5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. Re: Review & Analysis of Application to Lease and Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Companion application to lease and rent a portion of right 25-7002 from 2019-2023 for 45 af, received on May 6, 2019. Purpose of the lease rental is to move a portion of the right from the Lewisville plant to the Idaho Falls plant to increase production for potato processing. Both are within the ESPA, and modeling was provided for this first time lease rental package.

AUTHORITY TO FILE: Water right 25-7002 is in the name of Idahoan Foods, who gave signature authority to Racine, Olson, Nye and Budge law firm, as attachment to the applications to lease and rent. Supplemental application pages were submitted and signed by TJ Budge. Lease and rental place of use and PODs are in the name of Idahoan Foods, LLC. No concerns with authority to file.

WATER RIGHT VALIDITY: Ground water right 25-7002 for industrial use at potato processing plant in Lewisville was decreed in 2005. Water right Nos 25-7002 and 25-10794 share two points of diversion in the NESE of Sec 5; however notes in the WMIS database states the WMIS # 200350 in the SENESE is not measurable and flow for both of these are recorded under WMIS #200700, in the SWNESE of Section 5. Readings for annual diversion volume for WMIS # 200700 have not exceeded the combined diversion volume of 967 af for these two rights, with the highest reading 912.55 af in 2016. No concerns with validity of the water right and portion offered to the bank.

INJURY TO OTHER WATER RIGHTS: Lease and Rental POD's are within the ESPA. Modeling was included with the rental application. Verification of Etran 3.3 modeling for 15 af per trimester shows no mitigation is necessary. Lease and rental of this water right would not cause injury to other water rights.

ENLARGEMENT OF USE: No change in nature of use, diversion volume of 45 af for Industrial right 25-7002 will be for same use at different plant for increased rate / production with right 35-8852 (WMIS #200217). Combined limits of these two will be additive for the leased amount of 0.091 cfs and total diversion volume of 45 af, along with 35-8852 for 0.89 cfs and total diversion volume of 430.8 af, equal to 0.981 cfs and total combined diversion volume of 475.8 af. No enlargement is apparent through the lease and rental.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the rental PD is subject to Water District # 120. Request for comments sent to Eastern Region manager and Watermaster on June 20, 2019.
