond and livestock will drink from the pond.
- b. Height of storage dam 6 feet; active reservoir capacity 15 acre-feet; total reservoir capacity 15 acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 12. For dams 10 feet or more in height AND having a storage capacity of 50 acre-feet or more, submit a separate [Application for Construction or Enlargement of a New or Existing Dam](#). Application required? ☐ Yes ☐ No
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
- e. If well is already drilled, when? _____; drilling firm _____; well was drilled for (well owner) _____; Drilling Permit No. _____.

For Department Use

Received by _____ Date _____ Time _____ Preliminary check by _____
Fee \$ _____ Received by _____ Receipt No. _____ Date _____

035
8-28-19

8. Description of proposed uses (if irrigation only, go to item 9):

- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. 70 Pair
- c. Municipal; must complete and attach the [Municipal Water Right Application Checklist](#).
- d. Domestic; show number of households _____
- e. Other; describe fully. _____

9. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
10N	02E	2									S								

Total number of acres to be irrigated: _____

10. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping? None

11. a. Who owns the property at the point of diversion? Applicant

b. Who owns the land to be irrigated or place of use? Applicant

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing: _____

12. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary. Existing pond 6' average depth, surface area 2.5 acres and 15 AF annual storage.

13. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

14. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map or maps clearly identifying the proposed point of diversion, place of use, section #, township & range. The map scale shall not be less than two (2) inches equal to one (1) mile.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

RE: Amended Applications for Permit Nos. 65-23827 and 65-23828

Dear Nick:

Thank you for taking my call regarding the filing of these amended applications. The original applications were filed for irrigation with diversion rates of 3.2 cfs and annual storage volumes for irrigation of 820 afa each. The amended applications are for stock water storage to use the existing ponds estimated to hold 20 and 15 ac-ft respectively for amended applications for permit nos. 65-23827 and 65-23828.

We anticipate the amended applications will resolve the protest against application 65-23827. I let Mr. Honsinger know our plan to amend the application and have forwarded a copy of the amended application to him but have not yet received a response.

As we also discussed, hopefully these amended applications can be re-advertised based on the original filing fee paid for the irrigation applications which were much larger than the \$100 application fee that would have applied to the applications as amended.

Thank you for your consideration, please let me know if you have questions or need any additional information.

Yours truly,

Dave Shaw

Application for Permit No. 65-23827 & 65-23828

Dear Applicant:

The Department of Water Resources has received your water right application. Please refer to the number referenced above in all future correspondence regarding this application.

A legal notice of the application has been prepared and is scheduled for publication in the STAR NEWS on 9/5/2019 and 9/12/2019. Protests to this application may be submitted for a period ending ten (10) days after the second publication.

If the application is protested, you will be sent a copy of each protest. All protests must be resolved before the application can be considered for approval. If the protest(s) cannot be resolved voluntarily, the Department will conduct a conference and/or hearing on the matter.

If the application is not protested, the Department will process your application and notify you of any action taken on the application. If your application is approved, the Department will send you a copy of the permit.

Please contact this office if you have any questions regarding the application.

Sincerely,

Anna Kaiser

Subject: RE: Budell storage apps

Yes, absolutely. In systems where the system does not remain full for the complete season, we do not want to consider refill for evaporation. We leave it as capacity only. Thanks for clearing this up Dave!

To: Kelly, Patrick <Patrick.Kelly@idwr.idaho.gov>
Subject: RE: Budell storage apps

Thanks Patrick,

On the Padgett Creek side once the creek dries up the evaporation can't be replaced until fall or when the creek begins to flow. Most of the evaporation likely occurs when there isn't any water in the creek to replace the evaporation loss and when the pond refills both the water used by livestock and lost to evaporation will be refilled, hopefully, up to the capacity of the pond. I don't want to overthink this application but it appears both the stock water and evaporation would be captured in the 15 AF. Does that make sense?

Thanks again,
Dave

Subject: RE: Budell storage apps

Morning Dave,

Yes we can make the changes for advertising but will need amended apps before draft approvals are circulated to all parties. For Padgett Creek then do we want to go with 15 af capacity, 4.0 af evaporation for a total of 19.0 af? For Little Squaw, at 9 ft max and surface area of 3.8 we get a capacity of 13.7 af, the application for 20 af would cover the 6.0 evaporation so no amendments would be required.

