

## MEMORANDUM

**To: Water Right File No 63-32423**  
**From: Ashley Ritter**  
**Date: August 12, 2019**  
**Re: Phone Conversation with SPF Water Engineering**

---

On August 12, 2019, Jason Thompson with SPF Water Engineering (SPF) was contacted to follow up on the initial July 12, 2019, phone conversation regarding permit 63-32423.

On July 12, 2019, I called and spoke with Jason Thompson (SPF), and he stated that the permit holder has recently begun to divert water. SPF had submitted a proposal to the permit holder concerning monitoring and reporting of production well diversion that is required to be submitted to IDWR to satisfy conditions under permit 62-32423.

On August 12, 2019, Jason stated that the owner of permit 63-32423 has acquired SPF to perform monitoring and reporting to satisfy conditions of the permit regarding mitigation and production well diversion (Permit 63-32423 condition 14).
