Re: Application for permit no. 67-15326

Ms. Buckner,

I am writing today in regard to the application referenced above, which proposes to divert water from an unnamed stream for irrigation, irrigation storage, and aesthetic storage purposes. The Idaho Dept. of Water Resources received this application on May 14, 2019.

Your application proposes to divert water from a regulated source within the Weiser River Water District. Regulated sources include tributary surface water and tributary shallow ground water (ground water above the first confining layer in the aquifer). The Weiser River Watermaster regularly curtails junior water rights by June 15 each year. This is necessary under Idaho law to protect senior water rights when the water supply is not adequate to fill all rights at the same time.

This means your application, if approved, would include a condition of approval automatically curtailing your new use by June 15 of each year. This condition of approval balances protection of senior water rights with promotion of the maximum economic benefit of water resources.

To determine if you want to proceed with your application based on the above explanation, please complete and return the enclosed questionnaire. Your written reply must be received within the next thirty (30) days. Failure to make a timely response will cause your application to be voided. A refund of the application fee cannot be issued for a voided application.

Furthermore, I have noted the following issues with your application that you may need to address prior to advertising your application:

- Your map shows that you plan to irrigate roughly 8 acres of irrigation. Your application says you only plan to irrigate 5 acres. You may amend your application to increase the rate (to 0.16 cfs in items 5 and 6) and acres (item 9).
- You must add an "Irrigation Storage" component to item 5 of your application. The irrigation storage component should show an annual volume in acre-feet.
- Please elaborate on your pumping system from the pond in item 7a of your application.
- Please justify your request for 15 acre-feet storage in item 12. Please include in your answer your plan to replace any water lost to evaporation throughout the year. Idaho statute allows up to 5 acre-feet storage per acre of irrigation.

Application for permit no. 67-15...
June 10, 2019
WRA Cody Parker

Please amend your application accordingly and return the application and questionnaire within thirty (30) days of the date of this letter. Please let me know if you need any help. Thank you for your time.

Respectfully,

Cody Parker