To: Kelly, Patrick <Patrick.Kelly@idwr.idaho.gov>
Subject: RE: Budell storage apps

Patrick,

Thank you, to include evaporation do we need to amend the applications to show evaporation? I anticipate on the Padgett Creek side the stream will be dry most of the summer but as long as water is available replacing evaporation

would make management much easier. On the North Fork side replacing evaporation would be desirable until and unless a delivery call requires any water to be bypassed.

What is the easiest approach to include evaporation? Do the applications need to be amended?

Thanks,

Dave

Sent: Monday, August 26, 2019 3:27 PM

To: Dave Shaw <dshaw@eroresources.com>

Subject: Budell storage apps

Dave,

Just wanted to confirm the numbers with you prior to advertising, again. On the Little Squaw Creek reservoir, we have 9 ft depth, 3.8 ac surface area, at 40% slope totals 13.7 af. The application is for 20 af, but does not include mention of evaporation (6.0 af). The Padgett Creek storage recognizes an *average* depth of 6 ft and surface area of 2.5 ac for a total capacity of 15 af. Evap for this pond would be 4 af. If 6 feet is max depth, 40% of the storage use would be 6.0 af. Please confirm the dimensions and whether the applicant wishes to keep the ponds full year round by including evaporation.

Thank you!

RE: Application for Permit No. 65-23828 Rule 40 Response

Dear Patrick:

This information is provided in response to your request dated May 24, 2019. There are 2 existing water rights on Padget Creek upstream from the proposed point of diversion under application for permit no. 65-23828. They are decreed water right nos. 65-7185 and 65-22574. The points of diversion for both rights are upstream from the point of diversion proposed by application for permit no. 65-23828.

Padget Creek is tributary to the North Fork of Little Squaw Creek and ultimately Little Squaw Creek. Little Squaw Creek is typically water short during the summer irrigation season and water use under this right will need to rely on storage water during that time.

StreamStats Version 4.3.1 provides an estimated discharge of Padget Creek of 474 acre-feet per year at the proposed point of diversion. Water right 65-7185 is for 365 acre-feet of storage but the reservoir is typically kept full or nearly full for recreation purposes. The normal annual diversion for water right 65-7185 is for replacement of seepage and evaporation, not the full 365 acre-feet to refill the reservoir.

Natural flow water rights from Little Squaw Creek total 12.17 cfs and are located primarily in the lower part of the basin. StreamStats estimates the median discharge of Little Squaw Creek to be in excess of 12.17 cfs through June allowing some new diversions in the basin to be developed without interfering with the senior rights in the Little Squaw Creek basin.

Consultants in
Natural Resources
and the Environment

The StreamStats estimate show over 90% of the Padget Creek runoff occurs during the November through June period. Water availability during this period will allow water to be stored for later irrigation use and may allow an early direct diversion irrigation to occur.

The total water availability at the proposed point of diversion from Padget Creek is unlikely to be the full 820 acre-feet applied for, but combined diversions for natural flow irrigation and storage could total up to 400 acre-feet in some years without injury to other water rights. Peak irrigation demand periods will be satisfied from storage water accrued during runoff periods when all downstream water rights are satisfied.

This application for permit is proposed to be used in conjunction with application for permit no. 65-23827, and between both water rights should be able to provide a full water supply for 164 acres in most years.

Please let me know if you need any additional information.

Yours truly,

Re: Application for Permit No. 65-23828 Rule 40 Additional Information Request

Dear Applicant:

The Idaho Department of Water Resources ("IDWR") is processing Application for Permit No. 65-23828. IDWR requests additional information required by the Water Appropriation Rules¹. This requirement includes the following items discussed in Water Appropriation Rule 40, Rule Subsections 040.05c through 040.05d (copy enclosed):

Enclosed is a copy of the Watermaster Recommendation Form. Your response should emphasize effect on existing water rights and sufficiency of water supply to prevent injury to downstream users.

Please submit the requested information for application processing to continue. **Your written response is required within the next thirty (30) days.** You may seek additional time to provide the information if necessary. The application will be voided without a timely written reply. Refunds are not available for voided applications.

IDWR rules, forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you need more information. Thank you for your attention to these matters.

Sincerely,

Patrick Kelly

Re: Comment Request for Application for Permit 65-23828

Dear Watermaster,

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. Copies of the application are enclosed with this letter for your reference. Please review the application, complete a recommendation form, and submit your reply, if any to this office by 5/26/2019.

IDWR will assume you do not object to these applications if a timely response is not received. Please contact me if you have any questions in this matter. Thank you for your help.

Sincerely,

Patrick Kelly
