Re: Transfer Synopsis

Application for transfer proposes to change the point of diversion (POD) for ground water irrigation right 37-23162 (0.016 cfs, 0.8 acre) which is currently diverted from a well located approximately 2.3 miles north and 0.7 mile west of the intersection of Main and Bullion Streets in Hailey. The proposed POD will be a new well located on the applicants' property approximately 1.7 miles north and 0.3 mile west of Hailey. The transfer also proposes to create a 1.0 acre irrigation permissible place of use (PPU) for the ground water right and three Big Wood River rights (0.03 cfs, 0.8 acre) on the applicants' property. After the transfer, the four rights will irrigate 0.8 acre within the 1.0 acre PPU.

The transfer will be advertised and public comment sought. The transfer is located within Water District 37, so Watermaster comments will be solicited.

The water rights involved are: 37-23162 (ground water, 0.016 cfs), 37-23172 (Big Wood River, 0.01 cfs), 37-23182 (Big Wood River, 0.01 cfs), and 37-23192 (Big Wood River, 0.01 cfs).

MEMORANDUM

Date: June 18, 2019
To: Transfer 83321
From: Allison Inouye
Re: Filing Fee

This transfer involves changing the point of diversion (POD) for a ground water irrigation right and changing the place of use (POU) for the ground water right and three surface water rights. A change of ownership for the four rights was included with the application. The ownership change required splitting the four rights, so that portion of the fee is \$400.00. The POD change for the ground water right is based on the total flow rate of the right, 0.016 cfs. The fee for the 3 surface water rights is based upon the proportional amount of each right that is changing. The application proposes to change 0.2 acres out of the 0.8 acre limit, which amounts to a total flow rate changing of 0.0075 cfs ($0.2 \text{ ac} / 0.8 \text{ ac} * 0.03 \text{ cfs}$). Thus, the total cfs proposed to be transferred is $0.016 + 0.0075 = 0.0235 \text{ cfs}$. The transfer fee schedule indicates that the filing fee is \$200 for a transfer involving 0.00 – 0.20 cfs. The total fee including the ownership change splits and the transfer is \$600.00, which was paid by check #525 from Silver Sage Owners Association (receipt #S037331). Nine other companion transfers were filed at the same time and were paid for with the same check.

We're looking at them being additive, since there are no combined flow limits, and since those two transfers change the POU's, all of the rights need to be in there. So that's why we thought the 0.046 cfs and 2.8 AF was more accurate.

Allison and Jim,

Because Lot 1 and Lot 2 have not been developed yet. It is unknown where the irrigation will occur. That is why we are creating a PPU for each of these lots. Each lot will have 0.80 acres of irrigation. With 0.016 cfs of ground water with 2.8 AFA. And the question is whether the 3 surface water rights are additive for 0.03 cfs or are limited to a total of 0.01 cfs. The additive total of 0.03 makes more sense to me. I do not think the water rights reports clarify the situation.

Subject: Silver Sage Transfers - Clarification Needed

Hi Greg,

Jim & I came across something that we need clarified on 2 of the Silver Sage transfers.

- Transfer No. 83321 for Kyle & Kelley Rushton (Lot 1): On page 3, item B2 lists the total amount of water proposed to be transferred as 0.016 cfs and/or 2.8 AFA. That is the flow rate for the portion of the ground water right appurtenant to that lot. However, based on the transfer narrative and cover letter, we understand this transfer is also changing the place of use of the 3 surface water rights appurtenant to that lot by creating a PPU. Therefore, the total amount of water proposed to be transferred would be the total of all 4 water rights, or 0.046 cfs and/or 2.8 AFA.
- Transfer No. 83326 for Jodie Goitiandia (Lot 2) has the same situation. If all 4 rights are being proposed to change, the total amount of water proposed to be transferred would be 0.046 cfs and/or 2.8 AFA.

Can you confirm if we are correctly understanding the intent? If so, do we have your permission to clarify Item B2 on both of these applications?

Thanks,
Allison

Hi Greg,

For Transfer 83321 (Kyle & Kelley Rushton, Lot 1 of Silver Sage Subdivision), a warranty deed was included with the application. It is from 2005 and shows Kyle & Kelley Rushton as the grantors conveying Lot 1 to a different party. Is there another deed showing that the Rushtons are the current owners of the property?

Thanks,
Allison

Dear Water Right Holder(s):

The Department of Water Resources (Department) acknowledges the receipt of an Application for Transfer changing ownership of a portion of the above referenced water right(s) to you. Based on the deeds provided, the Department has modified its records and has enclosed a computer-generated report for you.

Your Application for Transfer will be processed based on the new water right numbers in your name(s). You will receive additional correspondence regarding the processing of that application.

The portion of the water right retained by the original right holder retains the original water right number. The Department is sending the original right holder a copy of this letter and a computer-generated report showing the changes to the original water right.

Updating the ownership record for a water right does not reconfirm the validity of the right. When processing a Notice of Change in Water Right Ownership, the Department does not review the history of water use to determine if the right has been forfeited or deliberately abandoned through five years or more of non-use. To read more about water right forfeiture, including how to protect a water right from forfeiture, please see Idaho Code §§ 42-222 and 42-223.

Please note, water right owners are required to report any change of water right ownership and any change of mailing address to the Department within 120 days of the change. Reporting forms are available from any office of the Department, or from the Department's website.

If you have any questions concerning the enclosed information, please contact me at (208) 736-3033.

Re: Silver Sage Subdivision

Dear Mr. Skinner:

Attached to this letter are 10 transfer applications. The intent of the transfer applications is to assign 11 portions of water rights 37-22499, 37-2843, 37-21240 and 37-21242 to various property owners and entities associated with the Silver Sage Subdivision.

The parent water rights 37-22499, 37-2843, 37-21240 and 37-21242 will be split based on the attached Transfer Analysis Spreadsheet to the various property owners. The remaining portion of the parent water rights will remain in the name of Silver Sage Owners Assn Inc. The 5.9 acre portion of water rights retained by Silver Sage Owners Assn Inc. will be located in common areas, roadways, and on individual lot owners property. The current irrigation water right place of use currently covers all of these areas and will simply be reduced.

John Galgano and Susan Galgano, who own Lot 10, have given permission for the Silver Sage Owners Assn Inc. to own water rights on their property. No transfer application is being submitted on behalf of the Galgano's at this time.

Multiple attempts have been made to contact the Crouch's who own Lot 11 regarding the proposed water right transactions. No correspondence or response has been received by Brockway Engineering or the Silver Sage Owners Assn Inc. At this time the water rights currently located on Lot 11 will remain in the name of Silver Sage Owners Assn Inc.

Based on correspondence with IDWR, existing wells that have been drilled as domestic but will now be utilized as domestic and irrigation well must pay the difference permit fee of a domestic well (\$75.00) verses an irrigation well (\$200.00). Therefore, a fee of \$125.00 will be assed per lot owner with an existing well.
