

IN-OFFICE BENEFICIAL USE FIELD REPORT

Permit No: 78-12396

Examiner: Cody Parker

Date: July 19, 2018

In-office qualification (IDAPA 035.01.r):

- ☐ Irrigation $\leq$ 5 acres
☐ Stockwater storage $\leq$ 14.6 af
☒ Total diversion rate $\leq$ 0.24 cfs and not irrigation or storage

Current Owner Name: USDA Forest Service

Address: 500 N Mission St., Bldg 2, McCall, 83638

Beneficial Use Fee Paid: \$50.00

Receipt: C102738

Source: Spring

Source change? ☐ N ☒ Y Change clarifies originally intended source.
If not – void permit.

Comments:

Diversion Rate

Permitted Rate: 0.02 cfs

BU Standard Limit: 0.04 cfs

BU Fee Limit: 0.20 cfs

Theoretical (optional): cfs

Recommended Total Div Rate: 0.02 cfs**Annual Volume**

For Irrigation: cfs x 1.9835 x days = af
 acres x af/ac (FHR) = af
 Smaller of two volumes = af

For other uses: 0.6 afa per Admin AP Memo 22

IN-OFFICE BENEFICIAL USE FIELD REPORT

Recommended Amounts

Beneficial Use	Season of Use	Diversion Rate (cfs)	Annual Volume (af)
Domestic	1/1 to 12/31	0.02 cfs	0.6 afa
Totals		0.02 cfs	0.6 af

Conditions: - 26A, - X60

Have conditions of permit been met? ☒ Y ☐ N

Narrative: This permit authorizes the diversion of 0.02 cfs from a spring for domestic use. Proof of beneficial use was submitted November 29, 2016. I completed this field exam on July 19, 2018.

I could not locate the point of diversion from aerial imagery or from any other records in the backfile for this permit. I visited the site to get GPS coordinates for the POD. I could not find any pipe leading into the cabin, but there was a sink in the cabin that clearly received water from somewhere. North of the cabin is a small channel that ends about 100 ft up the hill. No water was flowing at the time. I took a GPS point at the head of the channel. Ms. Holly Becker of the Forest Service told me that there is a buried collection tank somewhere near the head of the channel where the spring surfaces. Water from the collection tank is piped to the sink in the cabin. I have used my GPS point as the location of the point of diversion.

The permit is in the name of the USFS, but the cabin is owned and operated by a grazing association. Continued use of the cabin is authorized under a special use permit from the USFS. Condition 004 should be retained on the final license.

RE: Water Right Permit Nos 78-12396 & 78-12397

Dear Ms. Becker,

I am writing you today in regard to the water right permits referenced above. Permit 78-12396 authorizes the diversion of water from a spring for domestic uses associated with a primitive cabin near Goose Lake. Permit 78-12397 similarly authorizes diversion from a spring for the Elk Lake Rider Cabin. Proof of Beneficial Use has been submitted for both of these permits indicating that development is now complete. The next step in the water right process is to complete a field examination for these permits to confirm the extent of beneficial use of water. Because these permits describe the diversion of a relatively small amount of water, I am able to complete the examination from the office. However, to complete the exam I require additional information.

I have enclosed maps for each of the two permits referenced above. On each of the maps I need you to show the location where water is diverted from the source. Please edit the maps and return to me at the address listed in the letterhead above, or scan and email to cody.parker@idwr.idaho.gov.

I look forward to your reply within thirty (30) days of the date of this letter. If you do not make a timely reply I will assume that you have no further interest in pursuing a water right license, and I will take action to void the permit. Please let me know if you have any questions. Thank you for your time and for your attention to these matters.

Respectfully,

Cody Parker
