

State of Idaho
Department of Water Resources
Water Right License
Water Right No. 35-14240

Priority: February 08, 2012

Maximum Diversion Rate: 3.37 CFS

Maximum Diversion Volume: 674.8 AF

It is hereby certified that:

LANCE AND/OR LISA FUNK PARTNERSHIP
PO BOX 310
AMERICAN FLS ID 83211-0310

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated February 08, 2012, and has submitted Proof of Beneficial Use on February 09, 2017. An examination confirms water is diverted from:

Source : GROUND WATER

Beneficial Use

IRRIGATION

Period of Use

04/01 to 10/31

Rate of Diversion

3.37 CFS

Annual Volume

674.8 AF

Location of Point(s) of Diversion

GROUND WATER SW¼ SW¼ SE¼, Sec. 1, Twp 07S, Rge 28E, B.M. POWER County

Place of Use: IRRIGATION

Twp	Rng	Sec	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
07S	28E	12	30.5	30.5	30.5	30.5	31.9	14.8											168.7

Total Acres: 168.7

Conditions of Approval

1. Rights 35-7973 and 35-14240 when combined shall not exceed a total diversion rate of 4.96 cfs.
2. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 120.
3. Prior to diversion of water under this right, the right holder shall install and maintain a flow meter measuring device and lockable controlling works of a type acceptable to the Department as part of the diverting works.
4. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.
5. This right is for the use of trust water, and it is subject to review 5 years after the date of permit approval to re-evaluate the availability of trust water for the authorized use and to re-evaluate the public interest criteria for reallocating trust water.
6. Administration of this right to satisfy the minimum stream flow water rights in the Snake River at Murphy Gage shall not be required because use of water pursuant to this right is either non-consumptive or the right holder is required to provide ongoing mitigation to offset the depletion of water resulting from the use of this right.

State of Idaho

Water Right License
Water Right No. 35-14240

7. To mitigate for the depletion of water resulting from the use of water under water rights 35-14240, 35-14241, 35-14242 and 35-14243 and to prevent injury to senior water right holders, the right holder shall cease diverting and using water as authorized by the following water rights for the purposes and amounts specified below. Moreover, the official records for the following water rights will be changed to show that diversion and use of water is not authorized because the rights, or a portion thereof, are being dedicated to mitigation purposes.

Right No.	Use Changed to Mitigation	Mitigation Rate (cfs)	Mitigation Volume (AF)	Mitigation Acres
29-2284 (previously 35-14014)	Industrial	4.44	3215.5	N/A
29-2301 (previously 35-14015)	Industrial	3.95	2858.3	N/A
Combined Limit:			6073.8	

If the specified mitigation rights, or portion thereof, are sold, transferred, leased, used on any place of use, or are not deliverable due to a shortage of water, a priority call, or a termination in lease contract then the amount of water authorized for diversion under this right approval shall be reduced by the same proportion as the reduction to the mitigation rights.

8. In the event the right holder does not maintain the right to use water rights 29-2284 and 29-2301 for mitigation purposes, the right holder may propose a substitute mitigation plan. The substitute plan must be provided to the Department no later than December 1st in the year immediately prior to the irrigation season where the substitute plan is proposed to be implemented. The Department will advertise the substitute plan to the public and the protestants shall have the right to challenge the substitute plan. If the substitute plan is not approved by the Department, the right holder shall not divert under this right.
9. By December 1st of each year, the right holder shall provide a written report to the Department describing the number and location of acres irrigated that year, the volume of water diverted under this right, the source of mitigation for the next irrigation season, and the number and location of acres proposed to be irrigated in the following year.
10. As resources allow, the Department will conduct at least one in-person field examination of the authorized place of use of this right each year to verify the required mitigation and authorized irrigation under this right prior to June 15th of each year. It shall be the responsibility of the right holder to follow up with the Department by June 15th of each year to determine if the field examination was performed. If the Department is unable to conduct the field examination for any reason, the right holder or its consultant shall perform the field examination and report findings from the field examination to the Department and the protestants to this right by July 15th of each year.
11. The diversion and use of water described in this right may be subject to additional conditions and limitations agreed to by the protestant and the right holder under a separate agreement to which the Department is not a party. Because the Department is not a party, the Department is not responsible for enforcement of any aspect of the agreement not specifically addressed in other conditions herein.
12. Noncompliance with any condition of this right, including the requirement for mitigation, is cause for the director to issue a notice of violation, cancel or revoke the right, or, if the right is included in a water district, request that the watermaster curtail diversion and use of water.
